**This dissertation is dedicated to
my family, especially
my understanding and caring wife, Lee Bee Har,
both my sons, Kee Aun and Kee Hui
and not forgetting,
my late grandmother, Mdm Suah See
and my late mother, Madam Khoo Eng Kit.**

**Without their patience, continuous support and
encouragement,
I would not have completed this study.**

ACKNOWLEDGEMENTS

In my pursue for knowledge and professional growth which culminates with the successful completion of this dissertation, I would like to express my sincere thanks and appreciation to the persons who had given me encouragement, support and guidance, without which this study would not have been completed.

First of all, I am much indebted to my learned supervisor, Professor Bimal Kanti Sen, who provided me expert guidance, helpful suggestions, personal encouragement and expressed his very confidence in my ability to successfully complete this study from the beginning to the end. It was also he who introduced me to the field of bibliometrics and hence this study.

I would also like to record my special thanks to Dr. Diljit Singh, Mr. Teh Kang Hai and Mrs. Zainab Awang Ngah, lecturers of the MLIS Program for their academic training, professional advice, continued guidance and abiding interests in the process of my professional growth and research. Without their continuous support, I would not have managed to finish my MLIS program on schedule.

I want also like to express my sincere appreciation and thanks to all my close friends, SM Hulu Kelang's colleagues and all my MLIS coursemates, whose friendship, encouragement and helpful discussions benefited me a lot during this period of study.

I would also like to say a word of thanks to Professor Dato' Dr. Khoo Kay Kim, editor of *JMBRAS*, Tuan Hj. Mohd. Rafaie bin Hj. Zainal Abidin and Puan Norasiah bt Sulaiman, staff of MBRAS for their kind assistance in obtaining information with regard to *JMBRAS* and MBRAS.

Finally, and most importantly, I would like to thank my wife, Lee Bee Har for her selflessness, understanding and forbearance and both my sons, Kee Aun and Kee Hui for their endless love, encouragement and support in my education and the completion of this study. In the course of my undertaking this study, I have neglected and deprived them of their much precious moments of fun and time which I should have spent with them as husband or father.

Last and not the least, I am very pleased with myself for having the courage and determination to seek new knowledge and to complete this MLIS program within the stipulated time.

ABSTRACT

JOURNAL OF THE MALAYSIAN BRANCH OF THE ROYAL ASIATIC SOCIETY (JMBRAS) 1987-1996 : A BIBLIOMETRIC STUDY

**BY
TIEW WAI SIN**

This study examines bibliometrically *Journal of the Malaysian Branch of the Royal Asiatic Society (JMBRAS)* 1987-1996, analysing 111 articles, and the citations appended to them, 103 biographical notes, titles, contents, as well as 78 book reviews.

Two methods were employed, namely descriptive statistics and bibliometric analysis. Descriptive statistics is used to describe the characteristics, quantities and research trends of the articles and book reviews published in *JMBRAS* 1987-1996. Bibliometric techniques were employed to show and determine the spread and character of the literature used by the authors, apart from the study of gender, occupation, affiliation (geographic and institutional) and extent of authorship collaboration. Bibliometric data such as titles and contents of the articles were also analysed to study the number of words in the titles, inclusion of acknowledgement, appendix and abstracts as part of these articles.

The required bibliometric data and other relevant information were collected and compiled using two special forms, *JMBRAS* Articles Data Input Form and *JMBRAS* Book Reviews Data Input Form. After obtaining all the required data, the data were tabulated and transferred into three tables, namely Article Table, Source Table, and Review Table to facilitate extraction of records for data analysis.

It was found that the typical author of a *JMBRAS* article is usually a male foreign academician. He is also a member of MBRAS, the Society which published *JMBRAS*. On the other hand, the typical bibliometric profiles of *JMBRAS* are: The articles are normally single-authored, and on an average having 20.48 pages, 17.88 notes, and 36.33 citations. Most of the articles are without acknowledgement, appendix or abstract. The average number of words in the title of a *JMBRAS* article is 6.76. As to the subject emphasis of the article, it is quite often General Social History.

A typical bibliometric profile of a *JMBRAS* book review, on the contrary, is as follows: It is usually written by a male foreign contributor who is coincidentally a member of the learned Society, MBRAS. In most cases, a reviewer has not reviewed more than one book.

The study also traces the historical development of *JMBRAS*, a half-yearly journal published by MBRAS in its effort to disseminate knowledge and matters of historical value pertaining to Malaysia and the surrounding region, was also touched upon. Aspects such as editorial history, content and coverage, prolific contributors, visibility of the journal and its publication of indices are also covered.
