TABLE OF CONTENTS

ABSTRACT

CHAPTER 1: INTRODUCTION AND RESEARCH METHODOLOGY

1.1 Background	Page 1
1.2 Scope and Objective of the Study	Page 4
1.3 Research Methodology	Page 6
1.4 Terminology	Page 6

**CHAPTER 2: CURRENT STRUCTURE OF MALAYSIA ELECTRICITY SUPPLY
INDUSTRY**

2.1 Evolution of the Electricity Supply Industry	Page 9
2.2 Regulation Framework and Policy Formulation	Page 10
2.3 Current Electricity Supply Industry Structure	Page 13
2.3.1 Overview	Page 13
2.3.2 Generation Profile	Page 14
2.3.3 Transmission System	Page 15
2.3.4 Fuel Profile	Page 16

**CHAPTER 3: ASSESMENT OF ELECTRICITY SUPPLY INDUSTRY IN
MALAYSIA**

3.1 External Environment Analysis	Page 18
3.2 Segments in External Environment Analysis	Page 19
3.2.1 Global Segment	Page 19

3.2.2 Economic Segment	Page 20
3.2.2.1 Infrastructure and risk Costs	Page 20
3.2.2.2 Economic Co-operation among ASEAN Countries	Page 21
3.2.2.3 Fuel for Electricity Generation	Page 21
3.2.3 Political/Legal Segment	Page 22
3.2.3.1 Existing Industry Structure	Page 22
3.2.3.2 Privatization of Power Generation in Malaysia	Page 23
3.2.4 Technology Segment	Page 23
3.2.4.1 Renewable Sources of Energy	Page 24
3.2.4.2 Improves Customer services	Page 24
3.2.4.3 Threats in Technological Segments	Page 25
3.2.5 Environmental Segment	Page 25
3.2.5.1 Pollution and Loss of Ecosystem	Page 26
3.2.5.2 Electromagnetic Forces and Health	Page 27
3.2.5.3 Threats in environmental Segments	Page 27
3.3 Opportunities	Page 28
3.3.1 Competitive Power Market	Page 28
3.3.2 Export Opportunities	Page 28
3.4 Threats	Page 29
3.4.1 Non Competitive Electricity Tariff	Page 29
3.4.2 High selling Price of electricity frpm IPPs	Page 29
3.4.3 IPP Contract Awarded Through Political Connection	Page 29
3.4.4 Lack of Comprehensive and Well Defined Regulatory Frameworks	Page 30
3.4.5 Project Financing	Page 31

CHAPTER 4: OBJECTIVES AND CURRENT PROGRESS OF RESTRUCTURING AND POWER POOLING IN MALAYSIA

4.1 Overview	Page 32
4.2 Objectives of Restructuring	Page 33
4.2.1 <i>Emphasis on Customer Needs</i>	Page 34
4.2.1.1 <i>Need for Low Price</i>	Page 34
4.2.1.2 <i>Need for Reliability</i>	Page 35
4.2.1.3 <i>Need for Customer Services</i>	Page 35
4.2.2 <i>Transparency in the Electricity Supply Industry</i>	Page 36
4.2.3 <i>Effective Competition in Wholesale and Retail Power Market</i>	Page 36
4.2.4 <i>Achieving Technical and Financial Resources Efficiency</i>	Page 37
4.2.5 <i>Low Entry Barrier or Non Discriminatory Access to the Pool</i>	Page 37
4.3 Current Status of Power Pooling in Malaysia	Page 38
4.3.1 <i>Overview</i>	Page 38
4.3.2 <i>Pooling Doubts in Malaysia</i>	Page 39
4.4 Reasons behind TNB's Decision Against Power Pooling	Page 40
4.5 TNB's Dilemma at Existing PPA	Page 42
4.6 TNB's Proposals in New Structuring Program	Page 43
4.7 Comments on TNB's Decision to withhold Power Pooling	Page 43
4.8 Recommendation for "Strategies to Achieve Technical and Financial Efficiencies through a Successful Restructuring Plan."	Page 44
4.8.1 <i>Implementation of Fair and Transparent Bidding Procedures</i>	Page 45
4.8.2 <i>Well Established Threshold Regulatory Framework</i>	Page 45
4.8.3 <i>Changes in Policy Status</i>	Page 46
4.8.4 <i>Conducting of Fair Negotiation</i>	Page 47
4.8.5 <i>Avoided Cost Vs Cost Plus</i>	Page 48

4.8.6 <i>Create a Diversified Private Program</i>	Page 48
4.8.7 <i>Implement Projects Systematically</i>	Page 49

CHAPTER 5: ELECTRICITY REFORM IN OTHER COUNTRIES

5.1 Introduction	Page 50
5.2 Electricity Restructuring and Privatisation in the UK	Page 51
5.3 Results of the Reform in UK	Page 52
5.4 Electricity Restructuring and Privatisation in Australia	Page 53
5.5 The Victoria Model	Page 55
5.6 Results of the Reform in Victoria	Page 56
5.7 A review of the Deregulation in the Electric Power Industry of the ASEAN Member Countries	Page 57
5.7.1 <i>Brunei</i>	Page 57
5.7.2 <i>Cambodia</i>	Page 58
5.7.3 <i>Indonesia</i>	Page 58
5.7.4 <i>Lao PDR and Myanmar</i>	Page 59
5.7.5 <i>Philippines</i>	Page 59
5.7.6 <i>Singapore</i>	Page 60
5.7.7 <i>Thailand</i>	Page 61
5.7.8 <i>Vietnam</i>	Page 62
5.8 Summary	Page 62

