CHAPTER 1	INTRODUCTION	
1.1	Nonlinear Optical Materials	1
	1.1.1 Background	1
	1.1.2 Experimental Developments and Applications	3
1.2	Beta Barium Borate	4
1.3	Contents	5
References to Chapter 1		7
CHAPTER 2	NONLINEAR OPTICS THEORY	
2.1	Three-Wave Interactions	9
2.2	Phase Matching	10
2.3	Optics of Uniaxial Crystals	11
2.4	Optical Parametric Process	12
	2.4.1 Parametric Oscillator Tuning	12
	2.4.2 Optical Parametric Gain	13
	2.4.3 Threshold	14
	2.4.4 Pump Characteristics	15
2.5	Calculation of Phase Matching Angles	15
2.6	Discussion	20
Appendix 2A	Computation of Phase Matching Angles in BBO	21
References to Chapter 2		23

CHAPTER 3	SECOND HARMONIC GENERATION	
3.1	Review of SHG in Nonlinear Crystals	25
	3.1.1 SHG Phase Matching	26
	3.1.2 Output Efficiency	26
3.2	Experimentation	27
3.3	Results and Discussion	32
	References to Chapter 3	45
CHAPTER 4	532nm PUMPED BBO OPO	
4.1	Straight Cavity Pumping	48
	4.1.1 Experimental Arrangement	48
	4.1.2 Results and Discussion	53
4.2	Parametric Oscillator with Pump Reflection	61
	4.2.1 Experimental Setup	61
	4.2.2 Results and Discussion	63
4.3	OPO Design with Intracavity Pump	
	Steering Mirror	68
	4.3.1 Cavity Configuration	68
	4.3.2 Experimental Results	71
	References to Chapter 4	74

CHAPTER 5	FOURTH HARMONIC GENERATION	
5.1	Generation of 266nm Radiation in BBO	76
	5.1.1 Experimental Setup	76
	5.1.2 Results and Observations	77
5.2	Fourth Harmonic Generation in KD*P	82
	5.2.1 Experiment and Results	82
	5.2.2 Discussion	88
	References to Chapter 5	92
CHAPTER 6	266nm PUMPED BBO OPO	
6.1	Experimental Setup	94
6.2	Experimental Results and Discussion	97
	References to Chapter 6	102
CHAPTER 7	CONCLUSION	
7.1	Further Research	104
	References to Chapter 7	107
CHAPTER 8	PERSONAL PUBLICATIONS, SEMINAR AND CONFERENCE PRESENTATIONS	109
