

List of Tables

Table	Title	Page
1.1	Identified microfungual species reported from terrestrial habitats of maritime and sub-Antarctica (Vishaniac, 1996).	8
2.1	Present soil samples exact location by GPS, date of collection and descriptions if any.	25
3.1	Percentage of occurrence of successfully isolated fungi from soil of Deception Island, Wilhelmina Bay and Yankee Bay and their optimum growth temperatures.	34
3.2	Preliminary screening results of fungal bioactivity on the test microorganisms using plug assay method.	38
3.3	List of the selected fungal species used in the disc diffusion method.	41
3.4	Biological activity of fungal extracts, Chloramphenicol and Dimethyl Sulfoxoid on test microorganisms in millimeters using disc diffusion method.	42
3.5	Quantified values of MICs and MBCs of fungal extracts against test microorganisms in broth microdilutions method.	47

Symbols and Abbreviations

%	Percentage
°C	Degree centigrade
<i>B. cereus</i>	<i>Bacillus cereus</i>
<i>B. subtilis</i>	<i>Bacillus subtilis</i>
BaCl ₂	Barium chloride
C	Carbon
<i>C. albicans</i>	<i>Candida albicans</i>
CA	Antibiotic C3368-A
CFU	Colony Forming Unit
cm	Centimeter
CO ₂	Carbon Dioxide
DMSO	Dimethyl Sulfoxoid
<i>E. coli</i>	<i>Escherichia coli</i>
EPS	Exopolysaccharide
EtOAc	Ethyl Acetate
g	Gram
GPS	Global Positioning System
H ₂ O	Water
H ₂ SO ₄	Sulphuric acid
IPY	International Polar Year
km	Kilometer
LBA	Luria Base Agar
M	mole
mbar	millibar
MBC	Minimum Bactericidal Concentration

MERGE	Microbiological and Ecological Response to Global Environmental changes in polar regions
MFC	Minimum Fungicidal Concentration
mg	Miligram
MIC	Minimum Inhibitory Concentration
ml	Mililitre
mm	Milimetre
NMR	Nuclear Magnetic Resonance spectroscopy
N	Nitrogen
NCCLS	National Committe of Clinical Laboratory Standards
No.	Number
P	Phosphate
<i>P. aeruginosa</i>	<i>Pseudomonas aeruginosa</i>
PDA	Potato Dextrose Agar
pH	Potential of Hydrogen
rpm	Round Per Minute
S	South
<i>S. aureus</i>	<i>Staphylococcus aureus</i>
<i>S. cerevisiae</i>	<i>Saccharomyces cerevisiae</i>
<i>S. pombe</i>	<i>Schizosaccharomyces pombe</i>
SDA	Saboraud Dextrose Agar
sp	Species
UV	Ultra Violet
W	Weast
w/v	Weight Per Volume
µg	Microgram
µl	Microlitre

Acknowledgement	i
Abstract	iii
List of Figures	v
List of Tables	vii
List of symbol and abbreviations	viii
List of content	x

Chapter One

1. Introduction	1
1.1. Introduction to Antarctica	
1.1.1. Terrestrial biogeography of antarctica	
1.1.2. Terrestrial Microbial life	3
1.1.3. Biodiversity of terrestrial microfungi	5
1.1.4. Role of antarctic fungi in polar ecosystem	9
1.1.5. Impact of climate changes on antarctic terrestrial life	11
1.2. Influence of fungal ecology in the search of novel bioactive natural products	14
1.3. Natural products and fungi	16
1.3.1. Importance of natural products	
1.3.2. Why fungi?	17
1.3.2.1. Fungal account on the biological activity	18
1.3.2.2. Biological activity of antarctic fungi	19
1.4. The research objectives	22

Chapter Two

2. Materials and Methods	23
2.1. Materials	
2.2. Methods	26
2.2.1. Isolation of fungi from soil – Soil Plating Technique	
2.2.2. Bioactivity screening	27

2.2.2.1. Preliminary screening-Plug assay	
2.2.2.1.1. Inoculums preparation-growth method	
2.2.2.1.2. Preparation of 0.5 McFarland standard	28
2.2.2.2. Qualitative Assay - Disc Diffusion Method	
2.2.2.2.1. Fungal cultivation and extracellular metabolites extraction	29
2.2.2.3. Quantitative assays – MIC, MBC and MFC	30
2.2.2.3.1. Minimum inhibitory concentration (MIC)	
2.2.2.3.2. Minimum Bactericidal Concentration (MBC) and Minimum Fungicidal Concentration (MFC)	31

Chapter Three

3. Results	32
3.1. Occurrence of microfungi in soil samples	
3.2. Bioactivity Screening	37
3.2.1. Preliminary screening - Plug assay	
3.2.2. Qualitative assay - Disc diffusion method	41
3.2.3. Quantitative assays – Broth microdilutions method	45
3.2.3.1. Minimum inhibitory concentrations (MIC)	
3.2.3.2. Minimum bactericidal concentration (MBC) and Minimum fungicidal concentration (MFC)	46

Chapter Four

4. Discussion	48
4.1. Occurrence of soil microfungi in Maritime Antarctica	
4.2. Antimicrobial activity of maritime antarctic microfungi	51

Chapter Five

5. Conclusions	55
