1.0	Introduction	1
	1.1. Environmental pollution	3
	1.1.1. Water pollution	3
	1.1.2 The state of Malaysian freshwater environment	5
	1.2. Nitrogen	5
	1.2.1 Phosphorus	6
	1.3. Eutrophication	6
	1.4. Tolerance of tropical microalgae to nitrogen enrichment	7
	1.5. Objectives	8

Table of Contents

2.0. Literature review 10

2.1. Freshwater ecosystems 10

2.2. Nitrogen in the environment 10

2.3. Nitrogen enrichment 12

2.4. Phosphorus in the environment 13

2.5. Phosphorus enrichment 15

2.6. Biological indicators 19

2.7. Algae as biological indicators 23

2.8. Monitoring 27

2.9. Biological monitoring 28

2.10. Algae as biomonitors 29

2.11. Nitrogen content in freshwater algae 32

2.12. Nitrogen metabolism in algae 33

2.13. Nitrate and nitrite assimilation 34

2.14. Ammonium assimilation 35

2.15. Effect of nitrogen sources on the growth and physiology of microalgae 36

2.16. Phosphorus content in freshwater algae 41

2.17. Phosphate metabolism in algae 41

2.18. Phosphorus uptake and assimilation 44

2.19. Effect of phosphorus on the growth and physiology of microalgae 46

Table of Contents

3.0. Materials and methods 50

3.1. Preparation of glassware 50

3.2. Microalgal cultures 50

3.2.1. Test organisms 50

3.2.2. Maintenance of stock cultures 52

3.2.3. Preparation of inoculum 52

3.3. Preparation of stock solutions 54

3.4. Test procedures 55

3.4.1. Experiment 1: Selection of minimal culture medium 56

3.4.2. Experiments 2&3: Effect of $NaNO_3$ and NH_4Cl levels on short term growth (96h) of three chlorophytes 56

3.4.3. Experiments 4&5: Effect of phosphate (K_2HPO_4 and KH_2PO_4) levels on short term growth (96h) of three chlorophytes in low-$NaNO_3$ and low-NH_4Cl medium 57

3.4.4. Experiments 6&7: Effect of phosphate (K_2HPO_4 and KH_2PO_4) levels on short term growth (96h) of three chlorophytes in high-$NaNO_3$ and high-NH_4Cl medium 58

3.5. Cell count 59

3.6. Specific growth rate 59

3.7. Percentage Growth Enhancement 60

3.8. Linear regression analysis 60

4.0. Results 61

4.1. Experiment 1: Selection of minimal culture medium 61

4.2. Experiment 2: Effect of $NaNO_3$ levels on the short term growth (96h) of three chlorophytes 63

4.2.1.1.Specific growth rate (μ) based on cell number 66

4.2.1.2.Percentage Growth Enhancement (PGE) based on cell numbers 68

4.2.2. Absorbance value (OD_{620}) 70

4.2.2.1. Specific growth rate (μ) based on OD_{620} 72

4.2.2.2. Percentage Growth Enhancement (PGE) based on OD_{620} 74

4.2.3. Linear regression analysis 74

4.3. Experiment 3: Effect of NH_4Cl levels on the short term growth (96h) of three chlorophytes 79

4.3.1.2.Specific growth rate (μ) based on cell number 81

4.3.1.3.Percentage Growth Enhancement (PGE) based on cell numbers 83

4.3.2. Absorbance value (OD_{620}) 83

4.3.2.1. Specific growth rate (μ) based on OD_{620} 87

4.3.2.2. Percentage Growth Enhancement (PGE) based on OD_{620} 89

4.3.3. Linear regression analysis 89

4.4. Experiment 4: Effect of phosphate levels on the short term growth (96h) of three chlorophytes in low-$NaNO_3$ medium 94

4.4.1.2.Specific growth rate (μ) based on cell number 97

4.4.1.3.Percentage Growth Enhancement (PGE) based on cell numbers 99

4.4.2. Absorbance value (OD_{620}) 99

4.4.2.1. Specific growth rate (μ) based on OD_{620} 103

4.4.2.2. Percentage Growth Enhancement (PGE) based on OD_{620} 105

4.4.3. Linear regression analysis 105

4.5. Experiment 5: Effect of phosphate levels on the short term growth (96h) of three chlorophytes in low-NH_4Cl medium 110

4.5.1.2.Specific growth rate (μ) based on cell number 113

4.5.1.3.Percentage Growth Enhancement (PGE) based on cell numbers 115

4.5.2. Absorbance value (OD_{620}) 115

4.5.2.1. Specific growth rate (μ) based on OD_{620} 119

4.5.2.2. Percentage Growth Enhancement (PGE) based on OD_{620} 121

4.5.3. Linear regression analysis 121

4.6. Experiment 6: Effect of phosphate levels on the short term growth (96h) of three chlorophytes in high-$NaNO_3$ medium 126

4.6.1.2.Specific growth rate (μ) based on cell number 128

4.6.1.3.Percentage Growth Enhancement (PGE) based on cell numbers 130

4.6.2. Absorbance value (OD_{620}) 130

4.6.2.1. Specific growth rate (μ) based on OD_{620} 134

4.6.2.2. Percentage Growth Enhancement (PGE) based on OD_{620} 136

4.6.3. Linear regression analysis 137

4.7. Experiment 7: Effect of phosphate levels on the short term growth (96h) of three chlorophytes in high-NH_4Cl medium 140

4.7.1.2.Specific growth ratê (μ) based on cell number 142

4.7.1.3.Percentage Growth Enhancement (PGE) based on cell numbers 144

4.7.2. Absorbance value (OD_{620}) 144

4.7.2.1. Specific growth rate (μ) based on OD_{620} 148

4.7.2.2. Percentage Growth Enhancement (PGE) based on OD_{620} 150

4.7.3. Linear regression analysis 151

5.0. Discussion 154

5.1. Selection of minimal culture medium for testing 154

5.2. Growth response of the three chlorophytes to variations in nitrogen and phosphorus levels 155

5.3. Potential use the chlorophytes for bioassay 160

5.4. Areas for further studies 161

Table of Contents

6.0. Conclusion 164
