<b>TITLE</b>	<b>i</b>
<b>ACKNOWLEDGEMENT</b>	<b>ii</b>
<b>ABSTRACT</b>	<b>iii</b>
<b>LIST OF TABLES</b>	<b>ix</b>
<b>LIST OF FIGURES</b>	<b>x</b>
<b>LISTS OF PLATES</b>	<b>xii</b>
<b>CHAPTER 1: OBJECTIVE OF THE PROJECT</b>	
1.1 General Introduction	1
1.2 Objective	2
<b>CHAPTER 2: LITERATURE REVIEW</b>	
2.1 Lactic Acid Bacteria	3
2.1.1 Description of Lactic Acid Bacteria	3
2.1.2 Applications of Lactic Acid Bacteria	10
2.2 Lactic Acid	
2.2.1 Physical Properties	11
2.2.2 Applications of Lactic Acid	14
2.3 Poly(Lactic Acid)	19
2.3.1 Physical and Chemical Properties	19
2.3.2 Applications of Poly(Lactic Acid)	20
<b>CHAPTER 3: MATERIALS AND METHODS</b>	
3.1 Sources for Isolating Indigenous Lactic Acid Bacteria	22
3.2 Isolation Through Enrichment	22

3.3 Screening for Lactic Acid Bacteria	23
3.3.1 Catalase Production	23
3.3.2 Gram's Staining	23
3.3.3 Gel Plug Test	24
3.4 Identification of Lactic Acid Isomer(s) Produced by the Isolates	24
3.4.1 Recovery and Purification of Lactic Acid	24
3.4.2 The Identification of Lactic Acid Isomer(s) by Thin Layer Chromatography	25
3.5 Identification of the Bacterial Isolates	27
3.6 Physiological Characterisation of the Isolates	28
3.6.1 Various Temperature Conditions	28
3.6.2 Lactic Acid Tolerance	29
3.6.3 Various NaCl Concentration	29
3.6.4 Various pH Conditions	30
3.7 Biomass, End Point pH Values, Glucose Consumption and Lactic Acid Production Profiles of Selected Isolates Grown in a Range of Environmental Conditions	30
3.7.1 Effects of Various Temperature Conditions	31
3.7.2 Effects of Various Initial pH Conditions	31
3.7.3 Effects of Various NaCl Concentrations	31
3.8 Analysis of Cultures Cultivated at Various Environmental Conditions	32
3.8.1 Cell Dry Weight Determination	32
3.8.2 The pH Determination of the Broth	32
3.8.3 Lactic Acid Quantification of the Broth	32
3.8.3.1 Materials	33

3.8.3.2 Methods	33
3.8.4 Quantification of Residual Glucose in the Broth	34
3.8.4.1 Sample Preparation	34
3.8.4.2 Method	35
3.9 Time Course Study of Selected Isolates Using Shake Flasks	36
3.10 Culture Broth Analysis of the Shake Flask Cultures	36
3.10.1 Cell Dry Weight Determination	36
3.10.2 pH Determination of the Broth	37
3.10.3 Lactic Acid Quantification in the Broth	37
3.10.3.1 Apparatus and Operating Conditions	37
3.10.3.2 Reagents	37
3.10.4 Quantification of Residual Glucose in the Broth	38
3.11 Statistical Analysis	38

## **CHAPTER 4: RESULTS AND DISCUSSION**

4.1 Choice of Isolation Media	42
4.2 Isolation and Screening of Indigenous Lactic Acid Bacteria from Food Sources	43
4.2.1 Catalase Test	45
4.2.2 Gram Staining and Microscopic Observation of the Isolates	46
4.2.3 Gel Plug Test	46
4.3 Identification of the Lactic Acid Isomer(s) by Thin Layer Chromatography	49
4.4 Identification of the Bacterial isolates	51
4.5 Screening and Selection for Potential Industrial Lactic Acid Bacteria	51
4.5.1 Growth of Bacterial Isolates at Various Temperatures	54

4.5.2 Growth of Bacterial Isolates at Various Lactic Acid Concentrations	56
4.5.3 Growth of Bacterial Isolates at Various NaCl Concentrations	56
4.5.4 Growth of Bacterial Isolates at Various Initial pH Conditions	59
4.6 Biomass, pH, Glucose Consumption and Lactic Acid Production Profiles of a few Selected Bacterial Isolates at Various Cultures Conditions	61
4.6.1 Effect of Temperature on Cultures Profiles	61
4.6.1.1 Biomass and Final pH Values of the Cultures at Various Cultivation Temperatures	62
4.6.1.2 Glucose Consumption and Lactic Acid Production Profiles at Various Temperatures	64
4.6.2 Effect of Various Initial pH Conditions on Profiles of Lactic Acid Bacteria Cultures	68
4.6.2.1 Biomass and Final pH Values of the Cultures at Various Initial pH Conditions	68
4.6.2.2 Glucose Consumption and Lactic Acid Production profiles at Various Initial pH Conditions	71
4.6.3 Effect of Various NaCl Concentration on Culture Profiles	74
4.6.3.1 Biomass and Final pH Profiles at Various NaCl Concentrations	74
4.6.3.2 Glucose Consumption and Lactic Acid Production Profiles at Various NaCl Concentration	77
4.7 Time Course Study of Several Selected Isolates	80
4.7.1 Biomass and End-Point pH Profiles during the Time Course Study	80
4.7.2 Glucose Consumption and Lactic Acid Production Profiles during the Time Course Study	84

## CHAPTER 5: CONCLUSIONS

5.1 Conclusion	88
REFERENCES	94

<b>ADDENDA</b>	99
<b>APPENDICES</b>	103
<b>Appendix A - Medium Preparation</b>	
A.1 MRS Broth	103
A.2 MRS Agar	104
A.3 Nutrient Gelatin	105
A.4 Sterile Agar	105
A.5 Basal MRS Broth with Bromocresol purple	106
<b>Appendix B - Stain Preparation</b>	
B.1 Gram's Stain (Hucker's Modification)	107
B.1.1 Materials	107
B.1.2 Method	108
<b>Appendix C - Standard Curves</b>	
C1: Lactic acid content standard curve (colorimetric method)	109
C2: Glucose concentration standard curve (Enzymatic method)	109
C3: Lactic acid concentration standard curve (HPLC method)	110
