Abstract xiii

1 Introduction 1

1.1 Software Problems 1
1.2 Software Engineering Goals 3
1.3 Motivation for this project 3
1.4 Objectives of this project 4
1.5 Thesis Organization 5

2 Literature Review of Structured And Object-Oriented Methodologies 6

2.1 History of Structured Methodologies 6
2.1.1 Problems with SDLC 7
2.1.2 Bottom-up Implementation Problems 7
2.1.3 Problems with Freezing of Specifications 8
2.1.4 High Maintenance Costs 9
2.1.5 Lack of Structured Techniques 9
2.1.6 Failure to Meet User Requirements 9
2.1.7 Communication Problems 10
2.1.8 Problems with Functional Specifications 10
2.1.9 Purpose and Goals of Structured Methodologies 11
2.1.10 Structured Paradigm 11
2.1.10.1 Data Flow Diagram (DFD) 11
2.1.10.2 The External Entity 12
2.1.10.3 The Data Store 12
2.1.10.4 The Data Flow 13
2.1.10.5 The Process 13
2.1.11 Data Dictionary 14
2.1.12 Process Specifications 14
2.1.12.1 Structured English 15
2.1.12.2 Decision Tables 16
2.1.12.3 Decision Tree 16
2.1.13 Entity-Relationship Diagram (ERD) 17
2.1.13.1 Entity Sets 18
2.1.13.2 Relationship Sets 18

2.1.13.3 Attributes 19
2.1.14 State-Transition Diagram (STD) 19
2.1.14.1 States 20
2.1.14.2 State-Changes 20
2.1.15 Structure Chart 21
2.1.16 Top-down Decomposition 23
2.1.17 Structured Methods 25
2.1.17.1 Structured Analysis/Structured Design (SA/SD) 25
2.1.17.2 Other Structured Methods 28

2.2 Object Oriented Methodologies 29

2.2.1 History of Object-Orientation 29
2.2.2 Object-Oriented Paradigm 31
2.2.2.1 Object 32
2.2.2.2 Object Type 33
2.2.2.3 Instance 33
2.2.2.4 Operation 34
2.2.2.5 Method 35
2.2.2.6 Encapsulation 35
2.2.2.7 Requests 36
2.2.2.8 Messages 37
2.2.2.9 Class 37
2.2.2.10 Abstract Data Type (ADT) 38
2.2.2.11 Inheritance 38
2.2.2.12 Polymorphism 39
2.2.2.13 Binding 40
2.2.2.14 Link 41
2.2.2.15 State 41
2.2.2.16 Events 42
2.2.2.17 Association 42
2.2.2.18 Aggregation 42
2.2.2.19 Generalization 43
2.2.2.20 Terminologies Used By Language Implementation 44
2.2.3 Object-Oriented Methods 45
2.2.3.1 Coad & Yourdon OOA & OOD 45
2.2.3.1.1 Four Components, Four Activities 46
2.2.3.1.2 Five Layers, Five Activities 47
2.2.3.2 Other Object-Oriented Methods 51

Comparison of Methodologies 52

2.3.1 Similarities 52
2.3.1.1 Entity and Object 53
2.3.1.2 Attributes of Entities and Objects 53
2.3.1.3 Entity and Object Types 54
2.3.1.4 Entity and Object Instances 54

2.3.2 Differences 54
2.3.2.1 Process-Oriented Versus Object Models 54
2.3.2.2 Top-down Versus Bottom-up Techniques 56
2.3.2.3 Solution versus Problems (Differences in Paradigms) 56
2.3.3 Project Management Points of View of Object-Oriented Methodologies 57
2.3.3.1 Benefits 57
2.3.3.1.1 Short Development time 57
2.3.3.1.2 Higher Quality Software 58
2.3.3.1.3 Easier Maintenance 58
2.3.3.1.4 Lower Development and Maintenance Costs 58
2.3.3.2 Risks 59
2.3.3.2.1 Learning Curves 59
2.3.3.2.2 High Training Cost 59
2.3.3.2.3 High Software Cost 59
2.3.3.2.4 High Design Cost 60
2.3.3.2.5 Lack of Supporting CASE Tools 60
2.3.3.2.6 Lack of Tools for Mapping Requirements Specification 60
2.3.4 Guidelines for Adopting Object-Oriented Methodologies 60
2.3.5 Conclusion 61

