## ACKNOWLEDGEMENT

To Associate Professor Tey Nai Peng, my deepest gratitude for his excellent guidance towards the completion of this research paper. I am thankful to benefit from his valuable suggestions and deep experience.

The National Population and Family Development Board, Kuala Lumpur for permission to use and analyze the 1994/95 MPFS data. To all staff at the National Population and Family Development Board, I would like to thank you for your assistance.

Yong, for excellent programming assistance in computing various fertility measures from the data. Wai Cheng, and all colleagues at Incenplus for continuous encouragement and granting me the time and space to work on this paper.

Dad, Mum, Kok Ching, and Mei Gyn, my thanks and deepest appreciation for your unremitting support, love and friendship.
