LIST OF TABLES	viii	
LIST OF FIGURES	xii	
LIST OF PLATES	xiv	
LIST OF APPENDICES	xvii	
ABSTRACT	xviii	
Chapter One	INTRODUCTION	1
Chapter Two	LITERATURE REVIEW	7
2.1.	Goats	7
2.1.1.	Origin, Ancestry and Development	7
2.1.2.	Indigenous Goat Breed of Southeast Asia	10
2.2.	Conservation and Utilization of Animal Genetic Resources	14
2.2.1.	Indiscriminate Crossbreeding	17
2.2.2.	Traditional Husbandry Systems	17
2.2.3.	Evaluation of the Animals	18
2.2.4.	The Use of Gene Frequency	19
2.2.5.	Estimation of Genetic Relationship	21
2.2.5.1.	Genetic Distance	21
2.2.5.2.	Phylogeny	23
2.2.6.	Prospects of Evaluation	23

	Page	
2.3.	Electrophoresis	25
2.3.1.	Starch Gel Electrophoresis	27
2.3.2.	Cellulose Acetate Electrophoresis	28
2.4.	Biochemical Polymorphism Studies in Goats	29
2.4.1.	Early Studies on Polymorphic Markers	30
2.4.2.	Milk Protein Polymorphism	52
2.4.3.	Genetic Distance Estimates	53
Chapter Three	MATERIAL AND METHOD	56
3.1.	Animals	56
3.2.	Blood Samples	56
3.3.	Preparation of Homogenates	59
3.4.	Electrophoresis	59
3.4.1.	Cellulose Acetate Electrophoresis	61
3.4.1.1.	Pre-Loading	61
3.4.1.2.	Loading	63
3.4.1.3.	The Electrophoretic Run	69
3.4.2.	Preparation of the Gel Mould for Starch Gel Electrophoresis	72
3.4.2.1.	Preparation of Starch Gel	72
3.4.2.2.	Sample Application	73
3.4.2.3.	The Electrophoretic Run	73
3.4.3.	Temperature of the Electrophoretic Run	74
3.5.	Genetic Markers Investigated	74
3.6.	Buffers and Staining	79

	Page	
3.7. The use of Kodak Photo-Flo Solution	79	
3.8. Guidelines used for Electrophoretic Analysis and Naming of the Electromorphs	80	
3.9. Family Analysis	82	
3.10. Analysis of Electrophoretic Data	82	
3.10.1. Calculation of Allele Frequencies	82	
3.10.2. Calculation of Expected Genotypes	83	
3.10.3. Estimation of Heterozygosity	84	
3.10.4. Levene's Correction for Small Sample Size.	84	
3.10.5. Chi-Square Test for Hardy-Weinberg Equilibrium	84	
3.10.6. Estimation of F-Statistics	85	
3.10.7. Calculation of Genetic Variability	86	
3.10.8. Genetic Identity and Genetic Distance	87	
3.10.8.1. Genetic Identity	87	
3.10.8.2. Genetic Distance	88	
3.10.9. Statistical Analysis Using BIOSYS-1	88	
Chapter Four	RESULTS	89
4.1. Pedigree Studies for the Polymorphic Loci	89	
4.2. Gene Frequencies	89	
4.2.1. Albumins	90	
4.2.2. Amylase	90	
4.2.3. Alkaline Phosphatase	103	

	Page	
4.2.4.	Carbonic Anhydrase	103
4.2.5.	Haemoglobin	108
4.2.6.	Malic Enzyme	108
4.2.7.	Malate Dehydrogenase	109
4.2.8.	Purine Nucleoside Phosphorylase	115
4.2.9.	NADH-Diaphorase	119
4.2.9.1.	NADH-Diaphorase 1 zone 1 (Dia-1)	119
4.2.9.2.	NADH-Diaphorase 1 zone 2 (Dia-2)	120
4.2.10.	Transferrin	125
4.2.11.	X-Protein	126
4.3.	Null and Rare Alleles	152
4.4.	Genetic Variability	154
4.5.	Deviation from Hardy-Weingberg Proportion	157
4.5.1.	MARDI / IPSR	157
4.5.2.	SABAH	157
4.5.3.	SARAWAK	157
4.5.4.	BOGOR	158
4.5.5.	UJUNG PADANG	158
4.5.6.	MEDAN	158
4.5.7.	MUSUAN	158
4.5.8.	CHENGMAI	159
4.5.9.	HAT YAI	159

