1. INTRODUCTION

1.1 THE STATE OF THE MALAYSIAN MARINE ENVIRONMENT	1
1.1.1. Heavy metal pollution	1
1.2 THE MARINE ENVIRONMENTAL CRITERIA AND STANDARDS	4
1.3 TOXICITY TESTING	4
1.4 AIM AND SCOPE OF STUDY	6
1.4.1 Reasons for the study	6
1.4.1.1 Lack of toxicity data	6
1.4.1.2 The need of a rapid toxicity test method	6
1.4.2 Elements and assumptions	7
1.4.3 Objectives of study	8
1.4.3.1 Generation of heavy metal toxicity data	8
1.4.3.2 Development of a rapid toxicity test method	9
1.4.3.3 Establishment of a Marine Water Quality Criteria and Standard	9
1.4.4 Study plan	9
1.4.4.1 O.D. vs cell counts	9
1.4.4.2 The toxicity tests	10
1.4.4.2.1 Experimental design	10
1.4.4.2.2 Measurements of growth and quality control	10
1.4.4.2.3 The test system	11
1.4.4.3 Statistical analyses	11

2. LITERATURE REVIEW

2.1. HEAVY METALS	12
2.1.1 Definitions	12
2.1.2 Natural sources and uses of heavy metals	13
2.1.3 Essential heavy metals	13
2.1.4 Non-essential heavy metals	15
2.1.5 Toxic heavy metals	15
2.1.6 Sources of heavy metal pollution	15
2.1.7 Toxicity of heavy-metals	15
2.1.8 Transport of metals through the aquatic food chains	16
2.2 HEAVY METALS IN THE MARINE ENVIRONMENT	17
2.2.1 Introduction	17
2.2.2 Heavy metals in marine waters and sediments	18
2.2.2.1 Cadmium	18
2.2.2.2 Copper	19
2.2.2.3 Manganese	20
2.2.2.4 Arsenic	21
2.2.3 Heavy metals in marine organisms	23
2.2.4 Heavy metals in local and regional marine environment	24
2.3 AQUATIC TOXICITY TESTS	26
2.3.1 Test types	27
2.3.2 Types of responses	27
2.3.2.1 Acute toxicity	27
2.3.2.2 Chronic toxicity	28
2.3.2.3 Lethal toxicity	28
2.3.2.4 Sublethal toxicity	28
2.3.3 Test endpoints	28
2.3.3.1 Biological endpoints	28
2.3.3.1.1 Lethality	28
2.3.3.1.2 Sublethality	29
2.3.3.2 Statistical endpoints	29
2.3.3.2.1 Endpoints derived from hypothesis testing	29
2.3.3.2.2 Endpoints derived from point estimation	29
2.3.4 Types of exposure system	30
2.3.4.1 Static tests	30
2.3.4.2 Static renewal tests	30

2.3.4.3 Flowthrough tests	30
2.3.4.4 Other toxicity tests	31
2.3.4.4.1 <i>In situ</i> tests	31
2.3.5 Experimental design	31
2.3.5.1 Range-finding test	31
2.3.5.2 Screening test	31
2.3.5.3 Definitive test	32
2.3.6 Test method development	32
2.3.7 Test materials	32
2.3.8 Test organisms	33
2.3.8.1 Criteria for selecting test species	33
2.3.8.2 Marine test species	33
2.3.9 Toxicity testing with tropical marine organisms	34
2.3.9.1 The ASEAN-Canada Cooperative Programme on Marine Science-Phase II	34
2.3.9.2 The ASEAN test methods	35
2.4 MARINE PHYTOPLANKTON	36
2.4.1 Definitions	36
2.4.2 Classification	36
2.4.3 Primary production	36
2.4.4 Marine aquaculture feed	37
2.4.4.1 <i>Chaetoceros</i> (Diatom; class Bacillariophyceae, division Bacillariophyta)	38
2.4.4.2 <i>Isochrysis</i> (Chrysophyte; class Haptophyceae, division Chrysophyta)	40
2.4.4.3 <i>Tetraselmis</i> (Green algae; class Prasinophyceae, division Chlorophyta)	41
2.4.4.4 Phytoplankton used as aquaculture feed in Malaysia	43
2.4.5 Phytoplankton as biological indicators of marine pollution	44
2.5 TOXICITY TESTS AND STUDIES INVOLVING HEAVY METALS AND ALGAE	45
2.5.1 Laboratory approaches	46
2.5.2 Field approaches	48
2.5.3 Other tests with heavy metals	49
2.5.4 Toxicity testing with marine phytoplankton	50
2.5.4.1 Protocols for conducting toxicity tests with microalgae	51
2.5.4.2 General principles of toxicity testing with microalgae	51
2.5.4.3 Criteria for selection of test species	53

