1.0 Introduction	1
1.1 Bioindication and biomonitoring of marine pollution.	2
1.2 Aquatic organisms as bioindicators or biomonitors of marine pollution.	4
1.3 Bioaccumulation attribute of a biomonitor.	5
1.4 Marine pollution in Malaysia.	6
1.5 Heavy metal pollution in coastal waters and sediments of Malaysia.	8
1.6 Biomonitoring of heavy metal pollution in marine waters.	12
1.7 Seaweeds as biomonitors of heavy metal pollution.	13
1.8 Heavy metal contents in marine organisms in Malaysia.	15
1.9 Objectives of study.	22

2.0 Literature Review	25
2.1 Heavy metals in the marine environment.	25
2.2 Pollution sources.	26
2.3 Monitors of metal loads.	27
2.4 Characteristics of seaweeds as good biological monitors.	33
2.5 Metal accumulation strategies in marine organisms.	35
2.6 Characteristics of metal accumulation by seaweeds.	39
2.7 Heavy metal contents in seaweeds.	40
2.8 Uptake and elimination studies of heavy metals in seaweeds.	41
2.9 Metal uptake mechanisms and distribution in seaweeds.	51
2.10 Mechanisms of algal resistance to toxic metals.	56
2.10.1 Extracellular resistance mechanisms.	57
2.10.2 Intracellular resistance mechanisms.	57
2.11 Metal regulation in seaweeds.	59
2.12 Factors affecting metal accumulation in seaweeds.	60
2.13 Toxicity tests.	68
2.14 Seaweeds as test species for heavy metals.	69

3.0 Materials and Methods	72
3.1 Bioaccumulation studies.	72
3.1.1 Seaweed species.	72
3.1.2 Methods of seaweed sampling and storage.	73
3.1.3 Preparation of seaweeds and seawater for experiments.	78
3.1.4 Cleaning of apparatus.	78
3.2 Metal range determination studies.	79
3.2.1 Seaweed species.	79
3.2.2 Metal tested.	79
3.2.3 Range of metal concentrations.	79
3.2.4 Type of test.	80
3.2.5 Duration of test.	80
3.3.6 Experimental procedure.	80
3.2.7 End point measurements in seaweeds.	82
3.2.7.1 Determination of Chlorophyll-a content.	82
3.2.7.2 Determination of dry weight.	83
3.2.7.3 Calculation of % inhibition after 24 h.	84
3.3 Effect of initial heavy metal concentration on bioaccumulation in 24 h exposure experiment.	84
3.3.1 Seaweed species and metal tested.	84
3.3.2 Test solution.	84
3.3.3 Acidification.	85

3.3.4	Adjustment of pH of test solutions.	85
3.3.5	Experimental procedure.	86
3.3.6	Sampling of seaweeds and seawater.	88
3.3.7	Analytical procedure.	90
3.3.8	Quality assurance procedures.	91
3.3.8.1	Analysis of the NIES No. 9 <i>Sargasso</i> .	91
3.3.8.2	Standard addition test for seawater analysis.	92
3.4	Effect of salinity on bioaccumulation in 2 h exposure experiment.	92
3.4.1	Seaweed species.	92
3.4.2	Test solutions.	93
3.4.3	Acidification.	93
3.4.4	Adjustment of pH of test solutions.	93
3.4.5	Experimental procedure.	94
3.4.6	Sampling of seaweeds and seawater.	95
3.5	Effect of pH on bioaccumulation in 2 h exposure experiment.	96
3.5.1	Seaweed species and metal tested.	96
3.5.2	Test solutions.	96
3.5.3	Range of pH tested.	96
3.5.4	Experimental procedure.	96
3.6	Statistical analysis.	97

3.7 Instrument operation for the determination of metal levels.	97
3.8 Toxicity testing of heavy metals with seaweeds.	99
3.8.1 Test organism and test material.	100
3.8.2 Toxicity test facilities.	100
3.8.3 Dilution water.	101
3.9 Range finding test.	101
3.9.1 Test organism.	101
3.9.2 Test concentrations/medium.	101
3.9.3 Type of test.	102
3.9.4 Duration of test.	102
3.9.5 Biological data.	102
3.9.6 Experimental procedure.	102
3.9.7 Other measurements.	103
3.9.8 Calculation of toxicity.	103
3.10 Definitive tests.	104
3.10.1 Test concentrations/medium.	104
3.10.2 Test medium renewal.	104
3.10.2 Duration of test.	104
3.10.3 Calculation of toxicity.	104
3.10.4 Other measurements.	105

4.0 Results	107
4.1 Metal range determination studies.	107
4.2 Effect of initial metal concentration on bioaccumulation in 24 h exposure experiment.	107
4.2.1 Metal bioaccumulation patterns.	115
4.2.2 Seawater metal concentration.	126
4.2.3 Net accumulation of metal in seaweed species after 24 h.	133
4.2.4 Correlation between initial metal concentration in seawater and metal accumulated in seaweeds after 24 h ($p < 0.05$).	139
4.2.5 Correlation between metal accumulated in seaweeds and final metal concentration in seawater after 24 h ($p < 0.05$).	140
4.2.6 Correlation between metal content in seaweeds and time of exposure over the range of initial metal concentrations ($p < 0.05$).	140
4.3 Effect of salinity on bioaccumulation in 2 h exposure experiment.	148
4.3.1 Net accumulation of metal in seaweed species after 2 h.	148
4.3.2 Correlation between salinity and metal accumulated in seaweeds after 2 h ($p < 0.05$).	154
4.3.3 Correlation between metal accumulated in seaweeds and final metal concentration in seawater after 2 h ($p < 0.05$).	154

4.3.4	Correlation between metal content in seaweeds and time of exposure over the salinity range ($p < 0.05$).	154
4.4	Effect of pH on bioaccumulation in 2 h exposure experiment.	161
4.4.1	Net accumulation of metal in seaweeds after 2 h.	161
4.4.2	Correlation between pH and metal accumulated in seaweeds after 2 h ($p < 0.05$).	161
4.4.3	Correlation between metal accumulated in seaweeds and final metal concentration in seawater after 2 h ($p < 0.05$).	168
4.4.4	Correlation between metal content in seaweeds and time of exposure over the pH range ($p < 0.05$).	168
4.5	Toxicity testing of heavy metals using seaweeds as test species.	172
4.5.1	Results of the range finding tests.	172
4.5.2	Results of the definitive tests.	177
5.0	Discussion	194
5.1	Effect of initial metal concentration on bioaccumulation in 24 h exposure experiment.	194
5.1.1	Metal accumulation patterns.	194
5.1.2	Metal accumulation mechanisms.	195
5.2	Heavy metal accumulation patterns in individual species.	199
5.2.1	<i>Chaetomorpha linum</i> .	199

5.2.2 <i>Padina tetrastomatica</i> .	201
5.2.3 <i>Sargassum</i> species.	202
5.2.4 <i>Gracilaria</i> species.	204
5.3 Comparison between species.	206
5.4 Effect of salinity on bioaccumulation in 2 h exposure experiment.	212
5.5 Effect of pH on bioaccumulation in 2 h exposure experiment.	214
5.6 Toxicity testing of heavy metals using seaweeds as test species.	218
5.7 Linking bioavailability of metals in seawater with bioaccumulation of metals in seaweeds and toxicity.	227
5.8 Appraisal of study and areas for future research.	231
6.0 Conclusion	235
References	238
Appendices	255
