1 INTRODUCTION	1-7
2 LITERATURE REVIEW	8
2.1 Surfactants	8
2.1.1 Classification of surfactants	9-10
2.2 Detergents	10-11
2.2.1 Soaps or soapy detergents	11-12
2.2.2 Soapless detergents	12
2.3 A Comparison Of Cleaning Efficiency Between Soap And Soapless Detergents	13-14
2.4 Alkylbenzene Sulphonates	14-17
2.5 Biodegradation Of Xenobiotic Compounds	17-18
2.5.1 Factors influencing biodegradation of xenobiotic compounds	19-21
2.6 Metabolism Of Xenobiotic Compounds	22-25
2.7 Problems In Biodegradation Of Alkylbenzene Sulphonates	25-26
2.7.1 Alkyl chain metabolism	26-29
2.7.2 Metabolism of sulphonate groups	29-31
2.7.3 The benzene ring metabolism	31-33
2.8 Acclimatization During Surfactant Biodegradation	34-40
2.9 Microbiology Of Surfactant Biodegradation	41
2.10 Environmental Effects Of Detergents Containing Alkylbenzene Sulphonates	42-47
2.11 Methods Of Treatment Of Detergent Wastewater	48-49
2.11.1 Foaming treatment of detergent wastewater	49-51
2.11.2 Activated carbon use in the treatment of detergent wastewater	51
2.11.3 Chemical coagulation and flocculation of detergent wastewater	52-53
2.11.4 Anaerobic treatment of detergent wastewater	53-54

2.11.5	Aerobic treatment of detergent wastewater	54
2.11.5.1	Trickling filter	55-56
2.11.5.2	Activated sludge treatment	56-57
2.11.5.3	Activated sludge process and its modifications	58
2.11.5.4	Factors affecting the activated sludge process	59-65
2.11.6	Aeration in the presence of surfactants	66-69
2.11.7	Effect of branched alkylbenzene sulphonates on the activated sludge process	69-71
2.12	Biological Reaction Kinetics	71
2.12.1	Kinetics of waste utilization	72-74
2.12.2	Monod kinetics and a steady state mathematical model to describe a completely mixed activated sludge process with sludge recycle	75-81

3 MATERIALS AND METHODS

3.1	General	82
3.2	Sample Collection And Preservation	82
3.3	Physical And Chemical Determination	83
3.4	Physical Examination	83
3.4.1	Mixed liquor suspended solids	83
3.4.2	Mixed liquor volatile suspended solids	84
3.4.3	Oxygen transfer in distilled-deionized water and in physical-chemical treated detergent wastewater.	84-85
3.4.4	Sludge volume index	85
3.4.5	pH value	86
3.5	Chemical Examination	86
3.5.1	Nitrogen	86
3.5.2	Phosphorous	86-89
3.5.3	Dissolved oxygen	89
3.5.4	Biochemical oxygen demand	89-90
3.5.5	Chemical oxygen demand	90
3.5.6	Methylene blue active substances	90-93
3.6	Microbiological Examination Of The Activated Sludge System	94
3.6.1	Media	94-98
3.7	Determination Of Inoculum Type And Concentration For The Biodegradation Of Detergent Wastewater	98-99

3.8	Isolation And Identification Of Microorganisms In The Activated Sludge Tank	99-100
3.9	Sampling	101
3.10	Isolation	101-102
3.11	Identification	102-111
3.12	Microscopy	112
3.13	Respirometric Studies	112-113
	3.13.1 Preparation of pure and mixed cultures for respirometric studies	113
	3.13.2 Foaming	113-114
3.14	Effect Of Calcium Hydroxide And Aluminium Sulphate At A 2:1 Ratio On Oxygen Uptake By A Microbial Culture	114-115
3.15	Wastewater Comparison And Feed To The Activated Sludge Systems	115-116
3.16	The Laboratory Activated Sludge Units	116-119
3.17	Acclimatization Of A Microbial Culture To The Treatment Of Detergent Wastewater	119-120
3.18	Optimization Of The Activated Sludge System Treating Detergent Wastewater To A HRT Of 1 Day	120-121
3.19	Steady State Operation Of The Activated Sludge System Treating Detergent Wastewater At A 1 Day HRT	121-123
3.20	Sampling And Analysis	123
3.21	Evaluation Of Biokinetic Coefficients	124-125
3.22	Determination Of Kinetic Model Parameters	125
	3.22.1 Solids retention time (SRT/θ_c)	125
	3.22.2 Hydraulic retention time (HRT/θ)	126
	3.22.3 Microorganism concentration (X or X_r)	126
	3.22.4 Substrate concentration (S_0 or S)	126

