

CONTENTS

ACKNOWLEDGEMENTS	i
ABSTRACT	ii
CONTENTS	iii
CHAPTER ONE : INTRODUCTION	
1.0 Introduction to Semiconductor Material : Silicon	1
1.1 Silicon Wafer Production	2
1.2 Recombination Lifetimes	5
1.3 The Effect of UV-Irradiation	7
1.4 Motivation and Objectives	9
1.5 Outline of This Thesis	10
CHAPTER TWO : SEMICONDUCTOR SURFACES	
2.0 Introduction	11
2.1 Surface Recombination Velocity, S_r	11
2.2 Minority Carriers Under Continuous Pulsed Optical Excitation	14
2.3 Relationship Between Effective Minority Carrier Recombination Lifetime and Surface Recombination Velocity	18
CHAPTER THREE : EXPERIMENTAL TECHNIQUES	
3.0 Introduction	20
3.1 Metal Contamination,	20

3.2 Thermal Oxidation	23
3.3 Measurement Techniques	30
CHAPTER FOUR : RESULTS ANALYSIS AND MODELING	
4.0 Introduction	37
4.1 Metal Contamination Results	37
4.2 Effects of Thermal Silicon Dioxide	49
4.3 Proposed Mechanisms of UV-Irradiation Effect on Silicon Wafer Surface	58
CHAPTER FIVE : CONCLUSIONS AND SUGGESTIONS	80
REFERENCES	83
