CHAPTER 1. Introduction

CHAPTER 2. Review of Thin Film Silicon Nitride

2.1 Introduction
2.2 Preparation Techniques for Silicon Nitride
  2.21 Chemical Vapour Deposition (CVD)
  2.22 Glow Discharge Deposition
  2.23 Reactive Ion-Beam Sputtering
  2.24 Nitrogen Implantation
2.3 Reaction Mechanism In Glow Discharge Deposition
2.4 Glow Discharge System Design
2.5 Properties of Glow Discharge Silicon Nitride
  2.51 Chemical Bondings
  2.52 Film Composition
  2.53 Optical Properties

References

CHAPTER 3. Material Preparation and Characterisation

3.1 Introduction
3.2 The Plasma Glow Discharge System
  3.21 Vacuum Deposition Chamber
  3.22 Vacuum Pumping System
  3.23 Gas Feeding System
  3.24 Detoxification System
  3.25 Electrical Circuitry
3.3 Preparation Condition
3.4 The Substrate
3.5 Operation of the PGD System
   3.51 Pre-deposition Procedure  54
   3.52 Deposition Procedure  55
   3.53 Post-deposition Procedure  56
   3.54 Vacuum Chamber Cleaning  56
3.6 Material Characterization  57
   3.61 Ultra-violet/Visible (UV/Vis) Spectroscopy  57
   3.62 Fourier Transformed Infra-red (FTIR) Spectroscopy  57
References  58

CHAPTER 4. Experimental Results and Analysis  59
   4.1 Introduction  59
   4.2 Film Preparation Condition  60
   4.3 UV-Visible Spectroscopy  63
   4.4 Optical Constants Determination  67
   4.5 Computed Values of Optical Constants  73
      4.51 Effect of NH₃ to SiH₄ Flowrate Ratio  73
         4.511 Static refractive index  73
         4.512 Optical energy gap  76
         4.513 Average deposition rate  76
   4.52 Effect of Substrate Temperature  81
      4.521 Static refractive index  81
      4.522 Optical energy gap  81
      4.523 Average deposition rate  81
   4.6 FTIR Spectroscopy  87
      4.61 Effect of NH₃ to SiH₄ Flowrate Ratio  87
      4.62 Effect of Substrate Temperature  94
   4.7 Analytical Techniques on FTIR Spectra  97
      4.71 Decomposition of the Overlapping Bands  97
      4.72 Determination of the Film Atomic Concentration  102
   4.8 IR Vibrational Mode Quantitative Composition  105
4.81 Si-H and N-H stretching bands
   4.811 Effect of NH₃ to SiH₄ Flowrate Ratio 105
   4.812 Effect of Substrate Temperature 106
4.82 Components of the overlapping bands
   4.821 Effect of NH₃ to SiH₄ Flowrate Ratio 115
   4.822 Effect of Substrate Temperature 116
   References 123

CHAPTER 5. Discussion 150
   5.1 Dependence on NH₃ to SiH₄ Flowrate Ratio 153
      5.11 Bonds in the As-deposited Films 153
      5.12 Properties of the As-deposited Films 169
   5.2 Dependence on Substrate Temperature 176
      5.21 Bonds in the As-deposited Films. 179
      5.22 Properties of the As-deposited Films. 189
   References 197

CHAPTER 6. Conclusions 201
Appendix 1. Refractive Index Determination 206
Appendix 2. Error Analysis 212
