ABSTRACT

Chapter 1 Introduction

1.1	Introduction	1
1.2	Preliminaries and definitions	
1.2.1	Graphs	3
1.2.2	Connectivity	5
1.2.3	Cubic bipartite planar (CBP) graphs	5
1.2.4	Hamiltonian graphs	7

Part I Cubic bipartite planar (CBP) graphs

Chapter 2 Lower bounds for the number of Hamilton cycles in CBP graphs

2.1	Introduction	8
2.2	(2, 3)-regular graphs and merger of graphs	9
2.3	Some lower bounds	10

Chapter 3	On Barnette's Conjecture and CBP graphs with given number of Hamilton cycles	
3.1	Introduction	15
3.2	Merger of (2,3)-regular graphs with four vertices of degree 2	16
3.3	Equivalence of Barnette's Conjecture	19
3.4	CBP graphs with given number of Hamilton cycles ...	28
Part II	Generalized knight's tours on rectangular chessboards	
Chapter 4	Forbidden rectangular boards of generalized knight's tours	
4.1	Introduction	33
4.2	Open knight's tours on rectangular chessboards	36
4.3	Forbidden rectangular boards	40
Chapter 5	(2,3)-knight's move	
5.1	Introduction	46
5.2	$5k \times n$ chessboards	47
Summary	60
References	63
