CHAPTER 1.0 INTRODUCTION	1
ONE	
1.1 Definition	1
1.2 Heavy metals and the environment	3
1.3 Sources of heavy metal pollution	3
1.4 Soil contamination	4
1.5 Factors affecting the fate of heavy metals in soils	6
1.6 Prediction of the heavy metals pollution of soils	7
1.7 Heavy metals in Malaysian soils	8
1.8 Objectives of the present work	9
CHAPTER 2.0 LITERATURE REVIEW	10
TWO	
2.1 Chemical pollution and the ecosystem	10
2.2. Soil contamination	11
2.3 Heavy metals in soil	12
2.3.1 The origin of heavy metals in soils	13
2.3.1.1 Cadmium	14
2.3.1.2 Lead	14
2.3.1.3 Nickel	15
2.3.1.4 Zinc	15
2.3.2 Sources of heavy metals contaminants in soils	15
2.3.2.1 Cadmium	16
2.3.2.2 Lead	17
2.3.2.3 Nickel	18

2.3.2.4	Zinc	18
2.3.3	Chemical behavior of heavy metals in soils	19
2.3.3.1	Cadmium	22
2.3.3.2	Lead	23
2.3.3.3	Nickel	24
2.3.3.4	Zinc	24
2.3.4	The speciation and bioavailability of heavy metals in the soil	25
2.3.4.1	Cadmium	27
2.3.4.2	Lead	28
2.3.4.3	Nickel	29
2.3.4.4	Zinc	29
2.3.5	Environmental consequences of heavy metals pollution of soils	30
2.3.5.1	Cadmium	31
2.3.5.2	Lead	33
2.3.5.3	Nickel	34
2.3.5.4	Zinc	34
2.3.6	Prediction of the environmental impact of heavy metals pollution of soils	34
2.3.6.1	Degree of soil pollution	35
2.3.6.2	Prediction of uptake by means of soil analysis	35
2.3.6.3	Prediction of uptake by means plant analysis	36
2.3.6.4	Background levels of heavy metals in soil	37
2.3.7	Modeling the fate and speciation of heavy metals in polluted soils	37
2.4	Heavy metals in Malaysian soils	39
2.5	Lettuce and heavy metals	40
2.5.1	Cadmium	41
2.5.2	Lead	41
2.5.3	Nickel	42
2.5.4	Zinc	42
CHAPTER THREE	3.0 MATERIAL AND METHODS	44
3.1	Introduction	44
3.2	Experimental Soils:	44
3.2.1	Soil pH	45

3.2.2	Organic matter content	45
3.2.3	Cation exchange capacity	45
3.2.4	Total phosphorous	46
3.2.5	Iron and aluminum	46
3.2.6	Soil physical properties	46
3.2.7	Soil mineralogical composition	46
3.2.8	Background levels of heavy metals in soil	47
3.3	Laboratory experiments	48
3.3.1	The added metals	48
3.3.2	The incubation procedure	48
3.3.3	Determination of total metals content	49
3.3.4	Soil solution extraction procedure	49
3.3.5	Metals adsorption procedure	49
3.3.6	Sequential extraction procedure	50
3.3.7	Soil Solution speciation model visual MINTEQA	50
3.4.0	Greenhouse experiments	51
3.4.1	Metals amendments	52
3.5.2	Experimental plant	52
3.5.3	Experimental design	52
3.5.4	Heavy metal analysis of plant samples	53
3.5.5	Statistical analysis	53
CHAPTER FOUR	4.0 METALS DISTRIBUTION IN SOLID AND SOLUTION PHASES OF THE SOIL	54
4.1	Introduction	45
4.2	Cadmium	45
4.1.1	Effect of soil type and metal level on Cd distribution between the solid and solution phases of the soils	55
4.1.2	Effect of residence time on Cd distribution between the solid and solution phases of the soils	59
4.3	Lead	61
4.3.1	Effect of soil type and metal level on Pb distribution between the solid and solution phases of the soils	62
4.3.2	Effect of residence time on Pb distribution between the solid and solution phases of the soils	66
4.4	Nickel	68

