INTRODUCTION	1
Objectives of present study	5
Chapter 1: LITERATURE REVIEW	
1.1 Allergy	
1.1.1 Definition of allergy	5
1.1.2 Causes and manifestations of allergy	6
1.1.3 Allergy and the immune system	9
1.1.4 Serum immunoglobulins in allergy reactions	12
1.2 Epidemiology of allergy in Malaysia	13
1.3 Assessment of asthma and allergic rhinitis	14
1.4 Aetiological agents of allergy	
1.4.1 General aspects of allergens	18
1.4.2 House dust mites	20
1.4.3 General aspects of mite allergens	24
1.4.4 Mite tropomyosins	26
1.5 Recombinant protein expression	27
1.5.1 Recombinant allergens	28
1.5.2 Prokaryotic expression system	28
1.5.3 Yeast as a eukaryotic expression system	29
1.6 Epitopes and epitope mapping	
1.6.1 Definition of epitope	29
1.6.2 Epitope mapping	30
1.6.3 Epitope mapping of allergens	32
1.7 Epitope mapping by Pepscan	33
1.7.1 Overview of the chemistry of peptide synthesis	33
1.7.2 Rationale for designing of chimeric peptides	34

Chapter 2: MATERIALS AND METHODS

2.1	Materials	
2.1.1	Serum samples	36
2.1.2	Questionnaire	37
2.1.3	Allergen extracts	37
2.1.4	Indoor dust sampling requirements	38
2.1.5	Molecular cloning vectors	38
2.1.6	<i>Escherichia coli</i> strains	39
2.1.7	<i>Pichia pastoris</i> strain X33	39
2.1.8	Media for cloning and expression	39
2.1.9	Antibiotics as selection markers	41
2.1.10	Reagents for bacterial expression and post-expression analysis	41
2.1.11	Reagents for yeast expression and post-expression analysis	42
2.1.12	Peptide synthesis requirements	42
2.1.13	General materials	45
2.2	Skin Prick Test	45
2.3	Serum and saliva sampling	46
2.4	Method of dust sampling	47
2.5	Expression of Der p 10 in <i>E. coli</i>	47
2.5.1	Construction of pGEX-Der p 10	47
2.5.2	Competent cells preparation	49
2.5.3	DNA transformation of <i>E. coli</i>	50
2.5.4	Bacterial colony screening	50
2.5.5	Expression of GST-Der p 10	51
2.5.6	Purification of GST-Der p 10	51
2.6	Expression of Der p 10 in <i>P. pastoris</i>	
2.6.1	Construction of pPICZ-Der p 10	54
2.6.2	Transformation of <i>P. pastoris</i>	57
2.6.3	Expression of recombinant Der p 10 in yeast	60
2.6.4	Purification of yeast-expressed rDer p 10	60
2.7	Protein Analysis and Immunohistochemistry	
2.7.1	Quantification of proteins	63
2.7.2	Verification of protein	63
2.7.3	Enzyme Linked Immunosorbent Assay (ELISA)	64
2.7.4	Immunoblotting assays	65
2.7.5	Mouse antiserum preparation	66
2.8	Peptide synthesis	
2.8.1	Generation of the synthesis schedule	66
2.8.2	Pre-synthesis preparation	67
2.8.3	Fmoc-deprotection and washing of synthesis pins	68
2.8.4	Coupling the N- α -Fmoc-protected amino acids	68
2.8.5	Acetylation of terminal amino groups	70
2.8.6	Side-chain deprotection	70

Chapter 2: MATERIALS AND METHODS

2.1	Materials	
2.1.1	Serum samples	36
2.1.2	Questionnaire	37
2.1.3	Allergen extracts	37
2.1.4	Indoor dust sampling requirements	38
2.1.5	Molecular cloning vectors	38
2.1.6	<i>Escherichia coli</i> strains	39
2.1.7	<i>Pichia pastoris</i> strain X33	39
2.1.8	Media for cloning and expression	39
2.1.9	Antibiotics as selection markers	41
2.1.10	Reagents for bacterial expression and post-expression analysis	41
2.1.11	Reagents for yeast expression and post-expression analysis	42
2.1.12	Peptide synthesis requirements	42
2.1.13	General materials	45
2.2	Skin Prick Test	45
2.3	Serum and saliva sampling	46
2.4	Method of dust sampling	47
2.5	Expression of Der p 10 in <i>E. coli</i>	47
2.5.1	Construction of pGEX-Der p 10	47
2.5.2	Competent cells preparation	49
2.5.3	DNA transformation of <i>E. coli</i>	50
2.5.4	Bacterial colony screening	50
2.5.5	Expression of GST-Der p 10	51
2.5.6	Purification of GST-Der p 10	51
2.6	Expression of Der p 10 in <i>P. pastoris</i>	
2.6.1	Construction of pPICZ-Der p 10	54
2.6.2	Transformation of <i>P. pastoris</i>	57
2.6.3	Expression of recombinant Der p 10 in yeast	60
2.6.4	Purification of yeast-expressed rDer p 10	60
2.7	Protein Analysis and Immunohistochemistry	
2.7.1	Quantification of proteins	63
2.7.2	Verification of protein	63
2.7.3	Enzyme Linked Immunosorbent Assay (ELISA)	64
2.7.4	Immunoblotting assays	65
2.7.5	Mouse antiserum preparation	66
2.8	Peptide synthesis	
2.8.1	Generation of the synthesis schedule	66
2.8.2	Pre-synthesis preparation	67
2.8.3	Fmoc-deprotection and washing of synthesis pins	68
2.8.4	Coupling the N- α -Fmoc-protected amino acids	68
2.8.5	Acetylation of terminal amino groups	70
2.8.6	Side-chain deprotection	70