2.6 HEAVY METAL TOXICITY TO PHYTOPLANKTON	54
2.6.1 Introduction	54
2.6.2 Physiological Effects	56
2.6.2.1 Cadmium	56
2.6.2.1.1 Growth	56
2.6.2.1.2 Photosynthesis	57
2.6.2.1.3 Cell Division	57
2.6.2.1.4 Cell size and motility	58
2.6.2.1.5 Metabolism	58
2.6.2.1.6 Other effects	59
2.6.2.2 Copper	60
2.6.2.2.1 Growth	60
2.6.2.2.2 Photosynthesis	62
2.6.2.2.3 Cell division	63
2.6.2.2.4 Cell size and motility	64
2.6.2.2.5 Metabolism	65
2.6.2.2.6 Other effects	66
2.6.2.3 Manganese	67
2.6.2.3.1 Photosynthesis	67
2.6.2.3.2 Growth and cell division	68
2.6.2.3.3 Cell volume	68
2.6.2.4 Arsenic	68
2.6.2.4.1 Growth	68
2.6.2.4.2 Photosynthesis	69
2.6.2.4.3 Cell motility	70
2.6.3 Morphological effects	70
2.6.3.1 Cadmium	71
2.6.3.2 Copper	72
2.6.3.3 Arsenic	73
2.6.4 Ecological Effects	74
2.6.5 Quantitative toxicity data	75
2.7 FACTORS AFFECTING HEAVY METAL TOXICITY	82
2.7.1 Speciation	82
2.7.2 pH	84
2.7.3 Hardness	85
2.7.4 Salinity	86
2.7.5 Temperature and light	87
2.7.6 Seawater and culture media composition	87
2.7.6.1 Nitrate and phosphate	88
2.7.6.2 EDTA (Ethylenediaminetetraacetic acid)	89

2.7.7 Complex formation	90
2.7.7.1 Binding to environmental constituents	91
2.7.7.2 Humic acids	92
2.7.7.3 Algal extracellular products and exudates	92
2.7.7.4 Sulphur compounds and amino acids	94
2.7.8 Phytoplankton species	95
2.7.9 Population density	95
2.7.10 Ionic interactions	96
2.7.11 Other pollutants	97
2.7.12 Metal concentration	97
2.7.13 Changes in algal tolerance and chemical state of metal	98
2.8 MODE OF HEAVY METAL TOXICITY TO PHYTOPLANKTON	98
2.8.1 Cadmium	98
2.8.2 Copper	100
2.8.3 Manganese	104
2.8.4 Arsenic	104
2.9 MICROALGAL TOLERANCE TO HEAVY METALS	105
2.9.1 Mechanisms of tolerance	106
2.9.1.1 Surface binding of metal ions	106
2.9.1.2 Internal detoxification	107
2.9.1.3 Exclusion mechanisms	108
2.9.1.4 Metal transformation	110
2.9.1.5 Genetically-determined metal resistance	111
2.9.1.6 Physiological and genetic adaptation	111
2.10 UPTAKE AND BIOACCUMULATION OF HEAVY METALS BY PHYTOPLANKTON	113
2.10.1 Introduction	113
2.10.1.1 Cadmium	115
2.10.1.2 Copper	118
2.10.1.3 Manganese	119
2.10.1.4 Arsenic	119
2.10.2 Mechanisms and kinetics of uptake and bioaccumulation	121

3. MATERIALS AND METHODS

3.1 INTRODUCTION	126
3.2 QUALITY ASSURANCE AND QUALITY CONTROL	126
3.2.1 Negative controls	126
3.2.2 Positive controls (Reference toxicant)	126
3.2.3 Test organisms	127
3.2.4 Replication	127
3.2.5 Water quality measurements and maintenance	127
3.2.6 Standard laboratory procedures	128
3.3 TEST SYSTEM	128
3.3.1 Facilities and equipments	128
3.3.2 Water supply	128
3.3.3 Lighting and temperature	129
3.3.4 Aeration	129
3.3.5 Cleaning procedures	129
3.3.6 Test vessels	130
3.4 TEST MATERIALS	130
3.4.1 Introduction	130
3.4.2 Heavy metal main stock solutions	130
3.5 TEST ORGANISMS	131
3.5.1 Species	131
3.5.2 Source and origin	134
3.5.3 Isolation of pure algal strain	134
3.5.4 Maintenance	135
3.5.4.1 Maintenance and growth medium	135
3.5.4.2 Growth conditions	136
3.5.5 Acclimation	137
3.6 EXPERIMENTAL DESIGN	137
3.6.1 Correlation between O.D. and cell count	137
3.6.2 Range-finding tests	137
3.6.3 Definitive tests	137

