## ACKNOWLEDGEMENTS

I am deeply indebted to my supervisor, Dr Leong Kai Hin for his intellectual guidance, inspiration and constructive criticisms that have been instrumental in the completion of this dissertation. His unfailing encouragement and advice accorded to me throughout my entire study has brought me to another level of excellency.

My appreciation to my fellow course mates and friends, Sze Een, Kng, Guat Eong and Tony for the light moments, stimulating discussions, kind words of support and library search, without which the course of preparing this project paper would have been lonely and boring. My thanks to Poh Chye and Chee Wai for their guidance and assistance in the data compilation of this study.

I owe much to my family members; their love, care, support and sacrifice have been my pillar and motivating forces throughout the entire duration of my MBA programme. I would like to dedicate this project paper to my Mothers, Husband Yam Sin, Daughter Si Ming and Son Ken Yi and sisters for their love, companionship which saw me through the difficult moments in preparing this project paper.

## ABSTRACT

The changing landscape of interest rate liberalisation, securitisation and reforms in the Malaysian financial markets have made it conducive for the trading in financial futures and options. As the sophistication of risk management instruments has increased, the scope of corporate risk management policy has become much broader.

This development would add more breadth and introduce a new dimension into the financial system. The availability of a cost-effective hedging vehicle in the form of futures and options would enable the efficient transfer and distribution of financial risks in the economy. These instruments provide great flexibility in structuring a risk management strategy for the firm. But to realise their potential requires a detailed understanding of the instruments and their uses.

The Malaysian government is aiming to achieve an industrialised economy by the year 2020. The process towards industrialisation will lead to an upsurge in the demand for capital and lead to a need for risk management facilities. In Malaysia, the development of the financial futures and options market is within the jurisdiction of the Security Commission. Kuala Lumpur Options & Financial Futures Exchange ("KLOFFE" ) and the Malaysia Monetary Exchange (MME) were set up for the purpose of providing the investors some risk management facilities.

This project paper attempts to firstly understand the key features and uses of Financial Futures. Secondly, to review the potential and key success factor for the Financial Futures contract in Malaysia. The success of this market would depend on several pre-requisites; a well developed and highly liquid underlying cash market and the existence of a sufficient number of market players (speculators and hedgers) with diverging views. Thirdly, to provide evidence on one, the factors that are holding back financial institutions and corporations from using the Financial Futures in Malaysia; two, to gauge the readiness of corporations in participating in the Financial Futures and three, to measure the needs and demands in order to increase competency of Corporations in this field of financial services.

## TABLE OF CONTENTS

---

CHAPTER 1 :	<b>INTRODUCTION.....</b>	1
CHAPTER 2:	<b>HISTORY AND INTERNATIONALISATION OF FUTURES</b>	
	2.1 The Futures Contract.....	3
	2.2 Origin.....	4
	2.3 History.....	5
	2.4 The Commodities Exchange.....	8
	2.5 The Fundamentals.....	8
CHAPTER 3:	<b>FINANCIAL FUTURES</b>	
	3.1 Futures markets.....	12
	3.2 Stock Index Futures.....	13
	3.3 Interest Rate Futures.....	21
	3.4 Currency Futures.....	30
CHAPTER 4:	<b>LITERATURE REVIEW</b>	
	4.1 Review of the Futures contract success factor.....	37
	4.2 Review of Financial Futures in Malaysia .....	42
	4.3 Review of Malaysian Economy.....	60
	4.4 Conclusion.....	64
CHAPTER 5:	<b>RESEARCH METHODOLOGY AND SURVEY ANALYSIS</b>	
	5.1 Methodology.....	66
	5.2 Questionnaire.....	66
	5.3 Sample Selection.....	68
	5.4 Data Collection.....	68
	5.5 Survey Results.....	69
	5.6 Recommendations for Future Studies.....	82

---

<b>CHAPTER 6:</b>	<b>RISK AND FUNCTION OF FINANCIAL FUTURES</b>	
	6.1 Risk Exposure and Hedging.....	83
	6.2 Margin.....	84
	6.3 Leverage.....	84
	6.4 The Market.....	85
	6.5 The Benefit.....	86
<b>CHAPTER 7:</b>	<b>THE SIMEX FUTURES EXCHANGE - A COMPARISON</b>	
	7.1 Introduction.....	88
	7.2 Global Links.....	90
	7.3 Diverse Products.....	91
	7.4 Innovation.....	92
	7.5 International Members.....	93
	7.6 Trading and Operations.....	93
	7.7 Market Confidence.....	94
	7.8 International Recognition.....	95
	7.9 Conclusion.....	96
<b>CHAPTER 8:</b>	<b>THE CHALLENGE AHEAD AND REGULATORY CONCERN</b>	
	8.1 Introduction.....	98
	8.2 Customer Support.....	100
	8.3 Growing Sophistication.....	101
	8.1 The Regulatory Concerns.....	102
<b>CHAPTER 9:</b>	<b>CONCLUSIONS AND RECOMMENDATIONS.....</b>	<b>105</b>
<b>REFERENCES</b>		<b>108</b>
<b>APPENDICES</b>		<b>112</b>
