

## TABLE OF CONTENTS

CONTENTS .....	PAGE
ACKNOWLEDGEMENT .....	ii
ABSTRACT .....	iv
ABSTRAK .....	vi
LIST OF TABLES .....	xiii
LIST OF FIGURES .....	xviii
LIST OF PLATES .....	xxi
LIST OF APPENDICES .....	xxii
 1. INTRODUCTION .....	 1
1.1. BACKGROUND ON CHILLI .....	1
1.2. THE IMPORTANCE OF CHILLIES .....	3
1.3. CHILLI INDUSTRY IN MALAYSIA .....	4
1.3.1. CONSTRAINTS OF DRIED CHILLI PRODUCTION IN MALAYSIA .....	9
1.4. BASIS OF THE STUDIES .....	10
 2. LITERATURE REVIEW .....	 12
2.1. TAXONOMY AND BASIC BIOLOGY OF <i>CAPSICUM</i> .....	12
2.1.1 CLASSIFICATION .....	12
2.1.2 BASIC BIOLOGY OF <i>CAPSICUM</i> <i>ANNUUM</i> L .....	13
2.1.2.1. Species characteristics .....	13
2.1.2.2. Breeding system .....	13
2.1.2.3. Chemical composition and nutritive elements in chilli .....	14
a) Capsaicinoids .....	14
b) Colour .....	17
c) Vitamins .....	18
d) Other nutritive and essential elements .....	19

2.2.	THE IMPORTANCE OF CHILLI .....	20
2.2.1.	ECONOMIC AND NUTRITIVE IMPORTANCE .....	20
2.2.2.	WORLD PRODUCTION OF CHILLI .....	23
2.2.3.	CHILLI PRODUCTION IN MALAYSIA .....	26
2.3.	MAJOR PROBLEMS OF CHILLI PRODUCTION .....	27
2.3.1.	PESTS AND DISEASES .....	27
2.3.2.	INFERIOR VARIETIES .....	28
2.3.3.	ALLELOPATHIC EFFECTS OF RED CHILLI ( <i>CAPSICUM ANNUUM</i> L.) .....	29
2.4.	FACTORS AFFECTING THE QUALITY OF DRY CHILLI .....	29
2.4.1.	GENETIC FACTORS .....	30
2.4.2.	ENVIRONMENTS .....	31
2.4.2.1.	Geographical areas .....	31
2.4.2.2.	Temperature .....	31
2.4.2.3.	Rainfall (Water availability) .....	32
2.4.2.4.	Growing conditions .....	32
2.4.2.5.	Shading (Light intensity) .....	33
2.4.2.6.	Disease .....	33
2.4.3.	HARVESTING STAGE OR MATURITY AGE... ..	33
2.4.4.	POST HARVEST HANDLING .....	34
2.4.4.1.	Drying .....	34
2.4.4.2.	Storage .....	35
2.5.	GENETIC AND BREEDING STUDIES FOR CHILLI IMPROVEMENT .....	35
2.5.1.	GERMPLASM EVALUATION .....	35
2.5.2.	GENETIC STUDIES .....	36
2.5.3.	CORRELATION STUDIES .....	39
2.5.4.	GENOTYPE ENVIRONMENTAL INTERACTION STUDIES ON YIELD AND QUALITY OF CHILLI .....	41
2.5.5.	BREEDING STRATEGIES .....	42
2.5.5.1.	Heterosis .....	43
2.5.5.2.	Wide-crosses .....	43
2.5.5.3.	Biotechnology .....	44
2.6.	GENETIC X ENVIRONMENT INTERACTION .....	46
2.6.1.	INTERPRETATION OF G x E .....	47
2.6.2.	SIGNIFICANT OF G x E .....	50
2.6.3.	ANALYSIS OF G x E INTERACTION .....	51

