

ACKNOWLEDGMENTS

I would like to express my thanks to my advisor Prof Dr. Yusoff Mohd Amin who provided me with encouragement, guidance and support throughout my research. I would also like to show my gratitude to my co-supervisor Associate Prof. Dr. Roslan Md Nor for his continuous assistance. It is a pleasure to thank The University of Malaya who financially supported my project and would like to extend my thanks to the Physics Department particularly to En. Azman Mat Nor, En. Mohammed Aruf and En. Shahril Bahruddinn who have made available their support in the practical field without which, this dissertation would not have been possible.

Additionally, I owe my deepest gratitude to the Ministry of Education in The Sultanate of Oman to give me this great opportunity to complete my higher degree studies. I would also like to express my sincere thanks to Laila Ahmed Al-Najar, the Director General of Batinah South Educational Region.

Furthermore, I offer my regards and blessings to Adel AL-Mosoqri, Principal of Nasir bin Murshid Secondary School, my uncle Mohamed AL-Hinai and his wife Huda AL-Jasani, my parents, brothers and sister who offered me with any kind of support during the completion of my project and lastly to my wife for her love and encouragement throughout my studies.
