Abstract		ii
Abstrak		iii
Introduction		iv
Chapter 1	**Introduction and Preliminaries**	
1.1	Introduction	1
1.2	Nil, nilpotent, idempotent and annihilator	2
1.3	Artinian rings	3
1.4	Prime and Jacobson radicals	4
1.5	Some basic results on group rings	4
Chapter 2	**An overview of "regular" rings**	
2.1	Introduction	7
2.2	Some relations between various "regular" rings	7
2.3	Some equivalent conditions	17
2.4	On matrix rings over "regular" rings	20

Chapter 3 **On strongly π-regular rings**

3.1 Introduction 24

3.2 Some properties of strongly π-regular rings 25

3.3 Some equivalent conditions for strongly π-regular rings 33

3.4 Strongly π-regular rings with central idempotents 37

3.5 Strongly π-regular group rings 41

3.6 Euler and exact-Euler rings 46

Chapter 4 **On strongly regular rings**

4.1 Introduction 50

4.2 Some properties of strongly regular rings 50

4.3 Some equivalent conditions for strongly regular rings 52

4.4 Strongly regular group rings 59

Chapter 5 **(s,2)-rings and rings with stable range one**

5.1 Introduction 61

5.2 On (s,2)-rings 61

5.3 Rings with stable range one 66
