<b>Chapter 1 General introduction</b>	1
1.1 The Genus <i>Salmonella</i> : Taxonomical and disease classification	1
1.1.1 Salmonellosis	1
1.2 Overview of <i>Salmonella typhi</i>	2
1.2.1 Characteristics	2
1.2.2 Epidemiology	3
1.2.3 Pathogenesis and clinical manifestations	3
1.2.4 Diagnosis, treatment and prevention	4
1.3 Methods of bacterial typing and identification	5
1.3.1 Phenotypic methods	6
1.3.1.1 Biotyping (Biochemical typing)	6
1.3.1.2 Serotyping	7
1.3.1.3 Phage typing	8

1.4.4	<i>rfbS</i> gene	34
1.4.5	<i>ompC</i> , S1 and S2 genes	34
1.4.6	<i>groEL</i> gene	35
1.4.7	<i>Salmonella</i> pathogenicity islands (SPI)	35
1.5	Molecular epidemiology and the purpose of bacterial typing	36
1.6	Variations in the bacterial genome	37
1.6.1	Point mutation	38
1.6.2	Chromosomal rearrangements	39
1.6.3	Horizontal gene transfer	40
1.7	General Objectives of the study	41
<b>Chapter 2</b>	<b>Genomic DNA extraction</b>	43
2.1	Introduction	43
2.2	Materials and Methods	44
2.2.1	Bacterial strains	44
2.2.2	Ribotyping	44
2.2.2.1	Preparation of genomic DNA	44
2.2.2.2	Preparation of the 16S rRNA gene probe	45
2.2.2.3	Digestion with restriction endonucleases and electrophoresis	46
2.2.2.4	Processing the gel	47

2.2.2.5	Capillary blotting	47
2.2.2.6	Processing the blot	48
2.2.2.7	Preparation of labeled probe and hybridization	48
2.2.2.8	Washing the membrane	49
2.2.2.9	Detection of the non-radioactive label	49
2.3	Results	50
2.4	Discussion	54
<b>Chapter 3</b>	<b>Genomic diversity assessed by standard typing methods</b>	57
3.1	Introduction	57
3.1.1	Objectives	60
3.2	Material and methods	60
3.2.1	Bacterial strains	60
3.2.2	Pulsed-field gel electrophoresis (PFGE)	63
3.2.2.1	Preparation of genomic DNA	63
3.2.2.2	Digestion with restriction enzyme	63
3.2.2.3	Gel electrophoresis	63
3.2.2.4	Data analysis	64
3.2.3	Ribotyping	65
3.2.3.1	Preparation of genomic DNA	65
3.2.3.2	Preparation of rRNA gene probe	65

3.2.3.3	Gel electrophoresis of digested <i>S. typhi</i> genomic DNA	65
3.2.3.4	Southern blotting and hybridization	66
3.2.3.5	Data analysis	66
3.2.4	IS200 typing	66
3.2.4.1	Preparation of genomic DNA	66
3.2.4.2	Preparation of the IS200 probe	66
3.2.4.2.1	Extraction of plasmid DNA	66
3.2.4.2.2	Gel electrophoresis of plasmid	67
3.2.4.2.3	Purification of IS200 probe	68
3.2.4.3	Gel electrophoresis of digested <i>S. typhi</i> genomic DNA	68
3.2.4.4	Southern blotting and hybridization	68
3.2.4.5	Data analysis	68
3.2.5	Polymerase chain reaction (PCR) analysis	69
3.2.5.1	Genomic DNA isolation	69
3.2.5.2	PCR-ribotyping	70
3.2.5.2.1	Primer selection	70
3.2.5.2.2	PCR reaction	70
3.2.5.2.3	PCR amplification	70
3.2.5.2.4	Detection of PCR product	70
3.2.5.3	PCR-RFLP	71
3.2.5.3.1	Primer selection	71
3.2.5.3.1.1	<i>viaB</i> gene	71
3.2.5.3.1.2	<i>groEL</i> gene	71
3.2.5.3.1.3	<i>ompC</i> gene	71

