

LIST OF TABLES

| Table | Caption | Page |
|--------------|--|-------------|
| Table 2.1 | Examples of proton conducting polymer electrolytes | 7 |
| Table 2.2 | Examples of chitosan based proton conducting polymer electrolytes | 16 |
| Table 2.3 | Examples of electrochemical devices based on chitosan based proton conducting polymer electrolytes | 17 |
| Table 2.4 | Examples of PVA based proton conducting polymer electrolytes | 19 |
| Table 2.5 | Examples of electrochemical devices based on PVA based proton conducting polymer electrolytes | 20 |
| Table 2.6 | Examples of electrolyte based on polymer blend | 21 |
| Table 2.7 | Examples of chitosan polymer blend based electrolytes | 22 |
| Table 2.8 | Examples of polymer electrolytes with various plasticizers | 25 |
| Table 2.9 | Examples of polymer electrolytes with EC as plasticizer | 27 |
| Table 2.10 | Examples of solid-state batteries | 28 |
| Table 2.11 | Example of H ⁺ ion solid-state batteries | 29 |
| Table 2.12 | Examples of EDLC using proton conducting polymer electrolytes as a separator | 30 |
| Table 3.1 | The ratio content of chitosan and PVA polymer blend | 34 |
| Table 3.2 | The content of salted system | 35 |
| Table 3.3 | The content of plasticized system | 36 |
| Table 3.4 | The content of chitosan-NH ₄ NO ₃ samples | 42 |
| Table 3.5 | The content of PVA-NH ₄ NO ₃ samples | 43 |
| Table 3.6 | The content of chitosan-EC samples | 43 |
| Table 3.7 | The content of PVA-EC samples | 44 |

| | | |
|------------|---|-----|
| Table 3.8 | The content of PVA-chitosan-EC samples | 44 |
| Table 3.9 | The content of NH ₄ NO ₃ -EC samples | 45 |
| Table 3.10 | The ratio content of cathode and anode for primary proton battery | 51 |
| Table 3.11 | The ratio content of cathode and anode for secondary proton battery | 51 |
| Table 6.1 | The average ionic conductivity for salted system at room temperature | 105 |
| Table 6.2 | Regression, R ² and activation energy, E _a value for salted system | 110 |
| Table 6.3 | Transport parameters for salted system at room temperature (using $l = 10 \text{ \AA}$) | 111 |
| Table 6.4 | Transport parameters for salted system at room temperature (using $l = 6 \text{ \AA}$) | 112 |
| Table 6.5 | Transport parameters for salted system at room temperature (using $l = 3 \text{ \AA}$) | 112 |
| Table 6.6 | The average ionic conductivity for salted system at room temperature | 124 |
| Table 6.7 | Regression, R ² and activation energy, E _a value for plasticized system | 130 |
| Table 6.8 | Transport parameters for plasticized system at room temperature (using $l = 10 \text{ \AA}$) | 131 |
| Table 6.9 | Transport parameters for plasticized system at room temperature (using $l = 6 \text{ \AA}$) | 131 |
| Table 6.10 | Transport parameters for plasticized system at room temperature (using $l = 3 \text{ \AA}$) | 132 |