2.6.3.1.	Analysis of variance .....	52
2.6.3.2.	Comparison of variance components .....	53
2.6.3.3.	Regression .....	54
2.6.3.4.	Heritability estimates .....	56
2.6.4.	STABILITY .....	59
2.6.4.1.	Definition of stability .....	59
2.6.4.2.	Measurements of stability .....	60
2.6.4.2.1.	Means and coefficient of variability .....	61
2.6.4.2.2.	Type 4 stability Analysis .....	62
2.6.4.2.3.	Ranking .....	63
2.7.	AGRO-ECOLOGICAL FEATURES OF PENINSULAR MALAYSIA .....	64
2.7.1.	SOIL .....	64
2.7.2.	CLIMATE .....	64
2.8.	STATUS OF CHILLI RESEARCH IN MALAYSIA .....	66
3.	MATERIALS AND METHODS .....	69
3.1.	PLANT MATERIALS .....	69
3.2.	MULTILOCATIONAL TRIALS .....	72
3.3.	DATA COLLECTION .....	75
3.4.	METEOROLOGICAL DATA .....	77
3.5.	DRYING METHOD .....	85
3.6.	STATISTICAL ANALYSIS .....	86
3.6.1	ANALYSES OF VARIANCE .....	86
3.6.2	G x E INTERACTION .....	86
3.6.2.1.	Combined analysis of variance .....	86
3.6.3	GENOTYPIC COEFFICIENT OF VARIATION .....	93
3.6.4	HERITABILITY .....	93
3.6.5	CORRELATION AMONG CHARACTERS .....	94
3.6.6	CROSS-OVER INTERACTIONS .....	94
3.6.7	STABILITY PARAMETERS ANALYSES .....	94
3.6.7.1.	Genotype - grouping using mean and coefficient of variance (CV) .....	95
3.7.7.2.	Regression and deviation .....	96
3.7.7.3.	Rank - sum index .....	98
4.	RESULTS .....	100
4.1.	PRELIMINARY EVALUATION TRIALS .....	100
4.1.1.	VARIABILITY .....	100
4.1.2.	MEAN PERFORMANCE .....	102

a) Yield, yield component and fruit characters .....	102
b) Agronomic characters .....	106
c) Quality factor .....	108
4.1.3. CORRELATION STUDIES .....	113
4.2. MULTI-LOCATION TRIALS .....	118
4.2.1. CHARACTERISTICS OF THE ENVIRONMENT .....	118
4.2.2. DRYING METHOD .....	120
4.2.3. PERFORMANCE OF THE G x E TRIALS.....	122
4.2.3.1. ANOVA by environment .....	122
4.2.3.2. Mean performance of genotype and environment .....	126
a) Yield and yield component .....	126
b) Agronomic characters .....	130
c) Quality characters .....	133
4.2.3.3. Combined analysis of variance .....	148
4.2.3.3.1. Combined ANOVA over macro-environments .....	151
4.2.3.3.2. Combined ANOVA over locations and planting-seasons .....	153
4.2.3.3.4. Variance components .....	155
4.2.3.3.4.1. Variance components over macro-environments.....	155
4.2.3.3.4.2. Variance components over locations and planting-seasons .....	157
4.2.3.5. Genotypic coefficients of variation and heritability estimates .....	160
4.2.3.6. Correlation studies among characters in different environments .....	164
a) Relationship between yield and other traits .....	164
b) Relationship between yield components and other traits .....	166
c) Relationship between quality characters and other traits .....	167
4.3. ESTIMATE OF STABILITY PARAMETERS .....	180
4.3.1. GENOTYPE GROUPING BASED ON MEAN AND CV OF GENOTYPES .....	181
4.3.1.1. Yield and yield components .....	181
4.3.1.2. Agronomic characters .....	183
4.3.1.3. Quality characters .....	184
4.3.2. REGRESSION AND DEVIATION .....	198
4.3.2.1. Yield and yield components .....	199
4.3.2.2. Agronomic characters .....	200

	4.3.2.3. Quality characters .....	201
4.3.3.	CROSS-OVER AND NON CROSS-OVER EFFECTS .....	206
	4.3.3.1. Yield and yield components .....	206
	4.3.3.2. Agronomic characters .....	207
	4.3.3.3. Quality characters .....	208
4.3.4.	RANKING METHODS .....	221
	4.3.4.1. Yield and yield components .....	221
	4.3.4.2. Agronomic characters .....	222
	4.3.4.3. Quality characters .....	223
5.	DISCUSSION .....	226
5.1.	INTRODUCTION .....	230
5.2.	GENETIC X ENVIRONMENTAL STUDIES .....	231
	5.2.1. YIELD AND COMPONENTS .....	231
	5.2.2. OTHER AGRONOMIC CHARACTERS .....	238
	5.2.3. QUALITY DETERMINING CHARACTERS ...	240
5.3.	THE RELATIVE IMPORTANCE OF GENOTYPE, ENVIRONMENTAL AND GENOTYPE-ENVIRONMENTAL EFFECTS .....	243
	5.3.1. GENOTYPIC EFFECTS .....	243
	5.3.2. ENVIRONMENTAL EFFECTS .....	244
	5.3.3. GENOTYPIC AND ENVIRONMENTAL INTERACTION .....	245
5.4.	HERITABILITY AND GENETIC COEFFICIENT OF VARIATION.....	246
5.5.	CORRELATION .....	247
5.6.	STABILITY ANALYSIS.....	252
	5.6.1. STABILITY BY CHARACTERS .....	253
	5.6.2. STABILITY BY VARIETIES.....	258
	5.6.3. SIMULTANEOUS SELECTION OF VARIETIES .....	266
	5.6.4. DELINEATING SUITABLE AREAS FOR CHILLI PRODUCTION .....	272
5.7.	CONCLUDING REMARKS .....	273
6.	SUMMARY .....	283
7.	REFERENCES .....	287

