Chapter 1 Introduction

1.1 Typhoid fever	
1.1.1 General features	2
1.1.2 History	3
1.1.3 Salmonellosis	4
1.1.4 Chronic carrier status	4
1.1.5 Salmonella	5
1.2 Clinical Manifestations	
1.2.1 Gastroenteritis	6
1.2.2 Enteric Fever	7
1.3 Laboratory Diagnosis of Typhoid fever	
1.3.1 Isolation and Culture	9
1.3.2 Serology	10
1.3.3 DNA detection	11
1.4 Pathogenesis of typhoid fever	12
1.5 Immune response to <i>S. typhi</i> .	15
1.6 Treatment	17
1.7 Vaccines	19
1.8 Heat Shock Proteins	22
1.9 Epitope Mapping	28

1.10	The Multipin Peptide Technique	32
1.11	The Chemistry of Peptide Synthesis	34
1.12	Objectives of Study	37

Chapter 2 Materials and Methods

2.1	Materials	38
2.1.2	Reagent solutions for ELISA	39
2.1.3	Serum Samples and Monoclonal Antibodies	42
2.2	Methods	43
2.2.1	Peptide Synthesis Procedure	44
2.2.1.2	Pre-Synthesis Preparation	48
2.2.1.3	Weighing Amino Acids and Activating Chemicals	52
2.2.1.4	F-moc Deprotection and Washing of Synthesis Pins	53
2.2.1.5	Coupling the N- α -F-moc -Protected Amino Acids	55
2.2.1.6	Subsequent Coupling and Washing	55
2.2.1.7	Acetylation of Terminal Groups	56
2.2.1.8	Side-Chain Deprotection	57
2.2.2	ELISA Testing	
2.2.2.1	Conjugate Test	58
2.2.2.2	Primary Antibody Test	61
2.2.2.3	Quality Control	62
2.2.3	Removal of the bound antibody ("Disruption")	
2.2.3.1	Materials required	63
2.2.3.2	The "disruption" procedure	64
2.2.3.3	Analysis of Results	66
2.2.4	ELISA with GroEL heat shock protein	67

Chapter 3	RESULTS	
3.1	Quality Control	Pages 69
3.2	Optimization of the Modified ELISA Assay	70
3.3	Individual Sera	72
3.4	Consensus Plot	82
3.5	ELISA with purified GroEL	86
Chapter 4	DISCUSSION	87
BIBLIOGRAPHY		96
Appendix 1	Abbreviations Used for Amino Acids	134
Appendix 2	Patient Sera Profile	135
Appendix 3	List of Peptides Synthesized	136
Appendix 4	Synthesis Schedule	137
PUBLICATION		139
