## **ACKNOWLEDGEMENTS**

First and foremost, I wish to express my most sincere gratitude to my supervisor, Professor Dr. G. Sivalingam for his helpful comments, and valuable guidance that enabled me to complete this study successfully.

My appreciation also goes to the staff of Bank Negara Malaysia, Faculty of Business and Accountancy at University of Malaya, Institute of Bankers Malaysia and the South East Asian Central Banks (SEACEN) Research and Training Centre for allowing me to access to their libraries.

I would also like to thank Evelyn Shyamala for editing this research work with great patience and skill.

Last but not least, my deepest sincere gratitude is also extended to my parents, brothers and sister who have been very supportive throughout the study of my MBA programme.

## ABSTRACT

Banking institutions play a substantial role, especially in a developing country like Malaysia, in mobilising savings and channelling these resources for economic development. The growth of the banking institutions over the past two decades was achieved through the rapid build-up of an extensive branch network, the widening of banking services and the acceleration of credit activities. The focus of this paper is to evaluate the relative performance of banking institutions in Malaysia during the 1990-1998 period, using the CAMEL rating framework. The banking institutions included in this study are the major groups of banking institutions operating in Malaysia, namely commercial banks, finance companies and merchant banks. The acronym "CAMEL", is taken from the key components of the safety and soundness banking examination process: **C**apital Adequacy, **A**sset Quality, **M**anagement Competency, **E**arnings Performance and **L**iquidity Position. The ultimate aim of using the CAMEL analysis is to evaluate the type and severity of problems that commercial banks, finance companies and merchant banks experience at a particular time, and to suggest the necessary supervisory response. Suggestions are made based on the findings.