## LIST OF TABLES

<i>Tables</i>	<i>Pg</i>
1.1. Chilli consumption in Malaysia (tons) .....	5
1.2. Areas of chilli cultivation in Peninsular Malaysia (ha) .....	6
1.3. Statistics of chilli imports in Malaysia .....	8
2.1. Comparative pungency ratings for chillies from different geographical regions .....	17
2.2. Chemical compositions of chilli ( <i>Capsicum annuum</i> L.) ...	20
2.3. Commercial uses of chilli according to pungency level .....	22
3.1. Origins and characteristics of 64 varieties of chilli .....	70
3.2. Meteorological data and soil conditions of selected sites for G x E study .....	74
3.3. Analysis of variance and expected mean squares for the analysis of Method A: over macro-environments with planting-season and location effects combined .....	88
3.4. Analysis of variance and expected mean squares for the analysis of Method B: over planting-season and location effects separated .....	90
3.5. Partition of G x E interaction for each genotype into regression and deviation components .....	97
4.1. Mean square values (df. within parenthesis) for the various traits of chilli in the preliminary evaluation trials .....	101
4.2. Mean values of some chilli characteristics measured in the preliminary trial evaluated in Jalan Kebun .....	110
4.3. Simple correlation coefficients among various chilli characteristics measured in the preliminary evaluation trial .....	117

4.4.	The air temperature (°C), the relative humidity, evaporation rate, solar radiation, sunshine and the rainfall distribution during the crop cycle .....	119
4.5.	Mean squares for yield/plant, no. of fruits/plant, mean of fruit weight and dry yield of 22 genotypes for each of the 14 environments .....	123
4.6.	Mean squares for days to harvest, days to dry, dry weight, conversion rate and plant height of 22 genotypes for each of the 14 environments .....	124
4.7.	Mean squares for % of bleaching, light transmission and capsaicin content of 22 genotypes for each of the 14 environments .....	125
4.8.	Mean values of yield (g/plant) for genotypes grown in different environments .....	137
4.9.	Mean values of number of fruits/plant for genotypes grown in different environments .....	138
4.10.	Mean values of mean fruit weight (g/fruit) for genotypes grown in different environments .....	139
4.11.	Mean values of dry yield (g/plant) for genotypes grown in different environments .....	140
4.12.	Mean values of days to harvest for genotypes grown in different environments .....	141
4.13.	Mean values of plant height (cm) for genotypes grown in different environments .....	142
4.14.	Mean values of days to dry for genotypes grown in different environments .....	143
4.15.	Mean values of conversion rate (solid content as percentage of fresh) for genotypes grown in different environments .....	144
4.16.	Mean values of percentage of bleaching for genotypes grown in different environments .....	145

4.17.	Means values of light transmission for genotypes grown in different environments .....	146
4.18.	Mean values of capsaicin for genotypes grown in different environments .....	147
4.19.	Bartlett's test for homogeneity of error variance over over 14 environments .....	150
4.20(a).	Mean squares values for agronomic and quality character in a combined analysis over 14 environments ...	152
4.20(b).	Mean squares values for combined ANOVA over locations and planting-seasons for some chilli traits .....	154
4.21(a).	Variance components and standard error in parenthesis for some chilli characters over different macro-environments .....	156
4.21(b).	Variance components and standard error of the estimates in parenthesis for each parameter over locations and planting-seasons .....	159
4.22(a).	Genotypic and phenotypic variance, genotypic coefficients of variation and heritability estimates for 12 characters from ANOVA over macro-environments .....	162
4.22(b).	Genotypic and phenotypic variance, genotypic coefficients of variation and heritability estimates for 12 characters from ANOVA over locations and planting-seasons.....	163
4.23.1.	Correlation coefficients between yield (g/plant) against other traits by environments .....	168
4.23.2.	Correlation coefficients between mean fruit weight (g/fruit) against other traits by environments .....	169
4.23.3.	Correlation coefficients between number of fruits/plant against other traits by environments .....	170
4.23.4.	Correlation coefficients between dry yield and other traits by environments .....	171
4.23.5.	Correlation coefficients between plant height and other traits by environments .....	172

