Abstract

Contents

Chapter 1 Introduction

1.1	Background	1
1.2	Polymer	2
1.3	Polymerization	4
1.3.1	Condensation Polymerization	5
1.3.2	Addition Polymerization	5
1.4	Conducting Polymers	7
1.4.1	Electron Conducting Polymers	7
1.4.2	Ion Conducting Polymers	9
1.5	Solvating Polymers	10
1.6	Poly(ethylene Oxide) PEO	12
1.7	PEO Content, Electrical Conductivity and Glass Transition Temperature (T_g)	15
1.8	How Is PEO produced?	16
1.8.1	Low molecular weight Polymer Synthesis	17
1.8.2	High molecular weight Polymer Synthesis	18
1.9	PEO- Salt Complexes	18
1.10	Preparation Techniques of PEO-Salt Complexes	20
1.10.1	Solution Casting method	20
1.10.2	Melt Method	20
1.11	Characteristics of PEO-Salt Complexes	20

1.11.1	Multiphase Behaviour	21
1.11.2	Description of Polymer Structure and Mobility	23
1.11.3	Morphology	23
1.11.4	Ionic Transport Mechanism	24
1.11.4.1	Some Empirical Relationships	24
1.11.4.2	Free Volume Theory And Configurational Entropy Models	26
1.11.4.3	Dynamic Bond Percolation Model: A Microscopic Theory	28
1.12	Phase changes	29
1.13	Mass Transport in Elastomer Phase	29
1.14	Factors which determine the ionic Conductivity	29
1.14.1	Tortuosity Factor	30
1.14.2	Effective Mobile Ion Concentration	30
1.15	Applications of PEO – salt complexes	32
1.15.1	Electrochemical sensors	32
1.15.2	Electrochromic Devices	33
1.15.3	Solid State Batteries	34
1.16	Objectives of the Present Work	36
Chapter 2: Experimental Methods		
2.1	Materials and Methods	38
2.1.1	Starting Materials	38
2.1.2	Synthesis of Triphenyltin Complexes	
2.1.3	Preparation of Polymer Electrolyte Films	39
2.2	Characterization Techniques	40
2.2.1	X-ray Diffraction	41

2.2.2	Infrared Spectroscopy	41
2.2.3	Impedance Spectroscopy	43
2.3	Ionic Transference Number Measurement	46
2.4	Cell characterization and discharge characteristics	47
Chapter 3: Characteristics Of PEO – Ph₃SnSCN complexes		
3.1	Introduction	49
3.2	XRD analysis	49
3.3	IR spectral analysis	54
3.4	Impedance spectroscopy analysis	59
3.4.1	Room temperature dependence of electrical conductivity	59
3.4.2	Complex Permittivity	66
3.4.3	Electrical modulus	69
3.4.4	Temperature Dependence of Electrical conductivity	72
3.5	Possible conduction mechanism	74
3.6	Ionic Transference number measurements	75
3.7	Solid state electrochemical cell fabrication	76
Chapter 4 Characteristics of PEO- [Ph₃SnCl₂]⁻ [Me₄N]⁺ Complexes		
4.1	Introduction	78
4.2	XRD analysis	78
4.3	IR spectral analysis	82
4.4	Impedance spectroscopy	85
4.4.1	Room temperature dependence of electrical Conductivity	85
4.4.2	Temperature dependence of electrical conductivity	91
4.4.3	Complex Permittivity	93
4.4.4	Electrical Modulus	94

4.5	Transference number measurements.	97
Chapter 5		
	Summary and conclusion	99
	References	102-111