4 RESULTS

- | | | |
|-------|---|---------|
| 4.1 | Inoculum Type And Its Efficiency In The Biodegradation Of Raw Detergent Wastewater | 127-134 |
| 4.2 | Inoculum Type And Its Efficiency In The Biodegradation Of Treated Detergent Wastewater | 135-143 |
| 4.3 | Isolation And Identification Of Acclimatized Microorganisms from Activated Sludge Tanks Operating At Steady State In The Presence Of The Treated Detergent Wastewater | 143 |
| 4.3.1 | First stage screening | 143-146 |
| 4.3.2 | Second stage screening | 147-167 |
| 4.4 | Biodegradation Of The Treated Detergent Wastewater By Pure Culture Microorganisms Isolated From The Activated Sludge Tanks | 168-175 |
| 4.5 | Biodegradation Of The Raw And Treated Detergent Wastewater By Mixed Microbial Cultures Obtained From An Activated Sludge System Treating Detergent Wastewater | 175-188 |
| 4.6 | Biodegradation Of A Pure ABS Solution By Pure And Mixed Cultures Of Bacteria | 188-193 |
| 4.7 | Effect Of MBAS Concentrations On Oxygen Uptake By A Mixed Microbial Culture | 194-197 |
| 4.8 | Effect Of Various Concentrations Of Calcium Hydroxide And Aluminium Sulphate At A 2:1 Ratio On Oxygen Uptake By A Mixed Microbial Culture From An Activated Sludge System Treating Detergent Wastewater | 197-199 |
| 4.9 | Effect Of Nutrient Addition On The Activated Sludge System Treating Detergent Wastewater | 200-206 |
| 4.10 | Effect Of HRT On The Treatment Of Treated Detergent Wastewater In An Activated Sludge System Without Recycle | 207-211 |
| 4.11 | Treatment Of Treated Detergent Wastewater Using 3 Completely Stirred Tank Reactors (CSTR) In Series | 212-222 |
| 4.12 | Evaluation Of Biokinetic Coefficients Of An Activated Sludge System With Recycle Treating Detergent Wastewater | 222-228 |

4.13	Oxygen Transfer Coefficients At Various Air And Pure Oxygen Flow Rates In Treated Detergent Wastewater At Different Concentrations	229
4.13.1	Effect of air flow rates on oxygen transfer coefficients in detergent wastewater	229-233
4.13.2	Effect of pure oxygen flow rates on oxygen transfer coefficients in detergent wastewater	233-237

5 DISCUSSION

5.1	Inocula Types And Their Efficiencies In The Biodegradation Of Detergent Wastewater	238
5.1.1	Efficiency of sewage inocula compared to soil inocula	238-239
5.1.2	Acclimatization of the sewage and soil inocula to raw and treated detergent wastewaters	239-240
5.1.3	Effect of different concentrations of sewage inocula	240-242
5.1.4	Effect of different concentrations of soil inocula	242
5.2	Isolation And Identification Of Microorganisms	243-244
5.3	Biodegradation Of Detergent Wastewater And A Pure Alkylbenzene Sulphonate Solution By Pure And Mixed Cultures	244
5.3.1	Biodegradation of treated wastewater by pure cultures	244-245
5.3.2	Biodegradation of treated and raw detergent wastewaters by mixed cultures	245-247
5.3.3	Biodegradation of a pure ABS solution using pure and mixed cultures	247-248
5.4	Effect Of Calcium Hydroxide And Aluminium Sulphate On Oxygen Uptake Of A Mixed Microbial Culture	248-249
5.5	Nutrient Addition To The Activated Sludge System	249
5.6	Activated Sludge System Without Recycle At Various HRT	250-252
5.7	Treatment Of Treated Detergent Wastewater Using 3 CSTR In Series	252-256
5.8	Biokinetic Coefficients Of An Activated Sludge System With Recycle	256-259

5.9	Oxygen Transfer Coefficients In Detergent Wastewater	260
5.9.1	Oxygen transfer coefficients at various air flow rates	260-262
5.9.2	Oxygen transfer coefficients at various pure oxygen flow rates	263-264