4.23.6.	Correlation coefficients between days to harvest and other traits by environments .....	173
4.23.7.	Correlation coefficients between days to dry and other traits by environments .....	174
4.23.8.	Correlation coefficients between dry weight against other traits by environments .....	175
4.23.9.	Correlation coefficients between conversion rates against other traits by environments .....	176
4.23.10.	Correlation coefficients between percentage of bleaching against other traits by environments .....	177
4.23.11	Correlation coefficients between light transmission and other traits by environments .....	178
4.23.12	Correlation coefficients between capsaicin content and other traits by environments .....	179
4.24.1.	Estimates of regression coefficients and stability variance for yield and yield components in chilli .....	203
4.24.2	Estimates of regression coefficients and stability variance for some agronomic characters in chilli .....	204
4.24.3.	Estimates of regression coefficients and stability variance for some quality characters in chilli.....	205
4.25.1.	Ranking and stability rating (according to Kang 1991a) for yield and yield components of chilli .....	225
4.25.2.	Ranking and stability rating (according to Kang 1991a) for dry yield of chilli .....	226
4.26.1.	Ranking and stability rating (according to Kang 1991a) for plant height and days to harvest of chilli .....	227
4.26.2.	Ranking and stability rating (according to Kang 1991a) For days to dry, dry weight and conversion rates of chilli .....	228
4.27.	Ranking and stability rating (according to Kang 1991a) for product colour, percentage of bleaching and capsaicin content of chilli .....	229

5.1.	Stability estimates of 22 varieties of chilli with respect to yields, some agronomic and quality characters .....	265
5.2.	Stability estimates for yield (g/plant) and overall scores of 22 varieties of hot pepper varieties evaluated at 14 environments .....	271

## LIST OF FIGURES

<i>Figures</i>	<i>Pg</i>
1.1. Distribution of chilli cultivation in Peninsular Malaysia ...	7
3.1. Location of the trial sites .....	73
3.2.1. Distribution of temperature, rainfall and sunshine at Cameron Highlands.....	78
3.2.2. Distribution of temperature, rainfall and sunshine at Bertam .....	79
3.2.3. Distribution of temperature, rainfall and sunshine at Gajah Mati .....	80
3.2.4. Distribution of temperature, rainfall and sunshine at Jalan Kebun .....	81
3.2.5. Distribution of temperature, rainfall and sunshine at Kuala Linggi .....	82
3.2.6. Distribution of temperature, rainfall and sunshine at Telong .....	83
3.2.7. Distribution of temperature, rainfall and sunshine at Kundang .....	84
4.1.1. Distribution of means of yield per plant and coefficients of variance of 22 varieties of chilli .....	186
4.1.2. Distribution of means of mean fruit weight (g/fruit) coefficients of variance of 22 varieties of chilli .....	187
4.1.3. Distribution of means of no. of fruits/plant and coefficients of variance of 22 varieties of chilli .....	188
4.1.4. Distribution of means of dry yield and coefficients of variance of 22 varieties of chilli .....	189
4.1.5. Distribution of means of days to harvest and coefficients of variance of 22 varieties of chilli .....	190

## LIST OF FIGURES

<i>Figures</i>	<i>Pg</i>
1.1. Distribution of chilli cultivation in Peninsular Malaysia ...	7
3.1. Location of the trial sites .....	73
3.2.1. Distribution of temperature, rainfall and sunshine at Cameron Highlands.....	78
3.2.2. Distribution of temperature, rainfall and sunshine at Bertam .....	79
3.2.3. Distribution of temperature, rainfall and sunshine at Gajah Mati .....	80
3.2.4. Distribution of temperature, rainfall and sunshine at Jalan Kebun .....	81
3.2.5. Distribution of temperature, rainfall and sunshine at Kuala Linggi .....	82
3.2.6. Distribution of temperature, rainfall and sunshine at Telong .....	83
3.2.7. Distribution of temperature, rainfall and sunshine at Kundang .....	84
4.1.1. Distribution of means of yield per plant and coefficients of variance of 22 varieties of chilli .....	186
4.1.2. Distribution of means of mean fruit weight (g/fruit) coefficients of variance of 22 varieties of chilli .....	187
4.1.3. Distribution of means of no. of fruits/plant and coefficients of variance of 22 varieties of chilli .....	188
4.1.4. Distribution of means of dry yield and coefficients of variance of 22 varieties of chilli .....	189
4.1.5. Distribution of means of days to harvest and coefficients of variance of 22 varieties of chilli .....	190

