

LIST OF TABLES

Table		Page
2.1	The decision making unit in a business buying process (Pearson, 1996)	22
2.2	A summary of research in business promotional discourse	25
2.3	A summary of the three approaches to genre (Kobayashi, 2003:7)	29
2.4	Types of discourses subjected to multimodal analysis	40
3.1	Metafunctions and their realisations	56
3.2	Variation in the labeling of the three metafunctions in SF MA	70
3.3	The metafunctions and their corresponding visual tools and systems (Kress and van Leeuwen, 1996, 2006)	71
3.4	The hierarchy of effects model (adopted from Lavidge and Steiner, 1961) and key elements of advertisements	85
3.5	The theoretical framework adopted in the study	87
4.1	The analytical framework of the study	91
4.2	A six-step procedure in managing clusters of elements (Fauziah, 2007)	105
4.3	Elements of transitivity and their realizations	124
4.4	Meanings and their realisations in mental processes	128
5.1	Forms of Malaysian business brochures and their percentages of occurrences	141
5.2	Summary of findings from transitivity analysis	152
6.1	A Summary of the components of Malaysian business brochures	158
6.2	A Summary of the elements in the title cluster	162
6.3	A Summary of elements in the detail cluster	164
6.4	Combination of elements and their percentages of occurrence in the detail cluster	165

7.1	The obligatory and optional super clusters of Malaysian business-to-business brochures	211
7.2	Optional super clusters and their frequency of occurrences	214
7.3	The elements of the generic structure potential of print advertisements analysed within the systemic functional framework	218
8.1	A summary of information regarding the layout of the business brochures	229
8.2	A summary of information on the vertical structure of business brochures	230
8.3	The number of brochures with the corresponding number of stages in the bottom left zone	242
8.4	The number of brochures with the corresponding number of stages in the bottom right zone	245
8.5	A summary of information about the vertical triptych structure	250
8.6	The variations in the triptych structure of the Malaysian business-to-business brochures	251
8.7	The super clusters in the vertical triptych structure	253
8.8	The super clusters in the triptych structure with the polarised top and bottom sections (variation 1)	259
8.9	The super clusters in the triptych structure with polarised top and centre sections (variation 2)	262
8.10	The super clusters in the triptych structure of polarised top, center and bottom sections (variation 3)	266
8.11	The super clusters in the triptych structure with polarised centre and bottom sections (variation 4)	269
8.12	The major clusters in the triptych structure with a polarised centre (variation 5)	272
8.13	The super clusters in the triptych structure with a polarized bottom section (variation 6)	274
9.1	A summary of the representation and interaction analyses of the images in the brochures	313

11.1	The super cluster and its type of placement	344
11.2	A summary of the top and bottom of layout and its components and the applicability of the theory of information value and hierarchy of effects model	345
11.3	A summary of the of the triptych layout and its components and the Applicability of the theory of information value and hierarchy of effects Model	346