3.2.5.3.1.4 <i>rfbS</i> gene	72
3.2.5.3.1.5 16S rRNA gene	72
3.2.5.3.1.6 16S-23S rRNA spacer region	72
3.2.5.3.2 PCR reaction	72
3.2.5.3.2.1 <i>groEL</i> and 16S rRNA genes	72
3.2.5.3.2.2 <i>viaB</i> gene, <i>ompC</i> gene, <i>rfbS</i> gene and 16S-23S rRNA spacer region	72
3.2.5.3.3 PCR amplification	73
3.2.5.3.3.1 <i>viaB</i> gene	73
3.2.5.3.3.2 <i>groEL</i> gene	73
3.2.5.3.3.3 <i>ompC</i> gene	73
3.2.5.3.3.4 <i>rfbS</i> gene	73
3.2.5.3.3.5 16S rRNA gene	73
3.2.5.3.3.6 16S-23S rRNA spacer region	73
3.2.5.3.4 Restriction profiles	74
3.2.5.4 AFLP	74
3.2.5.4.1 DNA isolation	74
3.2.5.4.2 Restriction/Ligation	74
3.2.5.4.3 Preselective amplification	75
3.2.5.4.4 Electrophoresis	76
3.2.5.4.5 Data analysis	77
3.2.6 Discriminatory index analysis	77

3.3 Results	78
3.3.1 Phage typing	78
3.3.2 Antibiograms	78
3.3.3 Pulsed-field gel electrophoresis	78
3.3.4 Ribotyping	87
3.3.5 IS200 typing	92
3.3.6 PCR-ribotyping	96
3.3.7 PCR-RFLP	96
3.3.8 AFLP	102
3.4 Discussion	107
3.4.1 Assessment of genetic diversity by PFGE, ribotyping, IS200 typing, PCR-ribotyping and PCR-RFLP	109
3.4.2 Molecular characterization by AFLP	116
3.5 Conclusion	121
<b>Chapter 4 Genomic diversity assessed by hybridization with specific gene probes</b>	123
4.1 Introduction	123
4.1.1 Objectives	126
4.2 Materials and methods	126
4.2.1 Bacterial strains	126
4.2.2 Gene probe typing	128

4.2.2.1 Preparation of gene probes based on PCR amplification	128
4.2.2.1.1 Primer selection	128
4.2.2.1.1.1 <i>groEL</i> gene	128
4.2.2.1.1.2 <i>ompC</i> gene	128
4.2.2.1.1.3 <i>rfbS</i> gene	128
4.2.2.1.1.4 <i>fliC</i> gene	128
4.2.2.1.1.5 <i>invA</i> gene	128
4.2.2.1.2 PCR reaction	129
4.2.2.1.2.1 <i>groEL</i> gene	129
4.2.2.1.2.2 <i>ompC</i> , <i>rfbS</i> , <i>fliC</i> and <i>invA</i> genes	129
4.2.2.1.3 PCR amplification	129
4.2.2.1.3.1 <i>groEL</i> gene	129
4.2.2.1.3.2 <i>ompC</i> gene	129
4.2.2.1.3.3 <i>rfbS</i> gene	129
4.2.2.1.3.4 <i>fliC</i> gene	129
4.2.2.1.3.5 <i>invA</i> gene	130
4.2.2.1.4 Gel electrophoresis and purification of gene probes	130
4.2.2.2 Preparation of gene probes from plasmids	130
4.2.2.2.1 Extraction of plasmid DNA	130
4.2.2.2.2 Restriction digest of plasmids and gel electrophoresis	131
4.2.2.2.3 Purification of gene probes	132
4.2.2.3 Gel electrophoresis of digested <i>S. typhi</i> genomic DNA	132

