ABSTRACT

The National Development Policy has successfully achieved their objectives to increase the number of Bumiputera companies that can play an important role in the economy. The number of Bumiputera-controlled companies has increased during the booming period (1995-1996). During this period, many Bumiputera individuals showed their capabilities to handle mega projects in Malaysia. In order to achieve the NDP objectives, many Bumiputera companies stick together and listed in the KLSE.

However the Asian countries were hit by currency crisis in the middle of 1997. For almost two and half years, Malaysia experienced a turbulent economy caused by currency crisis. In order to see any impact caused by the currency crisis, the study examined listed Bumiputera companies performance due to the currency crisis. This study examined twenty-nine Bumiputera companies and twenty-nine non-Bumiputera companies. This study found those Bumiputera-controlled companies and non-Bumiputera companies were affected by the crisis. Both groups reported significance different for performance " before the crisis" period and "during the crisis" period. The study also reported that, the average stock returns for both groups were negative due to the crisis. The study found that there was no difference in performance between the high and low leverage groups of Bumiputera-controlled companies. The study also found that the Bumiputera companies tend to react faster than the non-Bumiputera companies if market was affected by any event.

ACKNOWLEDGEMENTS

In the name of Allah S.W.T that is most merciful and beneficent. First of all, I would like to express my gratitude to my beloved supervisor, Associate Professor Dr. M. Fazilah Abdul Samad for her supervision, encouragement and tolerance. I also want to express my appreciation to my Head Department in International Islamic University Malaysia, Dr. Ahamed Kameel for his motivation and guidance.

This study also could not have been completed without the help of a number of people to whom I am deeply indebted. I would like to express my appreciation especially to the computer lab staff in Kulliyah of Economics and Management Sciences, IIUM. Thank you for giving me valuable knowledge on how to fully used the technology in order to retrieve data. I also owed this appreciation to my family especially my parents and my sisters' Sakinah and Afifah for their support during my hard time.

May Allah S.W.T reward them all and keep us within the boundaries of His Divine Guidance and Mercy.

TABLE OF CONTENTS

	PAGE
ABSTRACT.....	ii
ACKNOWLEDGEMENTS.....	iii
TABLE OF CONTENTS.....	iv-v
LIST OF TABLES.....	vi-vii
CHAPTER 1: INTRODUCTION	
1.1 Currency Crisis	2-3
1.2 Objectives of Study.....	3-4
1.3 Contribution.....	4-5
1.4 Organisation of Chapters.....	5
