LIST OF APPENDICES	xx

## **1.0 INTRODUCTION**

1.1	Literature Review	1
1.1.1	Overview of Cosmetic Products	1
1.1.2	Skin Ageing Phenomenon	2
1.1.3	The Skin	4
	(i) Importance of Sebaceous and Sweat Glands	10
	(ii) Skin Hydration	11
	(iii) Cutaneous Lipids	12
	(iv) Skin Natural Moisturising Factors (NMF)	13
1.1.4	Alpha Hydroxy Acids (AHAs)	14
	(i) Definition of AHAs	15
	(ii) Benefits of AHAs To The Skin	15
	(a) Moisturising Agent	15
	(b) Exfoliating Agent	17

	(c) Treating Dermatological Conditions	21
	(iii) Factors Influencing Efficacy of AHAs	22
	(iv) AHAs Safety Concerns	24
1.1.5	<i>Baccaurea motleyana hook f. (Rambai)</i> Fruit	27
1.2	Objective of the Study	30
1.3	Thesis Outline	31

## 2.0 EXTRACTION AND SPECIFICATION OF *Baccaurea motleyana hook f.* FRUIT'S EXTRACT

2.1	Introduction	32
2.1.1	Quality Assessment of <i>Baccaurea motleyana hook f.</i> Fruit's Extract's	33
2.1.2	Objective of the Study	33
2.2	Materials and Method	34
2.2.1	Preparation of <i>Baccaurea motleyana hook f.</i> Fruit's Extract Specification	34
2.2.2	Identification and Quantification of AHAs in <i>Baccaurea motleyana hook f.</i> Fruit's Extract by HPLC	36
2.2.3	Stability Study of <i>Baccaurea motleyana hook f.</i> Fruit's Extract	39
2.3	Result and Discussions	40
2.3.1	Identification and Quantification Types of AHAs in <i>Baccaurea motleyana hook f.</i> Fruit's Extract	40
	(i) Identification Types of AHAs Compounds in <i>Baccaurea motleyana hook f.</i> Fruit's Extract	40
	(ii) Quantification of AHAs Compounds in <i>Baccaurea motleyana hook f.</i> Fruit's Extract	42
2.3.2	Specification and Stability Study of <i>Baccaurea motleyana hook f.</i> Fruit's Extract	46

	(i)	Specification of <i>Baccaurea motleyana hook f.</i> Fruit's Extract	46
	(ii)	Stability study of <i>Baccaurea motleyana hook f.</i> Fruit's Extract	48
2.4		Conclusion	51
<b>3.0</b>		<b>STABILITY STUDY OF MOISTURISER CONTAINING <i>Baccaurea motleyana hook f.</i> FRUIT'S EXTRACT</b>	
3.1		Introduction	52
	3.1.1	Emulsions	54
		(i) Type of Emulsion System	55
		(ii) Particle Size of Emulsion	56
		(iii) Emulsion Appearance	57
		(iv) Emulsion Components	58
		(a) Emulsifiers and Method of Selection	61
		(b) Hydrophilic-Lipophilic Balance (HLB) System	62
		(c) Emulsifiers Blends - Enhancing Emulsion Stability	64
		(d) Micelle Formation and Effect On Emulsion Physiochemical Properties	66
		(v) Physical Properties of Emulsions	71
		(vi) Intermolecular Forces in Emulsion System	72
		(vii) Process Related to Emulsion Separation	74
		(viii) Parameters Contributing to Emulsion Instability	78
		(ix) Enhancement of Emulsion Stability	83

	(x) Effect of Shear Rate to Viscosity of Emulsion	86
3.1.2	Moisturiser	88
	(i) Assessment of Moisturiser Product	90
	(ii) Stability of Moisturiser Product	92
	(a) Stability Testing Conditions	93
	(b) Stability Testing Schedule	95
3.1.3	Objective of the Study	96
3.2	Materials and Method	96
3.2.1	Raw Materials in Emulsion Preparation	96
3.2.2	Method	98
	(i) Emulsion Preparation Without Active Ingredients	100
	(ii) Emulsion Preparation With Active Ingredients	102
3.3	Result and Discussions	105
3.3.1	Development of Moisturiser Product Base Formulation	105
	(i) Initial Moisturiser Base Development Study	105
	(ii) Moisturiser Base Product Development Study	106
	(iii) Stability Study at 50°C	106
	(iv) Freeze-Thaw Stability Study	118
3.3.2	Development of Moisturiser Product Containing <i>Baccaurea motleyana hook f.</i> Fruit's Extract	119
	(i) Stability Study at 50°C	123
	(ii) Freeze-Thaw Study	127
3.3.2	Enhancement of Stability Performance for Moisturiser Product Containing <i>Baccaurea motleyana hook f.</i> Fruit's Extract	129

	(i) Stability Study at 50°C	132
	(ii) Freeze-Thaw Stability Profile	135
3.4	Conclusion	136
<b>4.0</b>	<b>RHEOLOGICAL STUDY OF MOISTURISER</b>	
4.1	Introduction	137
	4.1.1 Newtonian and non-Newtonian Flow	138
	4.1.2 Viscosity	140
	4.1.3 Hysteresis	141
	4.1.4 Yield Stress Phenomenon	141
	4.1.5 Objective of the Study	143
4.2	Materials and Method	143
4.3	Result and Discussions	145
	4.3.1 Moisturiser Product's Rheological Profile	145
	4.3.2 Correlation of Yield Stress and Hysteresis Value With Moisturiser Product's Stability	150
	4.3.3 Moisturiser Product's Viscosity Regression Profile at RT and 50°C Stability Testing Conditions	152
4.4	Conclusion	154
<b>5.0</b>	<b>EFFICACY STUDY OF MOISTURISER PRODUCT CONTAINING <i>Baccaurea motleyana hook f.</i> FRUIT'S EXTRACT</b>	
5.1	Introduction	156
	5.1.1 Overview of Available Efficacy Testing Methods	156
	(i) Discriminative Test	159
	(a) Difference Test	159

	(b) Descriptive Test	159
	(ii) Objective Descriptive Sensory Test Method	162
	(iii) Questionnaire Design	164
	(a) Claim Support Studies	164
	(iv) Product's Adverse Effect	165
	(v) Instrumental Product Evaluation	166
	(a) Skin Hydration Assessment	166
	(b) Skin Colour Assessment	170
	(c) Skin pH Assessment	175
	5.1.2 Objective of the Study	176
5.2	Materials and Method	176
	5.2.1 Instrumental Product Evaluation	176
	(i) Statistical Analysis	178
	5.2.2 Objective Descriptive (Sensory) Product Evaluation	180
	5.2.3 Rating Scale System	183
5.3	Result and Discussions	184
	5.3.1 Instrumental Product Evaluation	184
	5.3.2 Statistical Analysis	193
	5.3.3 Objective Descriptive (Sensory) Product Evaluation	193
	5.3.4 Product Evaluation (Part 3) – Adverse Effect After Product's Application	198
	5.3.5 Conclusion	199
<b>6.0</b>	<b>OVERALL CONCLUSION AND RECOMMENDATION</b>	
6.1	Overall Conclusion	201

6.2	Suggestion for Future Work	201
6.2.1	<i>Baccaurea motleyana hook f.</i> Fruit's Extract	201
6.2.2	Improvement of the Formulated Product	201