	Page	
4.5.10.	HAMBANTOTA	159
4.5.11.	WEERAWILLA	159
4.5.12.	THAMBUTHEGAMA	160
4.5.13.	NEW SOUTH WALES	160
4.6.	Contingency Chi-Square Test	165
4.6.1.	Albumins	165
4.6.2..	Amylase	165
4.6.3.	Alkaline Phosphatase	165
4.6.4.	Carbonic Anhydrase	166
4.6.5.	Haemoglobin	166
4.6.6.	Malic Enzyme	166
4.6.7.	Malate Dehydrogenase	167
4.6.8.	Purine Nucleoside Phosphorylase	167
4.6.9.	NADH-Diaphorase 1 zone 1 (Dia-1)	167
4.6.10.	NADH-Diaphorase 1 zone 2 (Dia-2)	168
4.6.11.	Transferrin	168
4.6.12.	X-Protein	168
4.7.	Estimation of Fixation Indices	171
4.8.	Genetic Distance	172

	Page	
Chapter Five	DISCUSSION	178
5.1.	Albumins	178
5.2..	Amylase	184
5.3.	Alkaline Phosphatase	188
5.4.	Carbonic Anhydrase	191
5.5.	Haemoglobin	194
5.6.	Malic Enzyme	199
5.7.	Malate Dehydrogenase	201
5.8.	Purine Nucleoside Phosphorylase	204
5.9.	NADH-Diaphorase 1 zone 1 (Dia-1)	207
5.10.	NADH-Diaphorase 1 zone 2 (Dia-2)	210
5.11.	Transferrin	213
5.12.	X-Protein	221
5.13.	Monomorphic Loci	225
5.14.	Proportion of Polymorphic Loci	226
5.15.	Heterozygosity	227
5.16.	Deviation from Hardy-Weinberg Proportion	230
5.17.	Genetic Distance	232
5.18.	General Discussion	235
Chapter Six	SUMMARY AND CONCLUSION	238

APPENDICES		

LIST OF TABLES

Tables		Page
Table 1.	Goat population in major regions of the world .	8
Table 2.	Investigation carried out on genetic markers in goats.	35
Table 3.	Collection localities and numbers of animals sampled at each on the locations.	58
Table 4.	Names, abbreviation, enzymes commission number, structure and function of proteins included in the present study.	75
Table 5.	Phenotype frequencies of the goat populations examined.	91
Table 6.	List of monomorphic loci investigated.	95
Table 7.	Numbers of animal assayed (N) and allele frequencies for 12 polymorphic loci.	96
Table 8.	Distribution of albumin phenotypes among offsprings.	102
Table 9.	Distribution of amylase phenotypes among offsprings.	102
Table 10.	Distribution of alkaline phosphatase phenotypes among offsprings.	107
Table 11.	Distribution of carbonic anhydrase phenotypes among offsprings.	107
Table 12.	Distribution of haemoglobin phenotypes among offsprings.	114
Table 13.	Distribution of malic enzyme phenotypes among offsprings.	114
Table 14.	Distribution of malate dehydrogenase phenotypes among offsprings.	114
Table 15.	Spectrophotometric assay of nucleoside phosphorylase activity.	118
Table 16.	Distribution of nucleoside phosphorylase phenotypes among offsprings.	118

Table		Page
Table 17.	Distribution of NADH-Diaphorase 1 zone 1 phenotypes among offsprings.	124
Table 18.	Distribution of NADH-Diaphorase 1 zone 2 phenotypes among offsprings.	124
Table 19.	Distribution of transferrin phenotypes among offsprings.	130
Table 20.	Distribution of X-protein phenotypes among offsprings.	130
Table 21.	Distribution of Null and Rare Alleles among the 13 populations examined.	153
Table 22.	Measures of genetic variability at 40 loci in each population.	156
Table 23.	Summary of results of chi-square test for deviation from Hardy-Weinberg equilibrium.	161
Table 24.	Summary of results of coefficient for heterozygotes deficiencies in each locus for each population.	163
Table 25.	Summary of results of contingency chi-square test for loci within respective country.	169
Table 26.	Summary of results of contingency chi-square test over all loci in 13 populations.	170
Table 27.	Summary of F-Statistics at all loci.	172
Table 28.	Hierachial F_{ST} estimates (Wright,1978) combined across all loci.	172
Table 29.	Matrix of Nei (1978) genetic distances/Identity for each pair of population.	175
Table 30.	Average genetic identity values within and between populations.	176

