<b>TITLE</b>	i
<b>ABSTRACT</b>	ii
<b>ACKNOWLEDGEMENTS</b>	iii
<b>CONTENTS</b>	v
<b>LIST OF TABLES</b>	ix
<b>LIST OF FIGURES</b>	x
<b>CHAPTER I: INTRODUCTION</b>	1
1.1 The need for biodegradable plastic	1
1.2 Biodegradation	4
1.2.1 The importance of biodegradation	4
1.2.2 Standard definitions & methods to evaluate biodegradability	5
1.2.3 The sequence of biodegradation tests	9
1.3 Biodegradable plastics in the market	12
1.4 Polyhydroxyalkanoates (PHA)	13
1.4.1 Biodegradation of PHA	15
1.4.2 Factors affecting biodegradation of PHAs	16
1.4.3 Biodegradability tests of PHAs and other related tests	16
1.5 Scope & objective based on biodegradation in environment management system	18

<b>CHAPTER II: MATERIALS AND METHODS</b>	21
2.1 PHA biosynthesis	21
2.1.1 Bacterial stain	21
2.1.2 Strain maintenance	21
2.1.3 Inoculum	21
2.1.4 Media and growth conditions	21
2.1.4.1 Palm kernel oil	22
2.1.4.2 Saponification of PKO	23
2.1.5 PHA extraction and PHA film casting	23
2.2 Biodegradability test	24
2.2.1 Sampling river water	24
2.2.2 Inoculum preparation	24
2.2.3 Biodegradability experimental design	25
2.2.4 Initial medium analysis – cell count, pH and DOC	29
2.2.4.1 Cell count	29
2.2.5 Test materials	29
2.2.6 CO <sub>2</sub> analysis and final day river water analysis – cell count, pH , DOC and GC	30
2.2.6.1 DOC measurement for river water	31
2.2.6.2 Gas chromatography (GC) of river water	31
2.2.7 PHA sample analysis	33
2.2.7.1 Dry weight	33
2.2.7.2 Scanning electron microscopy (SEM) & phase-contrast microscopy	33
2.2.7.3 Purification of incubated PHA films	33

2.2.7.4	Infrared (IR) spectrometry	34
2.2.7.5	Molecular weight by gas permeation chromatography (GPC)	34
2.2.7.6	Monomer composition by gas chromatography (GC)	34
<b>CHAPTER III: RESULTS AND DISCUSSION</b>		<b>35</b>
3.1	Preliminary studies	35
3.2	PHA inherent biodegradability studies	50
3.2.1	CO <sub>2</sub> released	50
3.2.2	Viable cell count and pH	53
3.2.3	Dissolved organic carbon (DOC) in river water	56
3.2.4	GC analysis of river water	58
3.2.5	PHA dry weight	60
3.2.6	Scanning electron micrograph (SEM)	62
3.2.7	Infrared (IR) spectrometry analysis	68
3.2.8	Molecular weight by gas permeation chromatography (GPC)	73
3.2.9	Monomer composition of PHA by gas chromatography (GC)	73
<b>CHAPTER IV: CONCLUSION</b>		<b>78</b>

<b>APPENDIX</b>	82
1 Experimental set up of Sturm test	82
2 Calculation of %CO <sub>2</sub> -biodegradability	83
3 Standard Curves for methyl ester of 3-hydroxyalkanoic acid	84
4 Calculation of %w/w and %mole of monomer composition in PHA from GC of PHA sample	90
5 Calculation of PHA molecular weight & theoretical carbon dioxide released from 100% degradation of PHA	92
