ACKNOWLEDGEMENTS

This paper is written in partial fulfillment of the requirements for the Degree of Master of Business Administration, University Malaya. In the course of this study, I would like to express my appreciation to many people. Firstly, I would like to express my sincere thank to **Encik Mohd Khidzir Yusof** who is a helpful supervisor. I have greatly benefited under his supervision. Thank you for his valuable suggestion to this topic and his constant guidance that enable the completion of this paper.

Thank you very much to all my friends, colleagues and coursemates who helped me in many ways. Special thanks should be given to Mr. Leslie Ho, Mr. Khoo Kha Shin who spent their precious time in looking for respondents to answer the Survey Questionnaire. My SPSS statistical analysis would not be completed if no guidance and advice from Ms. Lua Yoke Ping, thank you very much. Finally, words alone cannot express the thanks I owe to Mr. Lu Wee Ann, my husband, for his encouragement and assistance.

Nevertheless, I would like to apologize for any shortcoming of this paper.

ABSTRACT

This study examines the relationship between Locus of Control and the intention of being an entrepreneur among Malaysian graduates. This study first investigate the effect of Locus of Control on the intention to become an entrepreneur among 100 of respondents, as measured by statistical testing on answered survey questionnaire. Further, this study extends the analysis by examining the relationship between ethnic group and the intention of being an entrepreneur among Malaysian graduates. The results showed no significant relationship between ethnic group and the intention of being an entrepreneur among Malaysian graduates. This study also examined the relation between gender and the intention of being an entrepreneur among Malaysian graduates. The result of this study shows a significant relationship between gender and the intention of being an entrepreneur. This study found that male Malaysian graduates have higher intention to become an entrepreneur as compared to female Malaysian graduates. Although this study did not further confirm the research studies by the previous researcher that Internal Locus of Control has positive effect on the intention of being an entrepreneur, it does provide a picture of the Locus of Control and the intention of being an entrepreneur among Malaysian graduates. To a great extent, our future economic well-being hinges on the quality of our entrepreneurs.

2.5.1	Locus of Control and Entrepreneur	23
2.5.2	Locus of Control and Malaysian Graduates	24

2.6	Intention From Entrepreneurial Perspective	25
2.7	Background of Malaysian Education and Graduates	27
2.8	Intention of Being an Entrepreneur among Malaysian Graduates	29

CHAPTER 3 RESEARCH METHODOLOGY

3.1	Research Hypotheses	31
3.2	Selections of Measures	33
3.2.1	Rotter's Internal-External Scale	34
3.2.2	Intention to become an Entrepreneur	35
3.2.3	Personal Demographic Profile	36
3.3	Sampling Design	37
3.4	Data Collection Procedure	38
3.4.1	Data Collection Techniques	38
3.5	Data Analysis Techniques	40

CHAPTER 4 RESEARCH RESULTS

4.1	Summary of Statistics	43
4.1.1	Respondents Demographic Profile	43
4.1.2	Summary of the Industry that the Respondents Currently been attached	46
4.1.3	Summary of the Industry that the Respondents Would like to be Involved	47
4.1.4	Summary of Reasons of Becoming an Entrepreneur Among Malaysian Graduates	49
4.2	Analysis of Frequency	51
4.2.1	Locus of Control	51
4.2.2	Locus of Control and Ethnic Group	51

4.2.3	Locus of Control and Gender	52
4.2.4	Intention of Being An Entrepreneur	53
4.3	Testing of Hypotheses	54
4.3.1	Hypotheses 1	54
4.3.2	Hypotheses 2	55
4.3.3	Hypotheses 3 – Intention and Ethnic Group	56
4.3.4	Hypotheses 4 – Intention and Gender	58
4.4	Summary of Research Results	60

CHAPTER 5 CONCLUSION AND RECOMMENDATIONS

5.1	Major Findings	61
5.2	Recommendations for Further Studies	62
