## DECLARATION

I declare that this dissertation is my own work and has not been submitted in any form for another degree or diploma at any university or other institute of tertiary education. Information derived from the published and unpublished work of others has been acknowledged in the text and a list of references is given.

Kasthuri Subaramaniam

May, 2000

## ACKNOWLEDGEMENTS

*It is with the Grace of God that I have been able to complete this dissertation and the Masters program.*

This dissertation could not have been written without the help, encouragement, and support of many people. I am indeed indebted to a number of people who provided helpful and constructive comments and suggestions during the project. I would like to take this opportunity to express my deepest gratitude to each and everyone that has helped and guided me.

My sincere thanks and appreciation go beyond words to my supervisor, Associate Professor Dr. P. Sellappan for his encouragement and support in many ways. I am grateful to Associate Professor Dr. Pooi Ah Hin, from the Statistics Department of the Department of Mathematics, Faculty of Science, University of Malaya for the advice on the statistical aspects of this project. I am also thankful to Mr. Alan Riley, Senior Software Engineer of Stata Corporation at the University Dr. East, Texas for the guidance on the statistical package, Stata used in this project.

I would also like to thank Ms. Alice Joseph, Research Officer and Ms. Matilda Cruz, Publications Executive from the Malaysian Medical Association for their kind help, especially in providing some medical facts. I am also grateful to Mr. Razali and Ms. Elina from the University Hospital, Kuala Lumpur and Mr. Samiun bin Sarif, Assistant Medical Officer from the Ipoh General Hospital, Perak for their co-operation.

I would like to extend a warm thank you to Ms. Caroline Lee from the Pantai Medical Centre, Kuala Lumpur for providing a list of medical expertise at each department. I am also very grateful to all of the respondents from the medical centres for their timely response as the success of this project depended on them, too. I would like to record my sincere appreciation of the help given by the general practitioners and hospital administrative staff towards the evaluation of the MediX system.

I would also like to express my gratitude to my friends whose encouragement and guidance meant a great deal, especially during the development of the system. I would like to convey warm thanks to Mrs. Koh Swee No and Mr. Sim Kim Ha for their co-operation and assistance at the faculty.

Last but not least, I am truly grateful to my family members, whom have given a lot of encouragement and support during the development of the system and the write-up of this dissertation.

**"THANK YOU!"**

## ABSTRACT

*"As the society becomes increasingly dependent on computers, the demand for software system grow to be more complex than probably any other human artifact"*

[Demirors et al., 1992]

This dissertation presents a system for keeping track of medical expertise as well as demonstrates the integration of different tools in a single application. MediX, a system to keep track of medical expertise, maintains the records of medical expertise, medical centres and specialties. MediX uses reporting, statistical, database, and authoring tools that are integrated in a programming package running under an operating system. MediX is a client/server-based system that has many significant features.

MediX provides the tools necessary to view existing information in new forms and combinations. These include generation of reports, charts and graphs as well as statistical computing, all in a single application. The health care administrators can present the results of calculations and information processing in clear, concise and meaningful formats. In addition, MediX assists users in their search for information by providing details of the medical expertise.

This study employs two modes of research activities comprising of survey questionnaires and interviews. These two methods were used to gather information pertaining to the project. The survey and interviews were conducted on the medical centres in Malaysia.

An evaluation of the usefulness of MediX to the medical community as well as to the general population was also undertaken. The results show that MediX is well accepted by all of them. Hence, MediX can make IT's contribution with respect to the quality of health care. In addition, MediX has proved that it is possible to integrate various tools in a single system.

In short, this study plays a crucial role in promoting the development of a health care information system and the integration of different tools.

## TABLE OF CONTENTS

ACKNOWLEDGEMENTS .....	i
ABSTRACT .....	iii
TABLE OF CONTENTS .....	v
LIST OF FIGURES.....	x
LIST OF TABLES.....	xiii
LIST OF ABBREVIATIONS .....	xvi
 CHAPTER 1 : INTRODUCTION .....	 1
1.1 Definition of the Title .....	1
1.2 Problem Domain.....	2
1.3 Objectives of the Project.....	3
1.4 Sequence of Tasks .....	4
1.5 Research Methodology .....	5
1.6 Contents of Dissertation .....	6
 CHAPTER 2 : REVIEW OF LITERATURE.....	 8
2.1 Introduction.....	8
2.2 Definition of Terms .....	8
2.3 General Review on Medical Expertise .....	10
2.3.1 Roles of Medical Expertise .....	10
2.3.2 Facts on Medical Expertise.....	11
2.3.3 Primary Health Care Model.....	11
2.4 Medical Organizations.....	13
2.4.1 Malaysian Medical Association (MMA).....	13
2.4.2 American Medical Association (AMA) .....	14

