| <br><b>CHAPTER</b>                                       |      |
| I      INTRODUCTION                                      | 1    |
| 1.1 Overview   | 1    |
| 1.2 Objectives   | 4    |
| 1.3 Scope of the System                                  | 4    |
| 1.4 System Design Methodology                            | 6    |
| 1.5 Project Schedule                                     | 8    |
| II     LITERATURE REVIEW                                 | 9    |
| 2.1 Web-based Assessment Solution Development            | 9    |
| 2.2 Web-based Examination Available on the Internet      | 10   |
| 2.2.1 Educational Testing Service                        | 10   |
| 2.2.2 Questionmark                                       | 11   |
| 2.2.3 Pastel Software                                    | 11   |
| 2.2.4 The Computer-based TOEFL Test                      | 12   |
| 2.3 Understanding the World Wide Web (WWW)               | 14   |
| 2.4 Web Security   | 16   |
| 2.4.1 Client Side Security                               | 16   |
| 2.4.1.1 Secure Sockets Layer (SSL)                       | 17   |
| 2.4.1.2 Secure Electronic Transaction (SET)              | 18   |
| 2.4.2 Server-side Security                               | 19   |
| 2.4.2.1 Firewall   | 21   |
| 2.4.3 Information Security                               | 22   |
| 2.5 Potential Threats to the Proposed Web-based Solution | 22   |
| 2.6 Understanding Virtual Private Network (VPN)          | 25   |
| 2.6.1 Virtual Private Network Protocol                   | 27   |
| 2.6.1.1 Tunneling  | 27   |
| 2.6.1.2 Point-to-point Tunneling Protocol                | 29   |
| 2.7 Potential Attack Against VPN Development             | 32   |
| 2.8 The Examination Syndicate of Malaysia                | 33   |
| 2.9 Information Technology Subject for SPM Examination   | 33   |
| III    SYSTEM ANALYSIS                                   | 35   |
| 3.1 The Existing System                                  | 35   |

|       |  |    |
|-------|--|----|
| 3.1.1 | Examination Overview                       | 35 |
| 3.1.2 | Examination Management                     | 36 |
| 3.2   | Proposed System                            | 38 |
| 3.2.1 | Overview of the Proposed System            | 38 |
| 3.2.2 | VPN Establishment                          | 39 |
| 3.2.3 | The Examination Web Page                   | 39 |
| 3.2.4 | Data Transfer                              | 40 |
| 3.2.5 | Authentication                             | 41 |
| 3.2.6 | Multiple-delivery                          | 41 |
| 3.2.7 | Scoring                                    | 42 |
| 3.3   | Requirement Definition                     | 42 |
| 3.3.1 | Functional Requirements                    | 42 |
| 3.3.2 | Non-functional Requirements                | 45 |
| 3.4   | Consideration on VPN Implementation        | 47 |
| 3.4.1 | Why Microsoft VPN?                         | 47 |
| 3.4.2 | Microsoft VPN Implementation Consideration | 48 |
| 3.4.3 | Microsoft VPN Security Features            | 50 |
| 3.5   | Example of a Microsoft VPN Client Setup    | 52 |
| 3.6   | Example of a Microsoft VPN Server Setup    | 56 |
| 3.7   | Software Requirements                      | 59 |
| 3.8   | Hardware Requirement                       | 60 |
| IV    | SYSTEM DESIGN                              | 61 |
| 4.1   | Process Design                             | 61 |
| 4.2   | User Interface Design                      | 64 |
| 4.2.1 | Screen Design                              | 65 |
| 4.2.2 | Examination Page Screen                    | 68 |
| 4.3   | Database Design                            | 70 |
| 4.4   | Data Dictionary                            | 70 |
| V     | SYSTEM IMPLEMENTATION                      | 73 |
| 5.1   | VPN Implementation Overview                | 73 |
| 5.2   | VPN Deployment                             | 74 |
| 5.2.1 | The Examination Center VPN Gateway         | 75 |
| 5.2.2 | RRAS Installation                          | 76 |
| 5.2.3 | Installation                               | 78 |
| 5.2.4 | Router-to-router Connection                | 79 |
| 5.2.5 | Internet Connection                        | 80 |
| 5.2.6 | PPTP Connection                            | 81 |
| 5.2.7 | Routing Information                        | 84 |
| 5.3   | Managing VPN                               | 85 |
| 5.3.1 | Managing User                              | 85 |
| 5.3.2 | Managing Address                           | 86 |
| 5.3.3 | Managing Access                            | 86 |
| 5.3.4 | Managing Authentication                    | 86 |
| 5.3.5 | Session Log Management                     | 87 |