4.2.2.3.1	Genomic DNA digested with a frequent cutter (Restriction enzyme analysis gel)	132
4.2.2.3.2	Genomic DNA digested with a rare cutter (PFGE gel)	132
4.2.2.4	Southern blot and hybridization	134
4.2.2.4.1	Restriction enzyme analysis gels (REA gels)	134
4.2.2.4.2	Pulsed-field gel electrophoresis analysis (PFGE gels)	134
4.2.3	Movement of <i>groEL</i> gene in the genome of <i>S. typhi</i> due to IS200 elements	134
4.2.3.1	Genomic DNA digested with rare cutting enzyme (PFGE gel)	134
4.2.3.2	Preparation of gene probes	134
4.2.3.3	Southern blotting and hybridization	135
4.2.4	The detection of SPI-1 and SPI-2 in clinical and environmental <i>S. typhi</i> isolates	135
4.2.4.1	Preparation of SPI-1 and SPI-2 gene probes	135
4.2.4.2	Gel electrophoresis of digested <i>S. typhi</i> genomic DNA	135
4.2.4.2.1	Digestion with <i>Bam</i> HI	135
4.2.4.2.2	Digestion with <i>Eco</i> RI	136
4.2.4.3	Southern blotting and hybridization	136
4.3	Results	136
4.3.1	Gene probe typing	136
4.3.1.1	Hybridization of restriction enzyme analysis (REA) gel with various gene probes	136

4.3.1.2 Hybridization of PFGE gel with various gene probes	141
4.3.2 Localization of IS200 element in the vicinity of the <i>groEL</i> gene on <i>Xba</i> I restricted fragments	149
4.3.3 Detection of SPI-1 and SPI-2 in clinical and environmental <i>Chilean S. typhi</i> isolates	152
4.3.3.1 Genomic DNA digested with <i>Bam</i> HI	152
4.3.3.2 Genomic DNA digested with <i>Eco</i> RI	152
<b>4.4 Discussion</b>	<b>155</b>
4.4.1 Gene probe typing	155
4.4.2 Plasticity of <i>groEL</i> gene in the genome	158
4.4.3 Detection of SPI-1 and SPI-2 in clinical and environmental <i>S. typhi</i> isolates	162
<b>4.5 Conclusion</b>	<b>165</b>
<b>Chapter 5 Diversity at the base pair level</b>	<b>166</b>
<b>5.1 Introduction</b>	<b>166</b>
5.1.1 Objectives	168
<b>5.2 Materials and methods</b>	<b>168</b>
5.2.1 Bacterial strains	168
5.2.2 PCR-SSCP analysis of <i>S. typhi</i> isolates	169
5.2.2.1 DNA isolation	169

5.2.2.2 Preparation of genes based on PCR amplification	169
5.2.2.2.1 Primer selection	169
5.2.2.2.2 PCR reaction	169
5.2.2.2.3 PCR amplification	169
5.2.2.3 Restriction of amplified genes	171
5.2.2.4 SSCP electrophoresis	171
5.2.2.5 Silver staining of SSCP gel	172
5.2.3 PCR-SSCP analysis of <i>Salmonella</i> serovars	172
5.2.3.1 DNA isolation	172
5.2.3.2 Amplification of <i>groEL</i> gene for SSCP analysis	172
5.2.3.3 Restriction of <i>groEL</i> gene	172
5.2.3.4 SSCP electrophoresis	173
5.2.3.5 Silver staining of SSCP gel	173
5.3 Results	173
5.3.1 PCR-SSCP analysis of <i>S. typhi</i> isolates	173
5.3.2 PCR-SSCP analysis of <i>Salmonella</i> serovars	181
5.4 Discussion	188
5.4.1 PCR-SSCP analysis of <i>S. typhi</i> isolates	188
5.4.2 PCR-SSCP analysis of <i>Salmonella</i> serovars	191
5.5 Conclusion	193
<b>Chapter 6 General discussion and conclusions</b>	195
