
BY
SAUDAGAR SINGH A/L KERNAIL SINGH

THIS RESEARCH REPORT IS SUBMITTED TO THE FACULTY OF ECONOMICS AND ADMINISTRATION, UNIVERSITY OF MALAYA IN PARTIAL FULFILLMENT OF THE REQUIREMENT FOR THE DEGREE OF MASTER OF PUBLIC ADMINISTRATION

SESSION 1998/1999
DEDICATED TO THE
MEMORY OF
MY LATE FATHER
ACKNOWLEDGEMENTS

There are number of persons to whom I owe my deepest gratitude to the successful completion of my MPA programme. To Assoc. Prof. Dr. Norma Mansor, Assoc. Prof. Dr. Oo Yu Hock, Assoc. Prof. Mr. Tey Hoe Yoke, Prof. Lee Poh Ping and Mr. Sri Tharan for the knowledge that was imparted during the classroom sessions. I am also additionally indebted to Mr. Sri Tharan who patiently supervised the writing of this dissertation and Assoc. Prof. Dr. Oo Yu Hock who constantly “checked” on my progress.

Most importantly I am indebted to my late father who instilled in me the value of education and the quest for knowledge which he himself was denied. He always demanded and expected more than the best from me.

I am grateful too to my mother, wife and my sisters who had patiently stood by and being understanding during these years. There were times when I was not able to fulfil their wishes while pursuing my goal.

I am also grateful to my colleague Pn. Fadhilah Aini who told me to stop procrastinating and to get going with the programme.

Last, but not least, I am grateful to Pn. Kamsiah Saidin and Pn. Normah Abdullah who have so patiently typed numerous drafts of my script and put up with my demands. Thank you too to all my course mates. I am lucky to have had the opportunity to join two MPA classes as a part-time student. They were a source of support during the trying times.
SYNOPSIS

The controversy surrounding the use of psychoactive substances has been debated since the early part of this century. The habit of opium smoking was the first to be spotlighted. Other substances such as ganja (marijuana), cocaine, and psychotropic pills followed this. Global efforts have since been initiated to stem the use of these substances.

The Malaysian Government has in line with the global developments, initiated broad policy imperatives to check the spread of dadah use among its citizens. The main approach used has been enforcement oriented. Despite the strict enforcement of tough laws on the possession and consumption of dadah, the number of individuals involved with dadah use and its trafficking has not abated.

The review found that the factors that appear to have acted against the policy imperatives include: -

- The lack of a committed leadership – both at the political and agency level.
- Inadequately qualified, trained and demoralised implementation staff.
- Implementation agencies are unable to appreciate the dimension of dadah use and hence not able to have an adequate conceptualisation of the phenomenon.
- Implementation agencies lack adequate theoretical and technical knowledge to appreciate the dimension of the *dadah* problem. Hence, they are not able to formulate an adequate plan of action.
- Inadequate funds to implement specific programmes and measures.
- Lack of commitment in the implementation of the prevention programmes by the agencies.
- Inadequately qualified, trained and demoralised implementation staff.
- Inadequately researched press reports that create confusion on the implementation of the *dadah* prevention and control programme.

The study concludes by recommending the importance of understanding the overall perspective of managing the *dadah* phenomenon. This can be impacted through committed leadership, a single organisation that centralises the planning and implementation functions, adequate funds, training and research to identify, plan and implement effective *dadah* prevention and control programmes.

CHAPTER TWO
DADAH DEPENDENCE AND PREVENTION: CONCEPTS, THEORIES AND MODELS

INTRODUCTION

DADAH – A SOCIAL PROBLEM

THEORIES ON DADAH DEPENDENCE
   Biological Theories
   Sociological Theories
   Psycho-Social Theories

TREATMENT AND REHABILITATION MODALITIES
   Maintenance Programmes: Methadone and LAAM
   Detoxification Programmes
   The Therapeutic Community

PREVENTION IN SCHOOL AND COMMUNITY SETTINGS
   Information Dissemination
   Affective Education
   The Social Influence and Social Skills Training

ORGANISATIONAL STRUCTURES FOR IMPLEMENTATION AND CO-ORDINATION

CONCLUSION
CHAPTER THREE
POLICY AND ORGANISATIONAL INITIATIVES: REGULATING AND MANAGING THE DADAH PROBLEM AFTER 1983

INTRODUCTION

ORGANISATIONAL CHANGES
  Redefinition of Policy
  Organisational and Operational Reorganisation
  Review of Strategies

LEGISLATIVE REFORM AND ENFORCEMENT STRATEGIES
  Policy and Objectives
  Prevention of Trafficking
  Regulating Medical Use of Drugs and Precursors

TREATMENT AND REHABILITATION
  Policy Development
  Legislative Development
  The Institutional Programme
  Non-Institutional Programme
  Other Treatment Programmes

PREVENTIVE EDUCATION AND COMMUNITY INFORMATION PROGRAMMES
  School-Based Programmes
  Community Awareness/Action Programmes
  Information Programmes

CONCLUSION
CHAPTER FOUR
MANAGEMENT ISSUES IN DADAH PREVENTION AND CONTROL: 1983-1994

INTRODUCTION

Amount of Dadah Seized
Arrests of Dadah Traffickers
The Number of New Dadah Dependants
and Relapse Cases

OPERATIONALISING AND SUSTAINING THE ORGANISATIONAL STRUCTURE

VALID TECHNICAL THEORY AND TECHNOLOGY

DIVERSITY OF THE TARGET POPULATION

REORGANISATION OF THE IMPLEMENTATION PROCESS:
HOW COHERENT IS IT
Ranking of Strategies and Objectives
Financial Resources
Leadership and Commitment
Hierarchical Integration
Media Attention

CONCLUSION
CHAPTER FIVE
SUMMARY, RECOMMENDATIONS AND CONCLUSION

SUMMARY
Reorganisation of the implementation Machinery
Leadership
Financial Resources
Human Resources

RECOMMENDATIONS
Organisational Structure
Research
Primary Prevention
Legal Provisions and Low Enforcement
Treatment and Rehabilitation
Human resource Development

CONCLUSION