CHAPTER 6: LESSONS LEARN FROM CALIFORNIA POWER CRISIS

6.1 Overview	Page 64
6.2 California Power Crisis	Page 65
6.2.1 Introduction	Page 65
6.2.2 Chronology Events	Page 66
6.3 California Reform and its Failure	Page 67
6.3.1 Objective of Reform	Page 67

6.3.2 Pre-Reform Electric Industry	Page 68
6.3.3 Reformed Electric Industry with its Power Pool Model	Page 68
6.4 Consequence of California Power Crisis	Page 69
6.5 Shortfalls in Reformed Electricity that led to Crisis	Page 72
6.5.1 <i>Shortage of Power Supply</i>	Page 72
6.5.1.1 <i>Lack of Economic Incentives and Planning for Adequate and Reliable Power Supply</i>	Page 72
6.5.1.2 <i>Dry Weather</i>	Page 73
6.5.1.3 <i>Unjustified Maintenance of Power Plants</i>	Page 73
6.5.2 <i>Market Design Flaws</i>	Page 73
6.5.2.1 <i>Market Governance</i>	Page 73
6.5.2.2 <i>Wholesale Price higher than Retail Rates</i>	Page 74
6.5.2.3 <i>Lack of Risk Management for Utilities</i>	Page 74
6.5.2.4 <i>Implementation of Soft Price Caps on Bids</i>	Page 74
6.5.2.5 <i>Exploitation of Market Power by Generators</i>	Page 75
6.5.2.6 <i>Market Arbitrage by Utilities</i>	Page 75
6.5.2.7 <i>Failure in Full Retail Competition – High Switching Price</i>	Page 76
6.5.2.8 <i>Constraints on Expanding Supply</i>	Page 76
6.5.2.9 <i>Inaccuracy in Anticipation of Demand and Supply</i>	Page 76
6.5.2.10 <i>Strict Environment and Nox Emission Regulations</i>	Page 77
6.5.2.11 <i>Loop Hole in Regulation on Utilities Exodus Fund</i>	Page 77
6.6 Summary	Page 78

CHAPTER 7: POWER POOL STRUCTURES

7.1 Introduction	Page 79
7.2 Pool Models	Page 80
7.2.1 <i>The Gross Pool</i>	Page 80
7.2.2 <i>The Net Pool – Bilateral Trading</i>	Page 85
7.2.3 <i>The Single Buyer Model</i>	Page 87
7.2.4 <i>The Zonal Pool Model</i>	Page 89

7.2.5 <i>The Mixed Generation Model</i>	Page 90
7.2.6 <i>The State Utility Model</i>	Page 90
7.3 Market Comparisons	Page 91

CHAPTER 8: CHOICE OF ELECTRICITY MARKET MODEL FOR MALAYSIA

8.1 Fundamental requirements for an Effective Competition Electricity Market	Page 93
8.1.1 Market Design should Promote Effective Competition and Economic Efficiency	Page 94
8.1.2 Market Design should support both Provider and Consumer Choice in regard to the Supply and Purchase of Electricity	Page 95
8.1.3 Basic Market Design Establish a level Playing Field for Competition	Page 95
8.2 Basic Issues related to the Market Design, setting up of an Independent Regulator – ISO and IMO	Page 96
8.2.1 Governance Structure of Independent Regulator	Page 98
8.2.1.1 <i>Expanded Club Approach</i>	Page 99
8.2.1.2 <i>Independent Contractor subject to Performance Base Regulation Approach</i>	Page 99
8.2.1.3 <i>The Hybrid Approach</i>	Page 100
8.2.1.4 <i>The Public Authority Approach</i>	Page 100
8.3 Market Power Mitigation	Page 100
8.4 The Wholesale Market Design	Page 102
8.5 Regulating Electricity Transmission	Page 104
8.6 Retail Competition	Page 105

9: Risk Management – New Business Strategies in Energy Trading

9.1 Overview	Page 106
9.2 Derivative and Trading Products	Page 106
9.3 Capacity Prices in a Competitive Market	Page 107
9.3.1 <i>Market Value of Capacity as per “Call” Option</i>	Page 108
9.3.2 <i>Summary</i>	Page 115
9.4 Risk Management and Competitive Advantage in Open Power Markets	Page 116
9.4.1 <i>Introduction</i>	Page 116
9.4.2 <i>Risk Based Valuation</i>	Page 117
9.4.3 <i>Risk Capital Management</i>	Page 119
9.4.4 <i>Modern Risk Management Approach</i>	Page 122
9.4.5 <i>Summary</i>	Page 125
9.5 Right Tools in Risk Management	Page 125
9.5.1 <i>Software</i>	Page 125
9.5.2 <i>Complete Matrix of Real Options</i>	Page 126
9.5.3 <i>Diversification and Hedging of Real Options</i>	Page 126
9.5.4 <i>Credit Derivatives</i>	Page 127
9.5.5 <i>Credit Default Swaps and Bankruptcy Swaps</i>	Page 128
9.5.6 <i>Insurance – Alternative Risk Management Tool</i>	Page 129
9.5.7 <i>Outsourcing</i>	Page 130
9.5.8 <i>Summary</i>	Page 131

10. CONCLUSIONS Page 132
