## ACKNOWLEDGEMENTS

I take this opportunity to extend my heartfelt thanks to my project guide Professor Sieh Mei Ling, Deputy Dean, Faculty of Business and Accounting, University of Malaya, Kuala Lumpur for being a constant source of inspiration and encouragement. Her valuable advice and guidance has been of tremendous help in giving a concrete shape to this paper. Personally it was a unique learning experience working under her guidance.

I also take this opportunity to thank all the senior managers and executives of the various firms which were covered in the research survey, for their kind willingness to grant me the interviews and share their experience for this research study.

I would also like to thank my immediate superior – Mr. Alex Jeremiah, whose understanding and patience was vital to make this paper a reality.

Lastly I would like to express my love and gratitude to my wife Anju, for her constant support, encouragement, and patience which has contributed significantly towards this paper. A special note of appreciation to her for contributing meaningful ideas and proof reading the research paper at various stages.