	4.4.1	Effect of soil type and metal level on Ni distribution between the solid and solution phases of the soils	68
	4.4.2	Effect of residence time on Ni distribution between the solid and solution phases of the soils	72
	4.5	Zinc	74
	4.5.1	Effect of soil type and metal level on Zn distribution between the solid and solution phases of the soils	74
	4.5.2	Effect of residence time on Zn distribution between the solid and solution phases of the soils	78
	4.6	Comparative investigations on the distribution of Cd, Pb, Ni, and zinc in the three soils	80
CHAPTER FIVE	5.0	CHEMICAL SPECIATION OF HEAVY METALS IN THE SOIL ENVIRONMENT	85
	5.1	Introduction	85
	5.2	Solid phase speciation	87
	5.2.1	Cadmium	87
	5.2.2	Lead	91
	5.2.3	Nickel	93
	5.2.4	Zinc	96
	5.2.5	Comparative investigations on exchangeable and complexed Cd, Pb, Ni, and Zinc in the three soils	99
	5.3	Solution speciation	102
	5.3.1	Cadmium	103
	5.3.2	Lead	104
	5.3.3	Nickel	106
	5.3.4	Zinc	107
	5.3.5	Comparative investigations on soil solution chemistry of Cd, Pb, Ni, and Zn in the three soils	108
CHAPTER SIX	6.0	PLANT UPTAKE OF HEAVY METALS	111
	6.1	Introduction	111
	6.2	Cadmium	111
	6.2.1	The effect of Cd amendment level on the plant uptake	112
	6.2.2	The effect of residence time on the Cd plant uptake	113

6.2.3	Regression models for Cd bioavailability as related to total content and chemical species of Cd in the soil	114
6.3	Lead	115
6.3.1	The effect of Pb amendment level on the plant uptake	115
6.3.2	The effect of residence time on the Pb plant uptake	116
6.3.3	Regression models for Pb bioavailability as related to chemical species of Pb in the soil	117
6.4	Nickel	118
6.4.1	The effect of Ni amendment level on the plant uptake	119
6.4.2	The effect of residence time on the Ni plant uptake	120
6.4.3	Regression models for Ni bioavailability as related to total content and chemical species of Ni in the soil	120
6.5	Zinc	122
6.5.1	The effect of Zn amendment level on the plant uptake	122
6.5.2	The effect of residence time on the Zn plant uptake	123
6.5.3	Regression models for Zn bioavailability as related to chemical forms of Zn in the soil	124
6.6	Comparative investigations on the plant uptake of cadmium, lead, nickel and zinc	126
CHAPTER SEVEN	7.0 GENERAL DISCUSSION	131
7.1	Introduction	131
7.2	Distribution of cadmium, lead, nickel and zinc in soil phases as affected by the amendment level, soil type and residence time	131
7.2.1	The effect of amendment level	132
7.2.2	The effect of soil type	133
7.2.3	The effect of residence time	134
7.3	Speciation of cadmium, lead, nickel and zinc in soil phases as affected by the soil type and residence time	135
7.3.1	Effect of soil type	136
7.3.2	Effect of residence time	137
7.4	Plant uptake of cadmium, lead, nickel and zinc in soil phases as affected by the amendment level and residence time	138
7.4.1	The effect of amendment level	139
7.4.2	The effect of metal speciation	140
7.4.3	The effect of residence time	141
7.5	Contaminant soil-plant-human exposure pathway	142

7.6	Modeling the risk of cadmium, lead, nickel and zinc disposed in the soil environment	146
7.6.1	Risk estimation Model	146
CHAPTER EIGHT	8.0 SUMMARY AND CONCLUSION	149
8.1	Introduction	149
8.2	Adsorption and desorption of the studied metals	149
8.3	Speciation of the studied metals	151
8.4	Plant uptake studied metals	152
8.5	Risk assessment of metals dumped in soils	154
8.6	Future prospects	155
APPENDIX A	Soil mineralogical composition as determined by x-ray diffractometer	157
APPENDIX B	Levels of heavy metals in the reference soil sample So-2	160
APPENDIX C	Visual MINTEQA	161
APPENDIX D	Background discussion for soil-plant-human exposure pathway	163
