Abstract	ii
Abstrak	iii
Acknowledgements	v
Table of Contents	vi
List of Figures	viii
List of Tables	ix
List of Symbols and Abbreviations.....	x
Chapter 1: Introduction	1
1.1 Problem Statement	1
1.2 Objectives	1
1.2.1 Main Objective	1
1.2.2 Specific Objectives	2
1.3 Hypothesis	2
1.4 Scope of the study	2
1.5 Significance of the Study	3
Chapter 2: Literature Review	4
2.1 Introduction	4
2.2 Overview	4
2.3 Speech Recognition.....	6
2.3.1 Vowel Recognition	7
2.4 Neural Networks (NNs).....	8
2.4.1 Feed-forward Back Propagation Network	9
2.4.2 Elman Network.....	12
2.5 <i>K</i> -Fold Cross Validation.....	14
Chapter 3: Methodology	17
3.1 Introduction	17
3.2 Data Collection.....	17
3.3 Signal Preprocessing	18
3.3.1 Single-frame Analysis	18
3.3.2 Multi-frame Analysis.....	18

3.4 Constructing NN models	20
3.4.1 Input Matrix	20
3.4.2 Target Matrix	21
3.4.3 Test Matrix.....	22
3.4.4 Networks' Initialization	22
3.5 Training NN Models	25
3.6 Simulating NN Models.....	29
3.7 Output Processing	29
3.7.1 Output Preprocessing.....	29
3.7.2 Output Classification	30
3.7.3 Confusion Matrix.....	31
Chapter 4: Results and Discussion.....	32
4.1 Introduction	32
4.2 FFBP Results.....	32
4.2.1 Single-frame	32
4.2.2 Multi-frame.....	35
4.3 Elman Results.....	38
4.3.1 Single-frame	38
4.3.2 Multi-frame.....	41
Chapter 5: Conclusions and Future Works	44
5.1 Conclusions	44
5.2 Future Works.....	45
References.....	46
Appendix A: Matlab [®] Code	50
Appendix B: Recognition Rates' Results	55

List of Figures

Figure 2.1: Feed-forward Back Propagation Neural Network with two hidden layers	10
Figure 2.2: The architecture of Elman NN consisting of four layers: input, hidden, context and output	12
Figure 2.3: Schematic diagram shown the process of 3-fold cross validation	15
Figure 3.1: Block diagram illustrates data grouping	19
Figure 3.2: Flowchart summarizes the training and testing processes of single-frame vowels' samples	19
Figure 3.3: Network initialization window in Matlab® Neural Network Toolbox™	25
Figure 3.4: Window for assigning training parameters in Matlab® Neural Network Toolbox™	27
Figure 3.5: Training window in Matlab® Neural Network Toolbox™	28
Figure 4.1: Recognition rates (%) of each single-frame speech data using FFBP network.....	33
Figure 4.2: Recognition rates (%) of SF55ms speech data at different hidden neuron numbers using FFBP network	34
Figure 4.3: Recognition rates (%) of different frame size speech signals using FFBP network	36
Figure 4.4: Recognition rates (%) of 40ms frame size at different hidden neuron numbers using FFBP network	37
Figure 4.5: Recognition rates of each single-frame speech data using Elman network	39
Figure 4.6: Recognition rates (%) of SF35ms speech data at different hidden neuron numbers using Elman network	40
Figure 4.7: Recognition rates (%) of different frame size speech signals using Elman network	42
Figure 4.8: Recognition rates (%) of 100ms frame size at different hidden neuron numbers using Elman network	42

List of Tables

Table 2.1: List of Malay vowels	5
Table 2.2: Latest studies related to vowel recognition.....	8
Table 3.1: Networks' initialization parameters.....	23
Table 3.2: Training parameters for FFBP and Elman NNs.....	26
Table 3.3: Example of the confusion matrix.....	31
Table 4.1: Recognition rates (%) obtained for different single-frame data using FFBP network.....	32
Table 4.2: Confusion matrix of SF55ms speech data trained using 120 hidden neurons in FFBP network.....	34
Table 4.3: Recognition rates (%) obtained for different frame size data using FFBP network.....	35
Table 4.4: Confusion matrix of MF40ms speech data trained using 60 hidden neurons in FFBP network.....	38
Table 4.5: Recognition rates (%) obtained for different single-frame data using Elman network.....	38
Table 4.6: Confusion matrix of SF35ms speech data trained using 20 hidden neurons in Elman network.....	40
Table 4.7: Recognition rates (%) obtained for different frame size data using Elman network.....	41
Table 4.8: Confusion matrix of MF100ms speech data trained using 80 hidden neurons in Elman network.....	43