2.5	Reviews on Existing Systems.....	14
2.5.1	AMA Physician Select - On-Line Doctor Finder .....	14
2.5.2	Find A PM&R Physician.....	16
2.5.3	Doctors On Call.....	17
2.5.4	Find A Surgeon.....	17
2.5.5	Find An Ophthalmologist.....	18
2.5.6	Summary of Findings .....	19
2.6	Proposed Tools for Development.....	21
2.6.1	Microsoft Visual Basic 6.0 Professional Edition .....	21
2.6.2	Microsoft Access 97 .....	23
2.6.3	Seagate Crystal Reports 6.0.....	24
2.6.4	Intercooled Stata 6.0.....	25
2.6.5	Macromedia Flash 3.0 .....	27
2.7	A Proposed System.....	27
2.7.1	Client/Server Model .....	28
2.7.2	Using Visual Basic in a 3-tier design .....	29
2.8	Summary.....	29
<b>CHAPTER 3 : RESEARCH ACTIVITIES.....</b>		<b>31</b>
3.1	Introduction.....	31
3.2	Survey (Questionnaire).....	31
3.2.1	Data Gathering.....	32
3.2.2	Questionnaire Design.....	32
3.2.3	Pilot Test.....	34
3.2.4	Administration and Processing of Questionnaire .....	35
3.2.5	Results Analysis .....	36
3.2.6	Summary of Findings .....	44
3.3	Interview: Face to face.....	45
3.3.1	Steps Taken for the Interview.....	45
3.3.2	Results from the Interview .....	46
3.4	Summary.....	48

<b>CHAPTER 4 : SYSTEM DEVELOPMENT.....</b>	<b>49</b>
4.1 Introduction.....	49
4.2 Requirements Specification and Analysis .....	49
4.2.1 Functional Requirements.....	50
4.2.1.1 Administration Section.....	50
4.2.1.2 User Section .....	53
4.2.2 Non-Functional Requirements.....	53
4.2.2.1 Administration and User Sections.....	54
4.3 System Design .....	55
4.3.1 Architectural Design.....	55
4.3.1.1 System Structuring .....	55
4.3.1.2 Modular Decomposition.....	56
4.3.2 Program Design .....	57
4.3.2.1 MediX Administration .....	57
4.3.2.2 MediX User.....	60
4.3.3 User Interface Design .....	63
4.3.3.1 User Interface Design for MediX Administration.....	64
4.3.3.2 User Interface Design for MediX User .....	64
4.3.4 Database Design .....	64
4.4 System Implementation .....	69
4.4.1 System Development Tools.....	69
4.4.1.1 Operating System .....	70
4.4.1.2 Program Coding .....	70
4.4.1.3 Database Implementation .....	72
4.4.1.4 Report Generation .....	72
4.4.1.5 Statistical Package.....	73
4.4.1.6 Interface Design .....	78
4.4.2 Integration of Tools .....	78
4.4.2.1 Integration of Microsoft Access 97.....	78
4.4.2.2 Integration of Seagate Crystal Reports 6.0.....	79
4.4.2.3 Integration of Stata 6.0.....	79
4.4.2.4 Integration of Macromedia Flash 3.0 .....	79

4.5	Testing .....	79
4.5.1	Unit testing .....	80
4.5.2	Module testing .....	81
4.5.3	Integration testing .....	81
4.5.4	System testing .....	82
4.6	Summary .....	82
<b>CHAPTER 5 : SYSTEM EVALUATION .....</b>		<b>83</b>
5.1	Introduction .....	83
5.2	Evaluation Methodology .....	83
5.3	Form Design .....	84
5.4	Pilot Test .....	87
5.5	Administration and Processing of Evaluation Forms .....	87
5.6	Analysis of Survey Outcomes .....	88
5.6.1	MediX Evaluation Form (Administrator) .....	89
5.6.2	User Feedback Form .....	98
5.7	Evaluation Aspects on Maintenance .....	104
5.8	Summary .....	104
<b>CHAPTER 6 : DISCUSSION AND CONCLUSION .....</b>		<b>105</b>
6.1	Introduction .....	105
6.2	Problems Encountered .....	105
6.2.1	During the Research Study .....	105
6.2.2	During the System Development .....	107
6.3	Features of the System .....	108
6.4	Limitations and Weaknesses .....	109
6.4.1	Limitations .....	109
6.4.2	Weaknesses .....	110
6.5	Future Enhancements and Further Research .....	111
6.5.1	Future Enhancements .....	111
6.5.2	Areas of Further Research .....	112

6.6 Contributions to Society .....112

6.7 Conclusion .....114