2.9	Synthesis of conformational peptides	
2.9.1	Synthesis strategy	72
2.9.2	Method of conformational peptide synthesis	72
2.10	PinELISA	
2.10.1	Pre-coating of pins	75
2.10.2	Conjugate test	75
2.10.3	Primary antibody incubation	76
2.10.4	Secondary antibody incubation	76
2.10.5	Substrate reaction	76
2.10.6	Removal of bound antibodies from pin-bound peptides	77
2.11	Analysis of Pepscan	78

Chapter 3: RESULTS AND DISCUSSION OF HOUSE DUST MITE ALLERGENICITY AMONG MALAYSIANS

3.1	Responses to the questionnaire	81
3.2	Results of Skin Prick Tests	82
3.2.1	SPT results of allergic rhinitis patients	84
3.2.2	SPT results of adult asthmatic patients	84
3.2.3	Comparison of frequency of SPT results	87
3.3	In vitro investigation of HDM allergy	91
3.3.1	HDM allergy in allergic rhinitis patients	92
3.3.2	HDM allergy in adult asthmatic patients	95
3.3.3	HDM allergy in asthmatic children	102
3.4	Dust sampling in houses of 10 year-old children	
3.4.1	Analysis of the questionnaire	103
3.4.2	Analysis of the dust samples	103
3.5	Detection of IgA and IgG antibodies in allergy patients and controls	
3.5.1	Antibody levels in sera of negative controls	106
3.5.2	Antibody levels in sera of atopic patients	107
3.6	Mite specific salivary IgA antibodies of allergic rhinitis patients	109
3.7	House dust mite sensitization and severity of asthma	112
3.8	Discussion	115

Chapter 4: RESULTS AND DISCUSSION OF PRODUCTION OF RECOMBINANT MITE TROPOMYOSIN IN *Escherichia coli* AND *Pichia pastoris*

4.1	Amplification of Der p 10 cDNA	120
4.2	Construction of pGEX-Der p 10	120
4.3	Restriction enzyme analysis of pGEX-Der p10 construct	122
4.4	Expression and characterization of recombinant Der p 10 in <i>E. coli</i>	122
4.5	Verification of GST-Der p 10	126
4.6	Purification and quantification of GST-Der 10	129
4.7	Cloning of Der p 10 in <i>P. pastoris</i>	129
4.8	Analysis of transformants	133
4.9	Characterisation of <i>Pichia</i>-expressed rDer p 10	
4.9.1	Kinetics of Der p 10 production	133
4.9.2	Analysis of expressed protein	133
4.10	Discussion	137

Chapter 5: RESULTS AND DISCUSSION OF SERUM ANTIBODIES TO rDer p 10 AND OTHER RECOMBINANT MITE ALLERGENS

5.1	Serum antibodies to the recombinants of Der p 10	142
5.1.1	IgE binding reactivities to the recombinant mite tropomyosins, GST-Der p10 and and GST-Blo t 10 in the sera of Malaysian subjects	144
5.1.2	IgE binding reactivities of 60 Taiwanese sera to the recombinant mite tropomyosins, GST-Der p10 and and GST-Blo t 10	149
5.2	IgE binding reactivities to recombinant <i>D. pteronyssinus</i> allergens	
5.2.1	IgE binding reactivities of allergic rhinitis patients to rDer p allergens	154
5.2.2	IgE binding reactivities of asthmatic patients to rDer p allergens	156
5.3	IgE binding reactivities to recombinant <i>Blomia tropicalis</i> allergens	
5.3.1	IgE binding reactivities in sera of allergic rhinitis patients to recombinant Blo t allergens	158
5.3.2	IgE binding reactivities in sera of asthmatic patients to recombinant Blo t allergens	161

5.4	IgE binding reactivities in sera of asthmatic children to recombinant <i>D. pteronyssinus</i> and <i>B. tropicalis</i> allergens	
5.4.1	IgE binding reactivities in sera of asthmatic children to recombinant Der p allergens	163
5.4.2	IgE binding reactivities in sera of asthmatic children to recombinant Blo t allergens	165
5.5	Comparison of reactivity to the recombinants of Der p allergens	168
5.6	Comparison of reactivity to the recombinants of Blo t allergens	171
5.7	Studies of mite and seafood tropomyosins antigens	173
5.8	<i>In vivo</i> SPT reactivity to Der p 10 recombinants	177
5.9	Discussion	178
 Chapter 6: RESULTS AND DISCUSSION OF EPITOPE MAPPING OF Der f 10 AND Blo t 5 ALLERGENS		
6.1	Synthesis of peptides	187
6.2	Determination of quality and sensitivity of synthesised peptides	
6.3	Pepscan of Der f 10 linear peptides	190
6.4	Fine mapping of Der f 10 linear peptides	195
6.5	Pepscan of Der f 10 conformational peptides	196
6.6	ELISA using free chimeric peptides of Der f 10	203
6.7	Pepscan of Blo t 5 linear peptides	207
6.8	Computational analysis of the results	211
6.8.1	Computational analysis of Der f 10 epitopes	213
6.8.2	Computational analysis of Blo t 5 epitopes	215
6.9	Discussion	217
