Remote Monitoring System		
Item		Page
Chapter 1	Project Specification	1
	1.1 Objective	1
	1.2 Source of Data	1
	1.3 Project Scope	2
	1.4 Project Schedule	2
Chapter 2	What is Remote Monitoring System?	4
	2.1 Overview	4
	2.2 Close Circuit Television/Traditional CCTV	5
	2.2.1 How Does CCTV Work	7
	2.3 Digital Close Circuit Television	7
	2.3.1 How Does Digital CCTV Work	8
	2.4 Legal Aspect Regarding Employing Video Cameral	9
Chapter 3	Application Area And Comparison	11
	3.1 Overview	11
	3.2 Application Area of Remote Monitoring System	13
	3.3 Advantages of Remote Monitoring System	15
	3.4 Disadvantages of Remote Monitoring System	19
	3.5 Comparison – RMS vs Traditional CCTV	22
Chapter 4	Components of CCTV System	24
	4.1 Video Camera	24
	4.1.1 Wired Camera	25
	4.1.2 Wireless Camera	28
	4.2 Video Recorder	29
	4.3 Multiplexer	31
	4.4 Video Capture Card	32
	4.5 Transmission Media	32
	4.5.1 Conducted Media	33
	4.5.2 Radiated Media	35
Chapter 5	Types of Remote Monitoring System	37
	5.1 Overview	37
	5.2 Using Computer Network for Remote Monitoring	37
	5.3 Using Dial Up Telephone Modem (Circuit Switching)	41
	5.3.1 Understand Modem Command	45
	5.4 Using Internet for Remote Monitoring	47

Chapter 6	Preliminary Investigation	53
	6.1 Overview	53
	6.2 Clarification and Understand System Requirement	54
	6.3 Define the Scope and Constraints	57
	6.4 Access The Cost and Benefit	58
	6.5 Examine the Technical and Operational Feasibility	59
	6.6 Required Tools and Techniques	59
	6.6.1 Basic Hardware Requirement	60
	6.6.2 Basic Software Requirement	60
	6.7 Types of Methodologies	61
	6.8 The Reason of Choosing Prototyping Methodology	63
Chapter 7	Requirement Analysis Tools and Techniques	65
	7.1 Overview	65
	7.2 Testing and Evaluate Existing Software	65
	7.3 Fact Finding – Interview	66
	7.4 Fact Finding – Internet Research	67
	7.5 Requirement Analyst Method – Data Flow Diagram	67
	7.5.1 Context Diagram	68
	7.5.2 Lower Level Diagram	68
Chapter 8	Application Development Using Prototyping	
	8.1 Overview	75
	8.2 Benefits of Using Prototyping	76
	8.3 Disadvantages of Using Prototyping	76
	8.4 Steps In Prototyping Development	77
	8.5 Development of Remote Monitoring Prototyping	78
	8.5.1 Initial Prototype	79
	8.5.2 First Iteration	81
	8.5.3 Second Iteration (Prototype the network module)	82
	8.5.3.1 Network Module Development Review and Evaluation	84
	8.5.4 Third Iteration (Prototyping the dial up module)	85
	8.5.4.1 Telephone Dial Up Module Review and Evaluation	86
	8.5.5 Fourth Iteration (Prototype the Internet Module)	87
	8.5.5.1 Internet Module Development Review and Evaluation	89
Chapter 9	System Testing	91
	9.1 Overview	91
	9.2 Unit Testing	91
	9.3 Integration Testing	92
	9.4 System Testing	92
	9.5 Testing Result	93
	9.5.1 Unit Testing Result	93
	9.5.2 Integration Testing Result	95
	9.5.3 System Testing Result	96

Chapter 10 Problem Encounter and Conclusion	102
10.1 Overview	102
10.1.1 Problem Encounter at Beginning Stage	103
10.1.2 Problem Encounter During Requirements Analysis Tools and Techniques Stage	103
10.1.3 Problem Encounter During Application Prototyping Development Stage	104
10.2 Conclusion	106
References	107
Appendix I Interview Questionnaire	110
Appendix II Real Time CCTV	112
Appendix III JVC C2U Surveillance Software	114