Table		Page
Table 31.	Summary of frequencies of albumin from various breeds of goats.	181
Table 32.	Gene frequencies of albumin from the present study.	183
Table 33.	Summary of gene frequencies of amylase from various breeds of goats.	185
Table 34.	Gene frequencies of amylase from the present study.	187
Table 35.	Summary of gene frequencies of alkaline phosphatase from various breeds of goats.	189
Table 36.	Gene frequencies of alkaline phosphatase from the present study.	190
Table 37.	Summary of gene frequencies of carbonic anhydrase from various breeds of goats.	192
Table 38.	Gene frequencies of carbonic anhydrase from the present study.	193
Table 39.	Summary of gene frequencies of haemoglobin from various breeds of goats.	196
Table 40.	Gene frequencies of haemoglobin from the present study.	198
Table 41.	Summary of gene frequencies of malate dehydrogenase from various breeds of goats.	202
Table 42.	Gene frequencies of malate dehydrogenase from the present study.	203
Table 43.	Summary of gene frequencies of nucleoside phosphorylase from various breeds of goats.	205
Table 44.	Gene frequencies of nucleoside phosphorylase from the present study.	206
Table 45.	Gene frequencies of NADH-Diaphorase 1 zone 1 from the present study.	209

Table		Page
Table 46.	Summary of gene frequencies of NADH-Diaphorase 1 zone 2 from various breeds of goats.	211
Table 47.	Gene frequencies of NADH-Diaphorase 1 zone 2 from the present study.	212
Table 48.	Summary of gene frequencies of transferrin from various breeds of goats.	217
Table 49.	Gene frequencies of transferrin from the present study.	220
Table 50.	Summary of gene frequencies of X-protein from various breeds of goats.	223
Table 51.	Gene frequencies of X-protein from the present study.	224
Table 52.	Proportion of polymorphic loci (P) for monomeric, dimeric, trimeric and tetrameric enzymes in goats.	231

LIST OF FIGURES

Figures		Page
Figure 1.	Postulated Dispersion Route of Domesticated Goats.	11
Figure 2.	Geographical Localities at which Population were sampled.	57
Figure 3.	Diagrammatic representation of sample preparation for Electrophoretic Analysis.	60
Figure 4.	Schematic representation of albumins.	101
Figure 5.	Schematic representation of amylase.	101
Figure 6.	Schematic representation of alkaline phosphatase.	106
Figure 7.	Schematic representation of carbonic anhydrase	106
Figure 8.	Schematic representation of haemoglobin	113
Figure 9.	Schematic representation of malic enzyme.	113
Figure 10.	Schematic representation of malate dehydrogenase	117
Figure 11.	Schematic representation of nucleoside phosphorylase	117
Figure 12..	Schematic representation of NADH-Dia 1	123
Figure 13.	Schematic representation of NADH-Dia 2	123
Figure 14.	Schematic representation of transferrin.	129
Figure 15.	Schematic representation of X-Protein.	129

Figures	Page
Figure 16. Schematic representations of Monomorphic Loci.	145
1. Acid phosphatase	145
2. Adenylate kinase	145
3. Biliverdin reductase	145
4. 2,-3,diphosphoglyceromutase	145
5. Fructose-1,6-diphosphate	146
6. Fumarase	146
7. Fructokinase	146
8. Glucose dehydrogenase	146
9. Esterase-2	147
10. Glucose phosphatase isomerase	147
11. Glutamate oxaloacetate transaminase	147
12. Glutamate pyruvate transaminase	147
13. β -glyceradehyde-3-phosphate dehydrogenase	148
14. Glutathione reductase	148
15. Hexokinase	148
16. Isocitrate dehydrogenase	148
17. Lactate dehydrogenase	149
18. Mannose phosphate isomerase	149
19. NADPH-Diaphorase-2	149
20. Peptidase-A	149
21. Peptidase-B	150
22. Peptidase-C	150
23. Peptidase-D	150
24. Phosphoglucomutase-2	150
25. 6-Phosphoglucomutase dehydrogenase	151
26. Pyruvate kinase	151
27. Sorbitol dehydrogenase	151
28. Superoxide dismutase	151

