TENG CHUAN

ABSTRACT

This study examines the level of job satisfaction of employees at Maybank, Klang Valley. The study makes use of the Job Descriptive Index and the Overall Job Satisfaction Index to measure job satisfaction. A set of questionnaires was depatched to randomly selected employees throughout Maybank in the Klang Valley. The response rate was 5.5%.

The consistency and reliability of the responses obtained were analyzed using the Cronbach Alpha Reliability test. T-test and one-way ANOVA were also used to examine the differences in scores obtained by the instruments against the demographic variables. Multiple regression was used to determine the relationship between overall job satisfaction and the six job facets satisfaction.

The data were found to have high reliability and consistency. The data showed that there was no significant relationship between the OJS and each of the job facets except pay and co-workers. Except monthly income groups, other demographic variables had no significant influence on overall job satisfaction of employees. Marital status, number of children, occupational levels, tenure/length of service, union-membership and number of companies prior to present job had no significant influence on facets satisfaction. Some significant difference in facets satisfaction was found among employees at the Head Office and Branches (working conditions), different sex groups (work and supervision), age groups (work, supervision and promotional prospects), ethnic groups (supervision, co-workers and pay), educational levels (pay) and monthly income groups (promotional prospects and working conditions).

Generally, it was found that employees at Maybank were satisfied with their overall job as well as the six job facets.

ACKNOWLEDGEMENTS

I wish to express my sincere appreciation to my supervisor, Mrs. Lai Kwee Lyn for her encouragement and invaluable advice throughout this study. Many thanks also go to employees of Maybank who had assisted me in one way or the other. Without their involvement, this study would have never existed. Their enthusiasm and patience in assisting to distribute the questionnaires are deeply appreciated.

Special thanks also due to my brother, Eng Kok, for his meticulous reading of the unrefined drafts, and the correction of errors within a very limited time frame. To my Dad and Mum, I would like to express my sincere thanks for their patient and encouragement delivered to me during the course of this program.

To my beloved husband, Teng Chuan, I would express my deepest love for him throughout this program for his unending and unselfish assistance, encouragement and moral support. Without him, I would have probably not completed this stage of life meaningfully.

TABLE OF CONTENT

	Page
CHAPTER 1	1
INTRODUCTION	1
1.1 Objective Of The Study	1
1.2 Research Hypotheses	2
1.3 Definition Of Terms	4
1.4 Scope Of The Study	7
1.5 Limitation Of The Study	7
1.6 Significance Of The Study	7
1.7 Organization Of The Study	10
 CHAPTER 2	 11
JOB SATISFACTION: A LITERATURE REVIEW	11
2.1 Concept Of Job Satisfaction	11
2.2 Dimension Of Job Satisfaction	14
2.3 Determinants Of Job Satisfaction	20
2.4 Measuring Job Satisfaction	22
2.5 Demographic Factors And Job Satisfaction	23
 CHAPTER 3	 29
RESEARCH METHODOLOGY	29
3.1 Description Of The Population	29
3.2 Research Design and Sampling Procedure	30

3.3	Research Instruments	30
3.3.1	Job Descriptive Index (JDI)	31
3.3.2	Overall Job Satisfaction Index (OJS)	32
3.4	Data Collection Procedures	32
3.5	Statistical Analysis	33
CHAPTER 4		35
ANALYSES OF THE DATA		35
4.1	Demographic Profile Of The Respondents	35
4.2	The Research Findings	42
4.2.1	Reliability Analysis	42
4.2.2	Multiple Regression Analysis	43
4.2.3	Job Satisfaction Level	44
4.2.4	Overall Job Satisfaction	47
4.2.5	Job Descriptive Index And Its Dimensions	53
CHAPTER 5		63
CONCLUSION AND SUMMARY		63
5.1	Summary Of The Findings	64
5.2	Implications Of The Study	65
5.3	Recommendations for Further Research	67
CHAPTER 6		68
SELECTED BIBLIOGRAPHY		68

LIST OF TABLES

Table	Page
1. The Age Distribution of the Respondents	35
2. The Sex Distribution of the Respondents	36
3. The Marital Status Distribution of the Respondents	36
4. “Do you have any children” Distribution of Respondents	37
5. The Number of Children Distribution of Respondents	37
6. The Race Distribution of the Respondents	37
7. The Educational Level Distribution of the Respondents	38
8. The Occupational Level Distribution of the Respondents	38
9. The Length of Service/Tenure Distribution of the Respondents	39
10. The Number of Companies Prior to Present Job	39
11. The Union-Membership Distribution of the Respondents	40
12. More Benefits from Joining Union Distribution of the Respondents	40
13. The Average Monthly Income Distribution of the Respondents	41
14. The Head Office and Branches Distribution of the Respondents	41
15. The “More satisfied working here than elsewhere” Distribution of the Respondents	42
16. Reliability Analysis of the Instruments	43
17. Distribution of Respondents and Mean Scores According To Their Job Satisfaction (Overall and The Various Dimensions)	45

18.	The Mean Scores and t-values for OJS of each Demographic Group	51
19	The Mean Scores and SD of Job Satisfaction Dimension of employees of different Demographic Groups	60
20	The t-values for JDI and its dimensions score of employees of different Demographic Groups	62
