CONTENTS	PAGE
Abstract	i
Acknowledgement	ii
Table of Contents	iii
List of Table/Figures	vi
List of Abbreviations	x
List of Appendices	xi

CHAPTER 1 INTRODUCTION 1

1.1. Foreword	1
1.2. Energy and World Economy	2
1.3. Energy and the Environment	6
1.4. Objectives and Scope of Study	8

CHAPTER 2 LITERATURE REVIEW

13

2.1.	Fossil Fuels	13
2.2.	Air Pollution by Fossil Fuels	15
2.3.	Environmental Impacts of Sulphur Oxides	20
2.4.	Studies on the Emissions of Sulphur Oxides	22
2.5.	The Scenario in Asia	24
2.6.	Emissions of Sulphur Oxides in Asia	27
2.7.	Emission Sources of Sulphur Oxides in Asia	30

Chapter 3 METHODOLOGY

33

3.1.	Foreword	33
3.2.	Research Design	34
3.3.	Discussion on Energy - Socio-Economy	35
3.4.	Data Source of Energy Consumption and Emissions of SO _x	36
3.5.	Data Analysis	40
3.6.	Limitations and Difficulties	42

Chapter 4 DATA ANALYSIS AND DISCUSSION 43

4.1.	Energy Analysis	43
4.2.	Emissions of Sulphur Oxides	57
4.2.1.	Preliminary Analysis - comparison between two sets of data	57
4.2.2.	Analysis of Fuel Type and Sectoral Contribution to the Consumption of Primary Energy and Associated SO _x	58
4.2.3.	Linear Regressions of SO _x Emissions and Primary Energy Consumption	64
4.2.4.	Analysis of Variance (ANOVA) for the Emissions of SO _x	67
4.2.5.	Average Annual Growth Rate of Significant Contributors of SO _x	70

Chapter 5 CONCLUSION AND RECOMMENDATIONS 74

5.1.	Foreword	74
5.2.	Conclusion: Summary of Results and Findings	75
5.3.	Recommendations	77
5.3.1.	Clean Technology - Fuel Processing and Desulphurisation	79
5.3.2.	Fuel Switching to Cleaner Fuel Types - Renewable Energy	82
5.3.3.	Energy Efficiency and Energy Intensity	84
5.3.4.	Regulatory and Monitoring Framework	87
