LIST OF CONTENTS	vii
LIST OF FIGURES	xiii
LIST OF TABLES	xviii
CHAPTER ONE INTRODUCTION	1
1.1 <i>Salmonella typhi</i> and typhoid fever	1
1.2 Antibiotic resistance in <i>S. typhi</i>	1
1.3 Bacterial plasmids	2
1.4 R plasmids	6
1.5 Mechanisms of plasmid-mediated antibiotic resistance	7
1.5.1 β -lactamase resistance	9
1.5.2 Chloramphenicol resistance	12
1.5.3. Cotrimoxazole resistance	15
1.5.4 Aminoglycoside resistance	20
1.5.5 Tetracycline resistance	23
1.6 Transposable elements	25
1.7 Integrons and mobile gene cassettes	29
1.8 Objectives of this study	35
CHAPTER TWO MATERIALS AND METHODS	45
2.1 Bacterial strains, plasmids and bacteriophages	45
2.2 General materials and reagents	46
2.3 Enzymes, kits, and radiochemicals	47
2.4 Media	48
2.4.1 Luria-Bertani (LB) medium (Miller, 1972)	48
2.4.2 MacConkey agar	48
2.4.3 Supplemented M9 agar (Miller,1972)	48

	Page
2.4.4 Dorset egg slant	49
2.4.5 Iso-Sensitest agar	49
2.4.6 SOB medium	49
2.4.7 SOC medium	50
2.4.8 B agar (Messing, 1983)	50
2.4.9 2x TY medium	50
2.5 Stock solutions and buffers	51
2.5.1 Antibiotic stock solutions	51
2.5.2 6x Bromophenol blue (BPB) loading dye	51
2.5.3 6x Bromophenol blue (BPB) stop mix	51
2.5.4 Tris-borate EDTA (TBE) buffer	54
2.6 Common solutions for DNA isolation and cloning experiments	54
2.7 Sterilization and containment of biological materials	54
2.8 Maintenance and purification of bacterial strains	55
2.9 Plating techniques	55
2.10 Bacterial conjugation	55
2.11 Small scale preparation of plasmid and RFDNA(miniprep)	56
2.12 Large scale preparation of plasmid and RF DNA	57
2.13 Preparation of plasmid from <i>S. typhi</i>	57
2.14 Estimation of DNA concentration	58
2.15 Restriction endonuclease digestion of DNA	59
2.16 Agarose gel electrophoresis	59
2.17 Recovery of DNA fragments from agarose gels	60
2.17.1 Electroelution (Sambrook <i>et al.</i> , 1989)	60
2.17.2 Elution of DNA fragments by centrifugation (Heery <i>et al.</i> , 1990)	60
2.18 Phenol-chloroform extraction and ethanol precipitation of DNA solution	60
2.19 Ligation of DNA fragments with compatible ends	61

	Page
2.20 Transformation and transfection of competent <i>E. coli</i> by the CaCl ₂ -heat shock method	62
2.21 Transfection of competent <i>E. coli</i> DH5aF' with RF DNA of bacteriophages M13mp18 and M13mp19	63
2.22 Detection of transposons	63
2.22.1 Conjugal transfer of plasmids from <i>S. typhi</i> into <i>E. coli</i> UB5201 at 25°C	63
2.22.2 Conjugal transfer of plasmid pUB307 from <i>E. coli</i> UB1637 into <i>E. coli</i> UB5201 harbouring plasmid of <i>S. typhi</i> at 37°C	64
2.22.3 Transposition to pUB307 and analysis of transconjugants for putative transposon markers	65
2.22.4 Comparison of pUB307 and recombinant pUB307 carrying putative transposons derived from plasmids of <i>S. typhi</i>	66
2.22.5 Transformation and analysis of transformants	66
2.23 Isolation of chloramphenicol resistance transposon	67
2.23.1 Curing of recombinant pUB307 carrying the Ac ^r Cm ^r Tcm ^r Sm ^r transposon in Ac ^r Cm ^r Ctm ^r Km ^r Sm ^r Tc ^r transconjugants	67
2.23.2 Secondary transposition	68
2.23.2.1 Conjugal transfer of pUB307 from <i>E. coli</i> UB5201 into the Km ^s cured derivatives of Ac ^r Cm ^r Ctm ^r Km ^r Sm ^r Tc ^r <i>E. coli</i> UB1637	68
2.23.2.2 Transposition to pUB307 and analysis of transconjugants for putative transposon markers	68
2.23.2.3 Comparison of pUB307 and recombinant pUB307 carrying putative transposons derived from the chromosome of cured derivatives of Ac ^r Cm ^r Ctm ^r Km ^r Sm ^r Tc ^r <i>E. coli</i> UB1637	69
2.23.2.4 Transformation and analysis of transformants	69
2.24 Cloning of antibiotic resistance genes	70

