UNIVERSITY OF MALAYA IN PARTIAL FULFILMENT
OF THE REQUIREMENT FOR
THE DEGREE OF MASTER OF ECONOMICS

MAY 2005

ACKNOWLEDGEMENT

In the course of researching and writing this report, various people have provided invaluable help and encouragement. Thus, I would like to thank my supervisor, Associate Professor Dr. Tan Eu Chye from the Department of Analytical Economics, Faculty of Economics and Administration, University of Malaya, for his patient guidance and valuable comments in the course of supervising this research. A special thanks also goes to the staff of Faculty of Economics and Administration for their kind assistance under various circumstances.

I am also grateful to Selvamathan, Kalaiselvi, Gregore, Ramna Veni, Meera, Kuganeshwari and many others not mentioned here for their endless support and encouragement throughout the period of research. However, my greatest debt is to my parents, Mr. and Mrs. Rajendran, my brothers and sisters for their unconditional love and support. Last but not least, I would like to thank my adorable neices and nephews who have been the light of my life. Thus, this research is specially dedicated to my family for always believing in me.

ABSTRACT

Based on macroeconomic theory, export and import growth, and thus the trade balance, are usually determined by changes in price competitiveness, economic growth of trading partners and income growth in the home country. Such changes are often caused by movements in exchange rates with respect to major trading countries. Since Malaysia's international trade is mostly denominated in US dollars, and the US being the largest single importer of Malaysian exports, the performance of the Malaysian trade is highly dependent on the US economy. Thus, the ringgit - US dollar exchange rate may have a significant impact on both the Malaysian effective exchange rates and trade balance. Hence, the main objective of this research is to analyse the impact of the US dollar on Malaysian real effective exchange rates and trade balance from the period of 1975:1 to 2003:4.

In this research, the export, import and trade weighted effective exchange rates were computed and analysed. The analysis showed that the RM/US\$ nominal bilateral exchange rates has some significant impact on the Malaysian real effective exchange rates. In addition, an analysis was undertaken to capture the impact of the US dollar on Malaysian trade balance. Thus, it has been found that the impact of US dollar on Malaysia's trade balance is quite significant as the estimated vector error correction models yielded results that support underlying economic theory. It has been found that the RM/US\$ bilateral exchange rate improves the demand for exports and thus, the trade balance. In addition, the analysis shows that the export weighted and import weighted real effective exchange rates are more appropriate to analyse the relationship between exchange rates and demand for exports and imports respectively rather than the trade weighted real effective exchange rates.

TABLE OF CONTENTS

<i>Acknowledgement</i>	i
<i>Abstract</i>	ii
<i>Table of Contents</i>	iii
<i>List of Tables</i>	vi
<i>List of Figures</i>	viii
 Chapter 1: Introduction	
1.0 Overview.....	1
1.1 Objectives and Significance of the Study.....	2
1.2 Organisation of the Chapters.....	2
1.3 The Foreign Exchange Rate.....	3
1.4 Factors That Affect The Foreign Exchange Rates.....	5
1.5 The Role of the US Dollar in the World's Financial System.....	7
 Chapter 2: Literature Review	
2.0 Exchange Rate Regimes and Trade.....	9
2.1 Currency Devaluation and Trade Balance.....	10
2.1.1 The Marshall-Lerner Condition.....	11
2.1.2 The J-curve.....	11
 Chapter 3: Historical Background	
3.0 Exchange Rate Arrangements.....	15
3.1 The International Financial System.....	16
3.2 The Evolution of the Malaysian Exchange Rate Regime.....	23
3.3 The Performance of the Ringgit from 1970 until Now.....	25
 Chapter 4: The Impact of the US Dollar on Real Effective Exchange Rate	
4.0 Nominal and Real Effective Exchange Rates.....	31

4.1 Key Elements in the Calculation of the Effective	
Exchange Rates.....	33
4.2 Bilateral Exchange Rates.....	36
4.3 Calculation of the Nominal and Real Effective.....	38
Exchange Rates	
4.3.1 Sources of Data.....	38
4.3.2 Calculation of Weights.....	39
4.3.3 Calculation of the Nominal and Real Export	
Weighted Effective Exchange Rate.....	40
4.3.4 Calculation of the Nominal and Real Import	
Weighted Effective Exchange Rate.....	40
4.3.5 Calculation of the Nominal and Real Trade	
Weighted Effective Exchange Rate.....	41
4.4 The Impact of The US Dollar on Malaysian Real Effective	
Exchange Rates.....	41
4.5 International Monetary Fund's Information Notice System.....	47
4.6 A Comparison of the Computed Effective Exchange	
Rates with IFS's Effective Exchange Rates.....	49

Chapter 5: Impact of the US Dollar on Malaysian Trade Balance

5.0 Overview of the Malaysian Trade Sector: 1975 – 2003.....	51
5.1 Methodology.....	54
5.1.1 Explanation of Variables.....	54
5.1.2 Model Specification.....	56
5.1.3 Tests for Stationarity.....	57
5.1.4 Cointegration Analysis.....	58
5.1.5 Vector Error Correction Model (VECM).....	59
5.2 Results and Analysis.....	63
5.2.1 The Test for Stationarity.....	63
5.2.2 Test for Cointegration.....	64
5.2.3 The Vector Error Correction Model.....	69
5.3 Conclusion.....	87

Chapter 6: Conclusion.....90

6.0 Limitations of the Study.....90

6.1 Suggestions.....90

6.2 Summary.....91

Bibliography.....93

Appendix A

Malaysia: Nominal and Real Effective Exchange Rates and RM/US\$
Bilateral Exchange Rates (in nominal and real terms)

Appendix B

Malaysia: Adjusted Effective Exchange Rates and IFS’s Effective
Exchange Rates
