List of Tables viii
List of Figures x
Abbreviations xiii

Chapter One

1.0 Introduction 1

1.1 Natural Autoantibodies 1
  1.1.1 Autoantibodies 1
  1.1.2 Characteristics of natural autoantibodies 5
  1.1.3 Functions of natural autoantibodies 6
  1.1.4 Therapeutic role for natural autoantibodies 9

1.2 Adrenal Hormones 10

1.3 Apolipoprotein E 19
  1.3.1 Plasma lipoproteins and lipoprotein metabolism 19
  1.3.2 Characteristics of apolipoprotein E 22
  1.3.3 Functions of apolipoprotein E 29
  1.3.4 Apo E receptor binding domain contains a four-helix bundle 30
  1.3.5 Apolipoprotein E in cerebrospinal fluid 32
  1.3.6 Apolipoprotein E polymorphism and atherosclerosis 33

1.4 Enzyme-Linked Immunosorbent Assays (ELISA) 37
  1.4.1 Principles of ELISA 37
  1.4.2 Indirect ELISA 38

1.5 Epitope Mapping 43
  1.5.1 Characteristics of Epitope 43
  1.5.2 Choosing the epitope 44
  1.5.3 The epitopes of synthetic peptides of apo E and native apo E 45
  1.5.4 Peptide synthesis 47
  1.5.5 Multipin peptide synthesis 51
1.6 Objectives

Chapter Two

2.0 Materials and Methods
2.1 Samples

2.2 Procedure for standard ELISA

2.3 Peptide synthesis of the apolipoprotein E precursor using the multipin peptide synthesis method
2.3.1 Chemistry of peptide synthesis
2.3.2 Selection of synthesis region and generation of the synthesis schedule
2.3.3 Pre-synthesis preparations
2.3.4 Weighing amino acids and activating chemicals
2.3.5 N,N-Dimethylformamide (DMF) filtration
2.3.6 F-moc-Deprotection of pins
2.3.7 Coupling the N-α - F-moc- protected amino acids
2.3.8 Washing of synthesized pins
2.3.9 Acetylation of terminal amino groups
2.3.10 Side-chain deprotection

2.4 ELISA against the apolipoprotein E synthesized peptides

2.5 Quality control

Chapter Three

3.0 Results
3.1 IgA natural antibody to hormones
3.1a Adreno-cortical hormones
3.1b Adreno-medullary hormones
3.1c Other steroid hormones

3.2 IgM natural antibody to hormones
3.2a Adreno-cortical hormones
3.2b Adreno-medullary hormones
3.2c Other steroid hormones

3.3 IgG natural antibody to hormones
3.3a Adreno-cortical hormones
3.3b Adreno-medullary hormones
3.3c Other steroid hormones

3.4 Fractionated natural IgG antibody to hormones

3.5 Comparison between IgA, IgG and IgM natural antibody to adreno-cortical, adreno-medullary and other steroid hormones

3.6 Comparison between natural antibody binding in 3 normal human sera to adreno-cortical, adreno-medullary and other steroid hormones

3.7 Epitopes of apolipoprotein E precursor recognized by antibody in NHS
3.7a Epitopes of apo E recognized by natural IgA
3.7b Epitopes of apo E recognized by natural IgG
3.7c Epitopes of apo E recognized by natural IgM

3.8 Comparison of IgA, IgG and IgM epitopes of apolipoprotein E precursor
3.8a Isotype pattern in individual NHS
3.8b Common apolipoprotein E epitopes of natural IgA, IgG and IgM

3.9 Epitopes of apo E precursor recognized by purified IgG fraction from NHS

3.10 Epitopes of apolipoprotein E recognized by natural IgG in cerebrospinal fluid

3.10 Epitopes of apolipoprotein E recognized by natural IgG in cord blood samples

3.12 Epitopes of apolipoprotein E recognized by antibody in the serum of atherosclerotic patients
3.12a Epitopes of apo E recognized by serum IgA
3.12b Epitopes of apo E recognized by serum IgG
3.12c Epitopes of apo E recognized by serum IgM

3.13 Comparison of apolipoprotein E epitopes of IgA, IgG and IgM in atherosclerotic sera
3.13a Isotype pattern in individual patient serum
3.13b Common apolipoprotein E epitopes of IgA, IgG and IgM
3.14 Comparison between the epitope binding pattern of IgA, IgG and IgM in normal human and atherosclerotic sera

3.14a IgA in NHS and atherosclerotic serum
3.14b IgG in NHS and atherosclerotic serum
3.14c IgM in NHS and atherosclerotic serum

Chapter Four

4.0 Discussion

4.1 Natural antibodies against adrenal hormones and other steroid hormones

4.2 Epitopes of apo E precursor recognized by antibody in normal human serum
4.2.1 Epitope sites of different antibody isotype
4.2.2 The epitopes of apo E and the desired functions

4.3 Epitopes of apo E recognized by antibody in atherosclerosis patients serum

Chapter Five

5.0 Conclusion
