DECLARATION	ii
ACKNOWLEDGEMENTS	iii
ABSTRACT	v
 CHAPTER 1: INTRODUCTION	
1.1 Types of Corrosion	2
1.2 Forms of Corrosion	6
1.3 Corrosion Control	13
1.4 Surface Coatings	18
1.4.1 Organic Coatings	18
1.4.2 Chemistry of Organic Coatings	19
1.4.3 Corrosion control by Organic Coatings	22
1.4.4 Barrier Properties and Corrosion Protection	23
1.5 Principles of Paint Formulation	24
1.6 Types of Drying Mechanisms	28
1.7 Evaluation of Organic Coatings	29
1.7.1 Laboratory Accelerated Tests	29
1.7.2 Electrochemical Techniques	30
1.8 High Temperature Corrosion	37
1.9 Why Silicones ?	41
1.10 Silicones in Coating Industry	42

CHAPTER 2: EXPERIMENTAL TECHNIQUES

2.1	Preparation of Resins and Paints	43
2.2	Preparation of Painted Specimens	51
2.3	Testing of Liquid Paints	52
2.4	Determination of the Physical Properties of the Coated Metal	54
2.5	Heat Resistance Test	56
2.6	Accelerated Test	58
2.7	Electrochemical methods of Evaluation	59
2.7.1	Potential - Time Measurements	60
2.7.2	ElectroChemical Impedance Spectroscopy	61
2.8	EIS Studies for Coating Evaluation	67
2.9	Non ElectroChemical Test	69
2.10	SEM and EDAX Studies on Coatings	73

CHAPTER 3: HEAT AND CORROSION RESISTANT PROPERTIES OF SILICONE TITANATE COATING SYSTEM

3.1	Introduction	74
3.2	Visual Inspection	75
3.3	ElectroChemical techniques to evaluate the heat resistance of the Coating system	76
3.3.1	Potential - Time measurements	76
3.3.2	EIS Studies	78
3.4	Scanning Electron Microscope	90
3.5	Corrosion behavior of the coatings by EIS	92
3.6	Physical and Mechanical properties	94

3.7	Salt Spray Test	96
3.8	Chemical Resistance Test	96
3.9	Solvent Resistance test	98

CHAPTER 4: HEAT AND CORROSION RESISTANT
PROPERTIES OF SILICONE - TITANATE
(PAINT II) AND RHODORSIL SILICONE
(PAINT III) WITH CERAMIC PIGMENTED
COATINGS

4.1	Introduction	100
4.2	Visual evaluation	102
4.3	EIS Studies	105
4.4	SEM Studies	118
4.5	EDAX Analysis	124
4.6	Physical and Mechanical properties	129
4.7	Corrosion behavior of the coatings by EIS and Salt Spray test methods	132
4.8	Chemical and Solvent Resistance Test	133

CHAPTER 5: HEAT AND CORROSION RESISTANT
PROPERTIES OF EPOXY SILICONE
COATING SYSTEM

5.1	Introduction	135
5.2	Potential Vs. Time Measurements	136
5.3	EIS Studies	140
5.4	SEM Studies	146
5.5	EDAX Analysis	150

5.6	Physical properties of the Epoxy Silicone resin and liquid paints	154
5.7	Mechanical properties of the Epoxy Silicone coating	155
5.8	Chemical Resistance Test	157
5.9	Salt Spray Test	159
5.10	Solvent Resistant Test	160
FIELD TRIALS		162