3.7 TEST CONDITIONS	138
3.8 EXPERIMENTAL PROCEDURES	138
3.8.1 Determination of correlation and regression between O.D. and cell counts	138
3.8.2 Toxicity testing	141
3.8.2.1 Glassware	141
3.8.2.2 Preparation of dilution water	141
3.8.2.3 Inoculum	141
3.8.2.4 Test solution preparation	142
3.8.2.5 Test initiation	143
3.8.2.5.1 Multiwell plate experiments	143
3.8.2.5.2 Flask experiments	143
3.8.2.5.3 Cell density verification	145
3.8.2.5.4 Initial pH	145
3.8.2.6 Test incubation	145
3.8.2.7 Test termination	145
3.8.2.7.1 Growth measurements	145
3.8.2.7.2 Random cell counts	146
3.8.2.7.3 Test acceptability criteria	146
3.8.2.7.4 Final pH	146
3.8.3 Heavy metal analyses	146
3.8.3.1 Preparation of samples	146
3.8.3.1.1 Dilution technique	146
3.8.3.1.2 Heavy metal extraction	147
3.8.3.2 Preparation of standard solutions for ICP-AES analyses	147
3.8.3.3 Instrument operation and sample analyses	147
3.9 DATA ANALYSES	149
3.9.1 Range-finding tests	149
3.9.2 Definitive tests	149
3.9.2.1 Determination of NOEC and LOEC values	149
3.9.2.1.1 Statistical analyses	149
3.9.2.1.2 Interpreting the output	151
3.9.2.2 Determination of IC ₂₅ and IC ₅₀ values	151
3.9.2.2.1 Data analyses	152
3.9.2.2.2 Interpreting the output	152
3.10 REFERENCE TOXICANT CONTROL CHARTS	152
3.10.1 Introduction	152
3.10.2 Constructing the control chart	153

4. RESULTS

4.1 USE OF O.D. MEASUREMENTS TO DETERMINE CELL COUNTS	154
4.1.1 Correlation and regression between O.D. and cell counts	154
4.1.2 Correlation between O.D. and actual cell counts on random test samples	154
4.2 RANGE-FINDING TESTS	154
4.3 DEFINITIVE TESTS	156
4.3.1 Cadmium	156
4.3.2 Copper	156
4.3.3 Manganese	156
4.3.4 Arsenic	156
4.4 MULTIWELL EXPERIMENTS VS FLASK EXPERIMENTS	169
4.5 HEAVY METAL TOXICITY	169
4.5.1 Cadmium	169
4.5.1.1 Cadmium with EDTA	169
4.5.1.2 Cadmium without EDTA	172
4.5.2 Copper	172
4.5.2.1 Copper with EDTA	172
4.5.2.2 Copper without EDTA	172
4.5.3 Manganese	173
4.5.3.1 Manganese with EDTA	173
4.5.3.2 Manganese without EDTA	173
4.5.4 Arsenic	173
4.5.4.1 Arsenic with EDTA	173
4.5.4.2 Arsenic without EDTA	173
4.6 MICROALGAL SENSITIVITY AND TOLERANCE TO HEAVY METALS	174
4.6.1 Sensitivity to heavy metals in experiments with EDTA	174
4.6.2 Sensitivity to heavy metals in experiments without EDTA	174
4.7 REFERENCE TOXICANT (CADMIUM) CONTROL CHARTS	175
4.7.1 Cadmium with EDTA	175
4.7.1.1 <i>Chaetoceros calcitrans</i>	175
4.7.1.2 <i>Isochrysis galbana</i>	177
4.7.1.3 <i>Tetraselmis tetrahele</i>	177
4.7.1.4 <i>Tetraselmis</i> sp.	177

4.7.2 Cadmium without EDTA	177
4.7.2.1 <i>Chaetoceros calcitrans</i>	177
4.7.2.2 <i>Isochrysis galbana</i>	177
4.7.2.3 <i>Tetraselmis tetrahele</i>	180
4.7.2.4 <i>Tetraselmis</i> sp.	180
5. DISCUSSION	
5.1 THE RAPID METHOD OF TOXICITY TESTING	182
5.1.1 Measurements of growth : Use of O.D readings to determine cell counts	182
5.1.2 The multiwell plates as test vessels	183
5.2 HEAVY METAL TOXICITY	184
5.2.1 Comparative toxicity of heavy metals	186
5.2.2 Cadmium	188
5.2.3 Copper	190
5.2.4 Manganese	193
5.2.5 Arsenic	194
5.3 EFFECTS OF CHELATION	197
5.3.1 Cadmium	198
5.3.2 Copper	199
5.3.3 Manganese	201
5.3.4 Arsenic	202
5.4 SUITABILITY AS TEST ORGANISMS	203
5.5 RELEVANCE OF TOXICITY DATA TO THE MALAYSIAN MARINE WATER QUALITY STANDARDS	206
6. CONCLUSION	209
