ACKNOWLEDGEMENTS	ii
ABSTRACT	iii
LIST OF CONTENTS	v
LIST OF TABLES	viii
LIST OF FIGURES	xi
LIST OF ABBREVIATIONS	xii
CHAPTER 1 INTRODUCTION	
1.1 Introduction	1
1.2 Research objectives	3
CHAPTER 2 LITERATURE REVIEW	
2.1 Introduction	5
2.2 ISO 14000 series: ISO 14001 and ISO 14004	7
2.3 Why is ISO 14001 EMS important?	11
2.4 Identifying environmental aspects and impacts	15
2.4.1 Environmental aspects	15
2.4.2 Environmental impacts	16
2.4.3 Determining the significant impacts	17
2.5 ISO 14000: the world-wide response	20
2.5.1 The European reaction	21
2.5.2 South American responses	22
2.5.3 Japanese responses	23
2.5.4 Korean responses	24

2.5.5	Taiwanese responses	25
2.5.6	Malaysian responses	25
2.6	Industries and business organisations responses	26
CHAPTER 3 METHODOLOGY		
3.1	Introduction	31
3.2	Literature review and internet search	31
3.3	Document review	31
3.4	Legal review	32
3.5	Personal interview	32
3.6	Methodologies for assessing significant impacts	32
3.6.1	Method A – Qualitative assessment	33
3.6.2	Method B – Quantitative assessment	38
3.6.3	Method C – Quantitative assessment	42
CHAPTER 4 RESULTS AND DISCUSSION		
4.1	Introduction	46
4.2	Issues of concern	47
4.2.1	Air emission	47
4.2.2	Water and wastewater discharges	60
4.2.3	Waste management	72
4.2.4	Contamination of land/ soil and groundwater	79
4.2.5	Occupational safety and health	86
4.3	Analysis of methodologies	
4.3.1	Method A	93
4.3.2	Method B	94
4.3.3	Method C	96
4.3.4	Summary of Method A, Method B and Method C	97
4.4	Analysis of criteria used in setting up a method	100

4.4.1	Legislation/ regulatory compliance	101
4.4.2	Corporate standards/ external industry standards	103
4.4.3	Policies / directives	104
4.4.4	Customer concerns	105
4.4.5	Public image	106
4.4.6	Community concerns	107
4.4.7	Technical feasibility	109
4.4.8	Financial feasibility	109
4.4.9	Level of control	110
4.4.10	Probability of occurrence	112
4.4.11	Scale of impact	112
4.4.12	Severity of impact	113
4.4.13	Duration of impact	113
4.5	Summary of recommendations for developing methodology	114
CHAPTER 5 CONCLUSION		
5.1	Summary of main findings	116
5.2	Implication of findings	119
5.3	Limitations of the study	119
5.4	Recommendations for further research	120
REFERENCES		121

LIST OF TABLES

		Page
Table 2.1	Elements of ISO 14001	9
Table 2.2	Number of certificates issued in Asian countries	27
Table 2.3	Examples of organisations that benefited from implementation of ISO 14001	28
Table 3.1	Significance Assessment Matrix (SAM) – Probability	33
Table 3.2	Significance Assessment Matrix – Severity	35
Table 3.3	Adjust probability according to level of control	36
Table 3.4	Significance Assessment Matrix	37
Table 3.5	Scoring matrix of Method B – example of calculation (e.g. air emission – release of HCL fumes)	40
Table 3.6	Scoring matrix of Method C – example of calculation	44
Table 4.1	Result of significance level determined by Method A, Method B and Method C – air emission	49
Table 4.2	Scoring matrix of Method A – use of Halon fire extinguishers for fire fighting	50
Table 4.3	Scoring matrix of Method B – use of Halon fire extinguishers for fire fighting	51
Table 4.4	Scoring matrix of Method C – use of Halon fire extinguishers for fire fighting	53
Table 4.5	Scoring matrix of Method A – discharge of HF & HNO ₃ acid fumes	55

Table 4.6	Scoring matrix of Method B – discharge of HF & HNO ₃ acid fumes	56
Table 4.7	Scoring matrix of Method C – discharge of HF & HNO ₃ acid fumes	58
Table 4.8	Result of significance level determined by Method A, Method B and Method C – water and wastewater	61
Table 4.9	Scoring matrix of Method A – coolant collected disposed in open drain without treatment	62
Table 4.10	Scoring matrix of Method B – coolant collected disposed in open drain without treatment	63
Table 4.11	Scoring matrix of Method C – coolant collected disposed in open drain without treatment	65
Table 4.12	Scoring matrix of Method A – releasing of resin into open drain	67
Table 4.13	Scoring matrix of Method B – releasing of resin into open drain	68
Table 4.14	Scoring matrix of Method C – releasing of resin into open drain	70
Table 4.15	Result of significance level determined by Method A, Method B and Method C – waste management	73
Table 4.16	Scoring matrix of Method A – improper disposal of mercury lamps to general waste area	74
Table 4.17	Scoring matrix of Method B – improper disposal of mercury lamps to general waste area	75
Table 4.18	Scoring matrix of Method C – improper disposal of mercury lamps to general waste area	77
Table 4.19	Result of significance level determined by Method A, Method B and Method C – contamination of land/ soil and groundwater	80

Table 4.20	Scoring matrix of Method A – incorrect storage of chemical waste	81
Table 4.21	Scoring matrix of Method B – incorrect storage of chemical waste	82
Table 4.22	Scoring matrix of Method C – incorrect storage of chemical waste	84
Table 4.23	Result of significance level determined by Method A, Method B and Method C – occupational safety and health	87
Table 4.24	Scoring matrix of Method A – exposure of operators to sparks and fumes without PPE	88
Table 4.25	Scoring matrix of Method B – exposure of operators to sparks and fumes without PPE	89
Table 4.26	Scoring matrix of Method C – exposure of operators to sparks and fumes without PPE	91
Table 4.27	Summary of key criteria of Method A, Method B and Method C	97
Table 4.28	Summary of the strengths and weaknesses of Method A, Method B and Method C	98