LIST OF PLATES

PLATES		PAGE
Plate 1.	Indigenous goat of Southeast Asia, the "Katjang Goats"	12
Plate 2.	Gelman's Cellulose Acetate Electrophoresis apparatus.	62
Plate 3.	Soaking of Cellulose Acetate gel strips.	64
Plate 4.	Preparation of homogenates into microwell plate.	65
Plate 5.	Fixing of Cellulose Acetate gel strips to bridges.	66
Plate 6.	Transfer of samples to applicator.	67
Plate 7.	Loading samples onto Cellulose Acetate gel strips.	68
Plate 8.	Bridges with loaded gel strips in electrophoretic chamber	70
Plate 9	Glass doored refrigerator used for electrophoretic runs.	71
Plate 10.	Zymogram of Albumins.	99
Plate 11.	Zymogram of Amylase.	100
Plate 12.	Zymogram of Alkaline Phosphatase .	104
Plate 13.	Zymogram of Carbonic Anhydrase.	105
Plate 14.	Zymogram of Haemoglobin.	110
Plate 15.	Zymogram of Malic Enzyme.	111
Plate 16.	Zymogram of Malate Dehydrogenase.	112
Plate 17.	Zymogram of Nucleoside Phosphorylase.	116
Plate 18.	Zymogram of NADH-Diaphorase 1 zone 1.	121

Plate 19.	Zymogram of NADH-Diaphorase 1 zone 2.	122
Plate 20.	Zymogram of Transferrin.	127
Plate 21.	Zymogram of X-Protein.	128
Plate 22.	Zymogram of Acid Phosphatase.	131
Plate 23.	Zymogram of Adenylate kinase.	131
Plate 24.	Zymogram of Biliverdin reductase.	132
Plate 25.	Zymogram of 2-3,Diphosphoglyceromutase.	132
Plate 26.	Zymogram of Esterase-2.	133
Plate 27.	Zymogram of Fructose1,6-diphosphatase.	133
Plate 28.	Zymogram of Fumarase.	134
Plate 29.	Zymogram of Fructokinase.	134
Plate 30.	Zymogram of Glucose dehydrogenase.	135
Plate 31.	Zymogram of Glucose phosphate isomerase.	135
Plate 32.	Zymogram of Glutamate oxaloacetate transaminase.	136
Plate 33.	Zymogram of Glutamate pyruvate transaminase.	136
Plate 34.	Zymogram of alpha-Glyceradehyde-3-phosphate dehydrogenase.	137
Plate 35.	Zymogram of Glutathione reductase.	137
Plate 36.	Zymogram of Hexokinase.	138
Plate 37.	Zymogram of Isocitrate dehydrogenase.	138

Plate		Page
Plate 38.	Zymogram of Lactate dehydrogenase.	139
Plate 39.	Zymogram of Mannose phosphate isomerase.	139
Plate 40.	Zymogram of NADPH - Diaphorase 2.	140
Plate 41.	Zymogram of Peptidase - A.	140
Plate 42.	Zymogram of Peptidase - B.	141
Plate 43.	Zymogram of Peptidase - C.	141
Plate 44.	Zymogram of Peptidase - D.	142
Plate 45.	Zymogram of Phosphoglucomutase-2.	142
Plate 46.	Zymogram of 6-Phosphogluconate dehydrogenase.	143
Plate 47.	Zymogram of Pyruvate kinase.	143
Plate 48.	Zymogram of Sorbitol dehydrogenase.	144
Plate 49.	Zymogram of Superoxide dismutase.	144

LIST OF APPENDICES

- Appendix 1. Electrophoretic conditions and staining methods for various systems analysed.
- Appendix 2. Details of reagents referred in this study.
- Appendix 3. Details of substrates referred in this study.
- Appendix 4. Details of the stock solutions referred in this study.
- Appendix 5. Genotype frequency data input sheet for BIOSYS-1 analysis.
- Appendix 6. Allele frequency data input sheet for BIOSYS-1 analysis.
- Appendix 7. Phenotype frequencies with the null alleles of the goat population examined.
- Appendix 8. Distribution of single locus heterozygosities :
(a) theoretical distribution obtained by computer simulation with the infinite-allele model. (b) man, (c) the house mouse (*Mus musculus*), and (d) the *Drosophila mulleri* species group.
- Appendix 9. Distribution of average genetic diversity (heterozygosity).
- Appendix 10. Bottleneck effect on genetic distance.
- Appendix 11. Sample performa sheet used in electrophoretic scoring.
