Acknowledgement

First of all, I wish to record my thanks to my boss, Tan Sri Dato' Dr. Lau for supporting and financing my studies. A big thank you also to my supervisor, Associate Professor Dr. Tan Eu Chye for all his precious advice and assistance throughout the research. A word of thanks should also be extended to the staff and faculty members of the Faculty of Economics and Administration, University Malaya for their invaluable help.

Finally, my indebtedness and my most sincere gratitude go especially to my husband, my family and my friends for their silent support and assistance, this research would not have completed without their continuous guidance and patience.

My deepest appreciation to all of you and wishing you all a Happy and Prosperous New Year !

Abstract

With the impending globalization and liberalization of the financial sector and particularly the banking sector, there is an urgency for Malaysian banking sector to strengthen and improve its competitiveness in order to survive and excel in the global market. Under globalization, there will be more intense competition as there will be more global players in the market where only the strong ones will survive and the weaker ones will eventually exit the market. As such, in order to compete well while continuing to capture a sizable market share, it is important for Malaysian banking sector to determine and identify the areas of strength and weaknesses. Therefore, this paper aims at examining the competitiveness of Malaysian banking sector in relation to the banking sector of some neighboring countries namely Singapore, Thailand and Indonesia by examining and analyzing some key ratios and indicators under the CAMEL framework commonly employed by many countries in assessing the performance of their respective banking sector.

This paper also examines the existing characteristics of Malaysian banking sector mirrored against the five desired characteristics proposed under the Financial Sector Masterplan (FSMP), announced in 2001. These desired characteristics were then used as benchmarks to study the current characteristics of banking sectors of Singapore, Thailand and Indonesia.

This study shows that Malaysian banking sector is still not as competitive as Singapore but relatively better than Thailand and Indonesia in many aspects, though further improvements would be essential. Singapore banking sector appears to be the most competitive and hence should be set as an example by many countries in the region. In general, Thailand is slightly less competitive than Malaysia while Indonesian banking sector is the weakest among the 4 countries under study.

Malaysian banking sector currently has not achieved the five desired characteristics proposed under FSMP but there are clearly improvements over the years. Meanwhile, the said desired characteristics are said to be present in the Singapore banking sector while extra effort would be needed for Thai and Indonesia banks to achieved these characteristics.

Acknowledgement	ii
Abstract	iii
Table of Contents	iv
List of Figures	vii
List of Charts	vii
List of Tables	viii

CHAPTER 1 – INTRODUCTION

- 1.1 Rationale of the Research
- 1.2 The Research Objectives
- 1.3 Research Methodology
- 1.4 Scope and Limitations of the Research

CHAPTER 2 – LITERATURE REVIEW

- 2.1 Studies Related to Banking Sector
 - 2.1.1 The Role and Significance of the Banking Sector
 - 2.1.2 Banking Sector Efficiency and Competitiveness
- 2.2 Studies Related to Globalization
 - 2.2.1 Impact of Globalization on Malaysian Banking Sector
 - 2.2.2 The Opportunities faced by the Malaysian Banking Sector
 - 2.2.3 Challenges of Globalization on Malaysian Banking Sector

CHAPTER 3 – OVERVIEW OF THE BANKING SYSTEM OF THE COUNTRIES

- 3.1 Malaysia
- 3.2 Singapore
- 3.3 Thailand
- 3.4 Indonesia
- 3.5 Comparison of Structure of Banking System
- 3.6 Summary of Comparison

CHAPTER 4 – COMPARATIVE ANALYSIS OF COMPETITIVENESS AND EFFICIENCY OF MALAYSIAN BANKING SECTOR IN RELATION TO SINGAPORE, THAILAND AND INDONESIA

- 4.1 Capital of the Banking System
- 4.2 Capital Adequacy Ratio (CAR)
- 4.3 Asset Quality
 - 4.3.1 Asset Size
 - 4.3.2 Loan Provision Ratio (LPR)
 - 4.3.3 NPL to Total Loan Ratio (NPL/TL)
- 4.4 Management Quality
 - 4.4.1 Cost-to-Income Ratio
 - 4.4.2 Branch Network (Average no. of branches per bank)
- 4.5 Earnings Performance
 - 4.5.1 Return on Assets (ROA)
 - 4.5.2 Return on Equity (ROE)
- 4.6 Liquidity Position
 - 4.6.1 Loan-to-Deposit Ratio (LDR)

4.7 Summary of Findings

**CHAPTER 5 – THE CURRENT STATE OF MALAYSIAN BANKING
SECTOR IN THE LIGHT OF FINANCIAL SECTOR MASTERPLAN (FSMP)**

- 5.1 A Review of the Financial Sector Masterplan (FSMP)
- 5.2 The Desired Characteristics and Future Landscape of the Domestic Banking Sector proposed under FSMP
- 5.3 The Current Position of Malaysian Banking Sector in the Light of FSMP
- 5.4 Summary of Analysis

**CHAPTER 6 – EXAMINING WHETHER THE DESIRED
CHARACTERISTICS PROPOSED UNDER FSMP ARE CURRENTLY
PRESENT IN THE BANKING SECTOR OF THE SELECTED COUNTRIES**

- 6.1 Singapore
 - 6.1.1 Summary of Analysis
- 6.2 Thailand
 - 6.2.1 Summary of Analysis
- 6.3 Indonesia
 - 6.3.1 Summary of Analysis

CHAPTER 7 – CONCLUSION
