	Abstract		ii
	List of symbols		iii
	List of figures		v
Chapter 1	1.0 Introduction		1
	1.1 Sheet metal forming		1
	1.2 Objective of study		2
	1.3 Methodology		3
	1.4 Part print of cup		5
Chapter 2	2.0 Literature survey		8
	2.1 Introduction		8
	2.2 Design rules for drawings		8
	2.3 Friction in drawing process		12
	2.4 Formability in drawing process		15
	2.5 FEM in simplification and optimization of draw tool design		19
	2.6 Mechanical properties of sheet metal		20
Chapter 3	3.0 Analysis on cup drawing		22
	3.1 Drawing process		22
	3.1.1 Bending		23
	3.1.2 Straightening		25
	3.1.3 Friction		26
	3.1.4 Compression		28
	3.1.5 Tension		31
	3.2 Blank development		32
	3.2.1 Introduction		32
	3.2.2 Trim allowance		33
	3.3 Draw and redraw design calculations		35
	3.3.1 Introduction		35
	3.3.2 Thickness to diameter ratio		35
Chapter 4	4.0 Finite element method		41
	4.1 Introduction		41
	4.2 Process of discretization		41
	4.3 Cause and effect		44
	4.1 Introduction		41
	4.2 Process of discretization		41
	4.3 Cause and effect		44
Chapter 5	5.0 Design and analysis of draw punch		57
	5.1 Introduction		57
	5.2 Percentage of reduction		57
	5.3 Draw operation calculation		59
	5.3.1 First redraw calculation		63
	5.3.2 Second redraw calculation		65

Contents			Page
Chapter 5	5.3.3	Third redraw calculation	67
	5.4	Mathematical analysis of die components	68
	5.4.1	Introduction	68
	5.4.2	Punch force	68
	5.4.3	Blankholder force	70
	5.4.4	Blankholder thickness	70
	5.4.5	Clearance	73
	5.4.6	Punch height	74
	5.4.7	Die height	74
	5.4.8	Die shut height	75
	5.4.9	Press stroke	76
	5.4.10	Vector force analysis	76
	5.5	Solid modeling CAD - Pro Engineer	78
	5.6	Static analysis - Finite element method	83
	5.6.1	Introduction	83
	5.6.2	Stress	83
	5.6.3	Strain	85
	5.6.4	Relationship between stress and strain	86
	5.6.5	Proportional limit and ultimate strength	87
	5.6.6	Working stress	89
	5.6.7	FEM analysis - MSC Nastran	90
	5.7	Dynamic analysis - Finite element method	99
	5.7.1	Introduction	99
	5.7.2	Characteristics of a dynamic problem	99
	5.7.3	Formulations of equations of motions	100
Chapter 6	6.0	Results and discussions	107
	6.1	Static analysis	107
	6.1.1	Relationship between force and deformation	107
	6.1.2	Failure theories	112
	6.1.3	Error	123
	6.2	Dynamic analysis	126
	6.2.1	Fatigue failure	126
	6.2.2	Free vibration analysis	131
	6.2.3	Response to harmonic loading	131
	6.2.4	Pro Mechanica time response analysis	132
Chapter 7	7.0	Conclusions and recommendations	137
	7.1	Conclusions	137
	7.2	Recommendations	138
		Reference Books/Manuals	139
		Appendix A	
		Appendix B
