

3.3 Internal Inspection	32
3.3.1 Preparatory Works for CCTV Survey and Execution of the Survey	36
3.4 Structural Performance Evaluation and Critical Sewers	38
<b>4.0 Rehabilitation Techniques</b>	<b>44</b>
4.1 Excavation and Replacement	44
4.2 Repair	49
4.2.1 Part Lining	49
4.2.2 Chemical Grouting	54
4.2.3 Applicability of Repair Techniques in Malaysia	60
4.3 Replacement	62
4.3.1 On-line Replacement	63
4.3.1.1 Microtunnelling	63
4.3.1.2 Pipe Jacking	71
4.3.1.3 Pipe Bursting	76
4.3.2 Off-line Replacement	83
4.3.2.1 Directional Drilling	83
4.3.2.2 Guided Drilling	87
4.3.3 Applicability of Replacement Techniques in Malaysia	90
4.4 Renovation	92
4.4.1 Soft Lining/Cured in Place Pipe	94
4.4.2 Fold and Formed Lining	101
4.4.3 Spiral Lining	107

4.4.4 Spray-on Lining	111
4.4.5 Slip Lining	116
4.4.6 Applicability of Renovation Techniques in Malaysia	120
<b>5.0 Cost Analysis of Rehabilitation Technologies</b>	<b>122</b>
5.1 Trench versus Trenchless	123
5.2 Trenchless Technology Costs	127
5.2.1 Repair Technology	127
5.2.1.1 Chemical Grouting	128
5.2.2 Replacement Technology	129
5.2.2.1 Pipe Jacking	129
5.2.3 Renovation Technology	131
5.2.3.1 Soft Lining/ Cured in Place Pipe	131
5.2.3.2 Spray-On Lining	134
5.3 Example of Cost Derivation for Rehabilitation Works	135
<b>6.0 Conclusion and Recommendations</b>	<b>140</b>
6.1 Technical Viability	141
6.2 Future Needs and Development	143