4.1.6.	Distribution of means of plant height and coefficients of variance of 22 varieties of chilli .....	191
4.1.7.	Distribution of means of days to dry and coefficients of variance of 22 varieties of chilli .....	192
4.1.8.	Distribution of means of dry weight (g) and coefficients of variance of 22 varieties of chilli .....	193
4.1.9.	Distribution of means of conversion rate (%) and coefficients of variance of 22 varieties of chilli .....	194
4.1.10.	Distribution of means of percentage of bleaching and coefficients of variance of 22 varieties of chilli .....	195
4.1.11.	Distribution of means of light transmission and coefficients of variance of 22 varieties of chilli .....	196
4.1.12.	Distribution of means of capsaicin content (mg/g) and coefficients of variance of 22 varieties of chilli .....	197
4.2.1.	Plot of regression lines of individual genotypes against environmental index for yield .....	209
4.2.2.	Plot of regression lines of individual genotypes against environmental index for mean fruit weight .....	210
4.2.3.	Plot of regression lines of individual genotypes against environmental index for no.of fruits/plant .....	211
4.2.4.	Plot of regression lines of individual genotypes against environmental index for dry yield .....	212
4.2.5.	Plot of regression lines of individual genotypes against environmental index for days to harvest .....	213
4.2.6.	Plot of regression lines of individual genotypes against environmental index for plant height .....	214
4.2.7.	Plot of regression lines of individual genotypes against environmental index for days to dry .....	215
4.2.8.	Plot of regression lines of individual genotypes against environmental index for dry weight (g) .....	216

4.2.9.	Plot of regression lines of individual genotypes against environmental index for conversion rates .....	217
4.2.10.	Plot of regression lines of individual genotypes against environmental index for percentage of bleaching .....	218
4.2.11.	Plot of regression lines of individual genotypes against environmental index for light transmission at 490 nm .....	219
4.2.12.	Plot of regression lines of individual genotypes against environmental index for capsaicin content .....	220
5.1.	Yield as influenced by climatic factors (rainfall, sunshine, temperature and humidity) during growing period .....	278

## LIST OF PLATES

<i>Plates</i>	<i>pg</i>
<p>1. Modified conventional dryer.  Left: Fresh chilli placed on plastic insulated wire netting  ready to be solar dried.  Right: Solar dried chilli still inside the drier  Bottom: Modified solar dryer: iron angled frame with  Plastic coated wire netting as the base.  Detachable cover made of UV treated  plastic (see inset) .....</p>	121
<p>2. Variety Brebes (V44): A medium size plant, above  average yielder with good quality attribute and most stable  variety with stability in twelve characters .....</p>	279
<p>3. Variety purple chilli (V16) selected for characters:  days to dry (stable), pungency (stable), fruit number (stable),  conversion rate, good colour (stable), high colour  retention (stable) on drying and yield (stable).  Stability in 9 characters. ....</p>	280
<p>4. Variety MC 11 selected for good fruit size(stable), optimum  Height (stable), high yield (stable), pungency(stable), conversion  rate (stable), no of fruits/plant(stable), days to dry(stable).  Stability in 11 characters. MC11 is a double purpose chilli.  The glossy bright red (solar dried) and very intent red  colour (oven dried) of MC11.....</p>	281
<p>5. Variety Ch388 (V57) selected for characters: yield (stable),  pungency (stable), fruit number (stable), conversion rate(stable)  and long attractive fruits (stable) suitable for fresh consumption  and as raw material. Stability in 11 characters.....</p>	282

## LIST OF APPENDICES

<i>Appendices</i>	<i>pg</i>
Appendix I: Typical growth habit of chilli plant as in IPBGR descriptor list .....	310
Appendix II: Temperatures (°C) pattern under solar dryer against air temperatures at various time of the day (31.1.90 - 17.2.90) .....	311