	Page
2.24.1 Restriction endonuclease analysis of recombinant pUB307 carrying the Ac ^r Ctm ^r Sm ^r transposon	70
2.24.2 Shotgun cloning of antibiotic resistance genes from recombinant pUB307 carrying Ac ^r Ctm ^r Sm ^r transposon into plasmid vector pKan	70
2.24.3 Transformation and analysis of transformants	70
2.24.4 Subcloning of Ctm ^r gene from <i>Sau3AI</i> partially-digested recombinant pUB307 carrying Ctm ^r gene	71
2.24.5 Transformation and analysis of Ctm ^r transformants	72
2.25 Southern blotting and hybridization	72
2.25.1 Solutions for Southern blotting	72
2.25.2 Solutions for hybridization and blot washing	73
2.25.3 Vacuum blotting	73
2.25.4 Direct labelling of DNA probes	74
2.25.5 Southern hybridization	74
2.25.6 Signal generation and detection	75
2.26 Cloning with M13mp18 and M13mp19 vectors and construction of nested deletion libraries	75
2.26.1 Subcloning of a 2.5 kb Ac ^r DNA fragment into M13mp19	75
2.26.2 Construction of nested deletion library I	76
2.26.3 Subcloning of a 1.8 kb Ac ^r DNA fragment into M13mp18	77
2.26.4 Construction of nested deletion library II	77
2.26.5 Complementary test (C-test) to confirm the opposite orientations of inserts in recombinant M13mp18 and M13mp19	78
2.26.6 Purification of single-stranded template DNA of recombinant M13mp18 and M13mp19	79
2.27 DNA Sequencing	79

	Page
2.27.1 Manual Sanger dideoxy chain termination sequencing (Sanger <i>et al.</i> , 1979)	79
2.27.2 Preparation of a 6% (w/v) polyacrylamide-8 M urea sequencing gel	80
2.27.3 Polyacrylamide gel electrophoresis	80
2.27.4 Autoradiography of sequencing gels	81
2.27.5 Automated DNA sequencing	81
2.27. 5.1 Preparation of 6% (w/v) polyacrylamide-7 M urea sequencing gel	81
2.27.5.2 Polyacrylamide gel electrophoresis	82
2.27.6 Analysis of nucleotide sequences	82
CHAPTER THREE RESULTS	84
3.1 Detection of transposons	84
3.1.1 Antibioqrammes of <i>E. coli</i> UB1637 transconjugants	84
3.1.2 Plasmid profiles of <i>E. coli</i> UB1637 transconjugants	87
3.1.3 Antibioqrammes of transformants	88
3.1.4 Plasmid profiles of transformants	95
3.2 Isolation of chloramphenicol resistance transposon	95
3.2.1 Curing of recombinant pUB307 carrying the Ac ^r Ctm ^r Sm ^r transposon in Ac ^r Cm ^r Ctm ^r Km ^r Sm ^r Tc ^r UB1637	95
3.2.2 Secondary transposition	100
3.3 Plasmid profiles of tranconjugants from secondary transposition and transformation of <i>E. coli</i> DH5 α	106
3.4 Cloning of antibiotic resistance genes	110
3.4.1 Restriction endonuclease digestion of pCL8 and pCL8R	110
3.4.2 Shotgun cloning of antibiotic resistance genes	116
3.4.3 Restriction pattern of recombinant pKan after <i>Sall</i> digestion	116

3.5 Hybridization of labelled 2.5 kb Ac ^r DNA fragment to pST8 of <i>S. typhi</i> S8 and recombinant pUB307 carrying Ac ^r Ctm ^r Sm ^r transposon	130
3.6 M13 cloning and construction of nested deletion libraries	130
3.7 Confirmation of the opposite orientations of inserts of recombinant M13mp18 and M13mp19	139
3.8 Autoradiographs of sequencing reactions	139
3.9 Analysis of nucleotide sequences	142
CHAPTER FOUR DISCUSSION AND CONCLUSION	148
4.1 Detection of Ac ^r Ctm ^r Sm ^r transposon and Cm ^r transposon	148
4.2 Cloning of antibiotic resistance genes of pCL8	151
4.3 Southern hybridization	152
4.4 Partial sequences of Tn5410	153
4.4.1 The Tn2-like segment	153
4.4.2 The IS26-like segment	157
4.4.3 The RSF1010-like segment	161
4.4.4 The structure of Tn5410	162
4.5 Conclusion	165
