

ACKNOWLEDGEMENTS

Firstly, I am eternally grateful to my miracle-working God for being with me and providing me with help in the form of individuals and favourable situations. He has been my continual strength and hope throughout the process of producing this Project Paper.

I am greatly indebted to my supervisor, Associate Professor Dr. Kuldip Kaur, for her insightful comments and unflagging enthusiasm. Without her, this study will not have come to being. Truly she has been a great source of knowledge and encouragement to me.

Another word of thanks also goes to Tunku Abdul Rahman College for the financial assistance in undertaking this course and permitting me to conduct this study. Without the full support of my colleagues and my students from the Diploma in Information Systems Year 2 (1999/00) and Diploma in Chemistry and Biology Year 2 (2000/01), this study would not have been made possible.

I would like to express my special thanks to my mother, Selina, and my brothers, Chris and Victor. Thank you for your love, prayers, emotional support and computer skills throughout the duration of my studies.

Last but not least, I would like to express my appreciation to my supportive friends and coursemates, especially Cecilia, Mei Fung, Adeline, Law and Mandy.