|          |  |     |
|----------|--|-----|
| 5.4      | The Router-to-Router Connection Procedure in an On-line Examination                              | 87  |
| 5.5      | VPN Implementation   | 89  |
| 5.5.1    | VPN Connection Print-screen  | 89  |
| 5.5.2    | Assessing the Examination Web Page   | 94  |
| 5.6      | The On-line Examination Web Page Development   | 96  |
| 5.6.1    | Scripting Language   | 96  |
| 5.6.2    | Database Connection  | 97  |
| 5.6.3    | System Coding  | 98  |
| 5.6.3.1  | Candidates Authentication  | 98  |
| 5.6.3.2  | Define Path to Database  | 99  |
| 5.6.3.3  | Using Database or Hard Code Option   | 100 |
| 5.6.3.4  | Retrieve Question from Database  | 101 |
| 5.6.3.5  | Retrieve Question  | 101 |
| 5.6.3.6  | Retrieve Array of Answers  | 102 |
| 5.6.3.7  | Question Number  | 103 |
| 5.6.3.8  | Function that Convert Response to Appropriate Letter   | 103 |
| 5.6.3.9  | Function to Get the Answer String According to the Last Entered Value of the Particular Question | 104 |
| 5.6.3.10 | Progress Bar   | 105 |
| 5.6.3.11 | Scoring  | 106 |
| 5.6.3.12 | Result   | 108 |
| 5.7      | Hardware   | 109 |
| 5.8      | Software   | 109 |
| VI       | SYSTEM TESTING   |     |
| 6.1      | System Testing Overview  | 111 |
| 6.2      | Test Case Design   | 111 |
| 6.2.1    | Unit Testing   | 112 |
| 6.2.2    | Integration Testing  | 112 |
| 6.2.3    | System Testing   | 112 |
| 6.3      | User Acceptance Test   | 113 |
| 6.4      | Data Analysis on Student Responds  | 115 |
| VII      | CONCLUSION AND RECOMMENDATION  |     |
| 7.1      | Problem Encountered and Solution   | 121 |
| 7.1.1    | Research and Background Study  | 121 |
| 7.1.2    | System Analysis  | 123 |
| 7.1.3    | System Implementation  | 124 |
| 7.2      | System Advantages  | 124 |
| 7.3      | System Security  | 125 |
| 7.4      | User Friendliness  | 125 |
| 7.5      | Future Enhancement   | 126 |
| 7.6      | Overall Conclusion   | 126 |

|              |     |

## **LIST OF TABLES**

| <b>Table</b> |   | <b>Page</b> |
|--------------|---|-------------|
| 2.1          | Typical Network Threats                                 | 24          |
| 4.1          | Gane and Sarson Data Flow Diagram Legend                | 62          |
| 4.2          | Database General Profile                                | 70          |
| 4.3          | Database structure for members table                    | 71          |
| 4.4          | Database structure for questions table                  | 71          |
| 4.5          | Database structure for quizzes table                    | 72          |
| 4.6          | Database structure for result table                     | 72          |
| 5.1          | Web page file description                               | 97          |
| 5.2          | Hardware used to develop the on-line examination system | 109         |
| 5.3          | Software used to develop the on-line examination system | 110         |

## **LIST OF FIGURES**

| <b>Figure</b> |  | <b>Page</b> |
|---------------|--|-------------|
| 1.1           | Rapid prototyping  | 7           |
| 1.2           | Project schedule Gantt chart                                     | 8           |
| 3.1           | Microsoft VPN component selections                               | 52          |
| 3.2           | Microsoft VPN network configuration                              | 53          |
| 3.3           | VPN connection setup interface                                   | 54          |
| 3.4           | Defining the VPN host  | 55          |
| 3.5           | VPN connection interface   | 56          |
| 3.6           | Network protocol selections                                      | 57          |
| 3.7           | PPTP configurations  | 57          |
| 3.8           | Setup message  | 58          |
| 3.9           | Remote access port setup   | 58          |
| 3.10          | Port usage configuration   | 59          |
| 4.1           | Information Technology On-line examination Through VPN Data Flow | 63          |
| 4.2           | Main page module   | 66          |
| 4.3           | Candidate authentication interface                               | 67          |
| 4.4           | The Examination Screen Module                                    | 68          |
| 4.5           | The Examination Page Interface                                   | 69          |
| 5.1           | RRAS services  | 78          |
| 5.2           | Interface credential setup                                       | 81          |
| 5.3           | PPTP dial up Protocols and Security checkbox                     | 82          |
| 5.4           | Routing and Remote Admin   | 84          |

|      |  |     |
|------|--|-----|
| 5.5  | Two routers involve in VPN connection implementation in The Information System Lab, University of Malaya | 89  |
| 5.6  | VPN dial-up connection property  | 90  |
| 5.7  | User credential dialog box   | 90  |
| 5.8  | Interface of demand-dial when connecting to the remote server  | 91  |
| 5.9  | A Window pop-up shows the registration of the remote host to the network.                                | 92  |
| 5.10 | A Window pop-up shows the VPN is connected   | 92  |
| 5.11 | A Window pop-up shows the VPN connection status  | 93  |
| 5.12 | A Window pop-up shows the details of VPN connection status   | 93  |
| 5.13 | Efac 07 web server directory   | 94  |
| 5.14 | Information Technology examination main page   | 95  |
| 5.15 | Information Technology examination web page access from efac 07 computer web server through VPN          | 95  |
| 6.1  | Instruction given on the examination web page  | 115 |
| 6.2  | Authentication method applied on the web page  | 116 |
| 6.3  | Smooth web browsing after candidates are verified  | 116 |
| 6.4  | User friendliness of the software  | 117 |
| 6.5  | Examination response submission method   | 117 |
| 6.6  | Errors on the web solution   | 118 |
| 6.7  | Web solution access time   | 118 |
| 6.8  | Possibility of web page hacking by the candidates  | 119 |
| 6.9  | Suitability of the web solution to be implemented as the Information Technology examination solution     | 119 |
| 6.10 | Respondents trust on the marking done by the server  | 110 |
