Abstract

This research provides an environment for requirements analysis process to be conducted utilizing the Internet without jeopardizing on the collaborative involvement of the stakeholders. The result of the research was a web-based groupware supported requirements analysis tool, named Groupware Supported Requirements Analysis Tool or GRAT for short. GRAT supports the requirements analysis stage in a typical Software Development LifeCycle (SDLC) to review on what the proposed system will do and how it will fit into the target environment. The major activity of this stage is to review and confirm the documents that define the system, called the Functional Requirement Document or FRD. Being web-based, the constraint on time and space is very much reduced if not eliminated. In pursuit to reaching the objective, literature review was carried out focusing on requirements analysis methods and the tools that support the respective methodologies. Along the way, a very modular requirements analysis methodology was chosen to be used as the framework for the requirements analysis tool. This requirements analysis methodology was introduced by Ian Sommerville and has been the *de facto* standard in the commercial software development industry. The analysis and the design for GRAT were based on the object-oriented paradigm with the use of use-case diagrams, class diagrams and interaction diagrams. The implementation was carried out using Lotus Notes/Domino Release 5 as the back end and Microsoft Internet Explorer version 5 and above for the front end. The system was tested by two different groups of students who use the tool to cater for their class project and assignment. The result of the testing was captured through a number of questionnaires needed to be answered by the participants. The result were analyzed in order to understand the useful features of GRAT and to identify the areas for GRAT is to be improved or further developed in future.

Abstract.....	i
Contents	ii
List of Figures	v
List of Tables	viii
CHAPTER 1: Introduction	1
1.1 Requirements Analysis	1
1.2 Requirements Analysis Definitions	1
1.3 Requirements Analysis Objective	4
1.4 Requirements Analysis Benefits	5
1.5 Requirements Analysis Difficulties	6
1.6 Easing Requirements Analysis Difficulties	8
1.7 Groupware.....	9
1.8 Research Motivation	11
1.9 Research Objective	11
1.10 Research Importance.....	12
1.11 Research Scope	12
1.12 Methodology	13
1.13 Thesis Organization	15
CHAPTER 2: Review on Requirements Analysis and Groupware	18
2.1 Introduction.....	18
2.2 Requirements Analysis	18
2.2.1 Goal Based Requirements Analysis.....	18
2.2.2 Win-Win Requirements	25
2.2.3 Inquiry cycle	34
2.2.4 KJ	37
2.2.5 Summary of the reviewed methodologies and tools	40
2.3 Groupware.....	41
2.3.1 Definition of Groupware	42
2.3.2 Groupware Parameters.....	44
2.3.3 Groupware Taxonomy	46
2.3.4 Importance of Groupware	49
2.3.5 Groupware Design	50
2.3.6 Performance and Acceptance of Groupware Application.....	51
2.3.7 Groupware for Requirements Analysis.....	53
2.4 Research Framework	55
2.4.1 Requirements Analysis Method	55
2.4.2 Groupware Supported	59
2.4.3 Implementing a web-based tool	60
2.4.4 Evaluating GRAT	62
2.5 Summary	62
CHAPTER 3: Groupware Support for a Requirements Analysis Model.....	63
3.1 Introduction.....	63
3.2 GRAT Architecture.....	63
3.2.1 Domain Understanding	65
3.2.2 Requirements Collection.....	65

3.2.3	Classification.....	66
3.2.3.1	Categories Collection.....	66
3.2.3.2	Classification.....	67
3.2.4	Conflict Resolution.....	68
3.2.5	Prioritization.....	69
3.2.6	Requirements Validation.....	70
3.3	The Role of Project Manager.....	71
3.4	Summary.....	73
CHAPTER 4: GRAT Analysis and Design.....		74
4.1	Introduction.....	74
4.2	GRAT Analysis.....	74
4.2.1	Requirements Analysis.....	74
4.2.1.1	Functional Requirements.....	74
4.2.1.2	Non-Functional Requirements.....	80
4.2.2	Object-Oriented Analysis.....	81
4.3	GRAT Design.....	82
4.3.1	GRAT Architecture.....	82
4.3.1.1	The Presentation Layer.....	82
4.3.1.2	The Application Layer.....	82
4.3.2	Object-Oriented Design.....	82
4.4	Summary.....	83
CHAPTER 5: GRAT Implementation and Execution.....		84
5.1	Introduction.....	84
5.2	Implementation.....	84
5.2.1	Environment.....	84
5.2.1.1	Lotus Domino and Lotus Notes.....	84
5.2.1.2	Formula.....	87
5.2.1.3	Lotus Script.....	87
5.2.1.4	Internet.....	89
5.2.1.5	HyperText Markup Language (HTML).....	90