3 Hybrid Convergence Analysis for Large Scale Projects 62

3.1 Introduction 62
3.2 Conventional Versus OO Approach 63
3.2.1 Strengths of OO Methodologies 64
3.2.2 Weaknesses of OO Methodologies 66
3.2.3 Weaknesses of Structured Methodologies 67
3.2.4 Strengths of Structured Methodologies 69
3.3 Analysis Principles 70
3.4 Hybrid Convergence Model for Large Scale Systems 71
3.4.1 Prototyping 74
3.4.2 User Involvement 77
3.5 Justification for The Hybrid Convergence Model 77
3.6 Conclusion 80

4 Hybrid Convergence Analysis Model 81

4.1 Introduction 81
4.2 Level 1 Analysis Concepts 84
4.2.1 System 84
4.2.2 Process 85
4.2.3 Class (CRD) 86
4.3 Relationships 91
4.3.1 Class Inheritance (Generic-Specific) 91
4.3.2 Possession 93
4.3.3 Association 97
4.4 Level 2 Analysis 99

4.5 Level 2 Analysis Concepts 102
4.5.1 System Interaction Diagram (SID) 102
4.5.1.1 Object Interaction Diagram (OID) 105
4.5.1.2 State-Evolution (SED) 110
4.5.1.3 Definitions 110
4.6 Conclusion 113

5 Development of A Hybrid Analysis CASE Tool 115

5.1 Introduction 115
5.2 Computer-Aided Software Engineering (CASE) 115
5.2.1 The Goals of CASE 116
5.2.2 CASE Environment 116
5.3 CASE Tools 117
5.4 Benefits of CASE Tools 118
5.4.1 Reducing Development Time and Costs 118
5.4.1.1 Accelerate the Drawing of Diagrams 118
5.4.1.2 Accelerate the Generation of Documentation 118
5.4.1.3 Accelerate the Creation of Systems 118
5.4.1.4 Accelerate the Validation of Data 118
5.4.2 Improving Software Quality 119
5.4.2.1 Consistent Diagrams 119
5.4.2.2 Completeness of the Development Process 119
5.4.2.3 Standard Conformance 119
5.4.2.4 Correctness of the Programming Code 119
5.4.3 Reducing Maintenance Time and Costs 120
5.5 Risks of CASE Tools 120
5.5.1 Lack of Support for Full Development Life Cycle 120
5.5.2 Lack of Integrated Project Support Environment 120
5.5.3 Lack of Support for Complete System Code Generation 120
5.5.4 Lack of Short-term Benefits 121
5.6 Integration of CASE and Object-Oriented Technologies 121
5.6.1 Automation of Reusable Software Components 121
5.6.2 Automation of Transition of Phases 122
5.6.3 Showing and Hiding Details 122
5.6.4 Generation Complete Software Code 122
5.6.5 Object-Oriented Repository 122
5.7 Lack of Object-Oriented CASE Tools 123
5.8 The HYCONAN CASE Tool 123
5.9 The "Baseball" Model of System Development 123
5.10 A Hybrid Convergence Analysis/Hybrid Convergence Design CASE System 124
5.11 Model Development 126
5.12 The Requirements of the Hybrid Convergence Analysis Graphics Editor 127
5.13 Method Modelling using MetaEdit 129
5.14 The Structure of the Meta-Metamodel 131
5.15 Metamodels of HYCONAN's Diagramming Techniques 134
5.16 The Draw Window 138

5.17 Conclusion 140
6 Conclusion 141

6.1 Future of Systems Analysis, Design and Methodologies 141
6.1.1 Research Relating to Analysis, Design and Methodologies 141
6.2 Contributions 143
6.3 Limitations and Future Research 144
6.4 Final Analysis 145

Appendix A 146

A.1 Information Engineering Analysis (IE) 146
A.2 Structured Systems Analysis and Design Method (SSADM) 150
A.3 Structured Analysis and Design Techniques (SADT) 150
A.4 Information Systems Activity and Change Analysis (ISAC) 151
A.5 Jackson System Development (JSD) 151
A.6 Nijssen's Information Analysis Method (NIAM) 152
A.7 Mascot-3 152

Appendix B Other Object-Oriented Methodologies 153

B.1 Booch Object-Oriented Design (OOD) 153
B.2 Object-Oriented Modelling and Design (OMT) 155
B.3 Wirfs-Brock et al. Responsibility-Driven Design (RRD) 157
B.4 Shlaer and Mellor Object-Oriented Systems Analysis (OOSA) 160
B.5 Bailin Object-Oriented Requirements Specification Method (OOS) 163

Appendix C Case Studies 165

C.1 Case Study One 165
C.2 Case Study Two 168
C.3 Case Study Three 175
C.4 Case Study Four 179

Appendix D 184
