IDENTIFICATION OF BUSINESS OPPORTUNITIES IN POWER PLANT CONTROL AND INSTRUMENTATION

By
JUMAAT BIN HJ. WAGIMIN
BSc. (Hons) in Electrical & Electronics Engineering
Portsmouth Polytechnic
Portsmouth, United Kingdom
1980

Submitted to the Faculty of Economic & Administration University of Malaya in partial fulfilment of the requirement for the Degree of
MASTER OF BUSINESS ADMINISTRATION
March, 1997
ACKNOWLEDGEMENT

In the course of carrying out a research, one needs assistance of many individuals and organisations in data collecting, computing typing or proof reading.

I wish to express my deepest gratitude to my supervisor, Dr. Ainin bte Sulaiman who has given me the most valuable guidance and useful suggestions towards the completion of this research.

I also wish to thank all my colleagues in Tenaga Nasional Berhad (TNB) who has provide me with all the reports and data information.

My special appreciation to my wife, Misnah, and my children for their encouragement, patience and tolerance for the years during which I had pursued this MBA degree.

Last but not least, sincere thanks to all friends who has provided me inspirational support in one way or another and whose names are not mentioned here.
ABSTRACT

Malaysia is geared to become industrialised country by the year 2020. The demand of electricity is expected to increase in line with the country growth and therefore, Tenaga Nasional Berhad (TNB), being the biggest power producers in Malaysia, has a great role to play in helping the nation to achieve this goal.

Being a government owned private company, TNB is also expected to assist the government in promoting Bumiputera Entrepreneurs participation in the nation developments especially in TNB activities.

This study examines the business opportunities in the area of Power Plant Control and Instrumentation available in TNB and would be useful to Bumiputera Entrepreneurs who intends to do business with TNB.
# TABLE OF CONTENTS

Acknowledgements ........................................... i
Abstract .................................................... ii
Table of Contents .......................................... iii
List of Tables ............................................... v
List of Figures .............................................. vi

Chapter

I. INTRODUCTION

1.1 Problem Statement .................................... 1
1.2 Objectives of Study .................................... 3
1.3 Significant of Study .................................... 3
1.4 Scope and Limitation of Study ....................... 4
1.5 Organisation of Paper .................................. 4

II. CONCEPTUAL BACKGROUND

2.1 Role of Power Plant Control and Instrumentation 5
2.2 Competitive Analysis: Porter’s Five Forces Model 8
2.3 Bumiputera Participation ............................... 10

III. RESEARCH METHODOLOGY

3.1 Sampling Design ...................................... 12
3.2 Primary Data Collection ................................ 12
3.3 Secondary Data Collection .............................. 14
3.4 Problems Encountered During Data Collections .... 14
IV. TENAGA NASIONAL BERHAD

4.1 Background ........................................... 16
4.2 TNB Organisational Structure .................. 17
4.3 TNB Competitive Analysis ....................... 17
4.4 Regulatory Framework ............................... 19

V. FINDINGS OF THE STUDY

5.1 Contracts .............................................. 24
5.2 Major Supplier and Manufacturers ............. 27
5.3 Source of Technology ............................... 29
5.4 Investment Viability .................................. 29

VI. CONCLUSION AND RECOMMENDATION

6.1 Conclusion ............................................. 30
6.2 Recommendation ...................................... 30

BIBLIOGRAPHY ............................................. 32

APPENDICES .............................................. 33--
